CHOLECALCIFEROL

Cholecalciferol has no known resistance making it a good choice if resistance is suspected.

PROFESSIONAL

NEW

HARMONIX RODENT PASTE

Harmonix® Rodent Paste is a high-performance ready-to-use non-anticoagulant rodenticide bait containing Cholecalciferol 0.077 % w/w (0.075 % w/w pure) for the control of rats and mice for the protection of public health, stored products and materials.

Harmonix® Rodent Paste is an incredibly flexible product that provides the professional pest controller treatment options in a wide number of scenarios. Harmonix® Rodent Paste is not limited to 'in and around buildings', and the active ingredient Cholecalciferol has no known resistance making it a good choice if resistance is suspected.

Approval No: UK-2020-1266; IE/BPA 70695

1 x 5 Kg

ORDER CODE: BHARPAST

RODENT control

PRODUCTS

COUMATETRALYL

Excellent efficacy against rats and demonstrates reduced risks of secondary poisoning.

PROFESSIONAL

ROMAX® RAT CP (SOFT BLOCK)

Contains 0.0375 % (w/w) Coumatetralyl. Based on a special 100 g 'soft block' formulation, this bait has proved to be particularly attractive to rats. Indeed tests have shown it to be preferred to cereal-based baits. As a block, however, it is 'non-spill' and can be secured in place. It has proved to be effective against both the 'good feeders' and the more difficult to control 'hesitant feeders' in the rat population, and as a multi-feed bait, can be as potent as Brodifacoum.

- Reduced risk of secondary poisoning.
- Unique active ingredient.
- Highly palatable.
- Palatable and securable 'soft bait' formulation.

Approval No: UK-2016-0953-001

1 x 5 Kg

ORDER CODE: BRRATCP5

PROFESSIONAL

RACUMIN® FOAM

IR

Contains 0.4 % (w/w) Coumatetralyl. Racumin® Foam is a new, non-bait rodenticide from Bayer, offering an alternative method to control rat and mice infestations. This truly innovative foam formulation works with the rodent's natural grooming habits and is effective as a result. When faced with difficult to access areas, Racumin® Foam is for indoor use and can be applied in known rat runways, passages, entrance points / holes, covered tracks and wall cavities.

Approval No: UK-2014-0860

Supplied with free contact station, pictured below.

FREE ROMAX® CONTACT STATION

1 x 500 ml

ORDER CODE: BRACFO.5

ROMAX® CONTACT STATION

Allows contact rodenticides to be applied within the station to allow rodents to come into contact with the active ingredients. Following the rodent control program, the contact stations can be conveniently removed. The unique design incorporates end flaps on either side of the station that has the effect of increasing the transfer area of the active ingredient to the coat of the rodent as the rodent passes through the station.

ROMAX[®] MUSKIL[®] FLUO-NP[®] UV TRACKING TECHNOLOGY

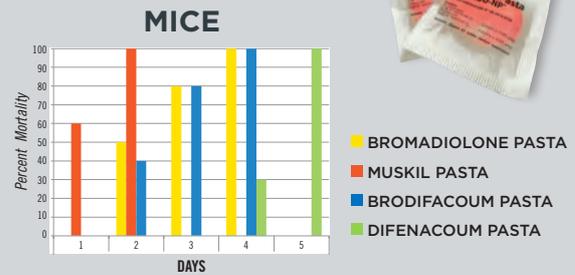

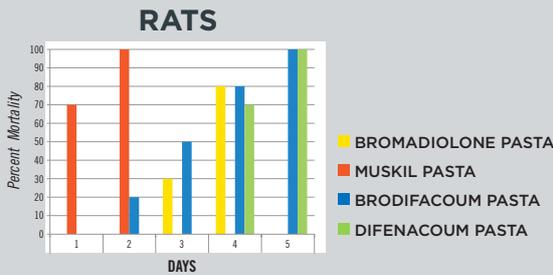

AVAILABLE IN THREE BAIT FORMULATIONS

Romax[®] Muskil[®] technology is based on high-grade food ingredients containing natural feeding enhancers. The block and pasta formulations have the FLUO-NP[®] technology, a fluorescent tracking component that helps monitor rodent activity including routes of travel by using a UV torch on faeces deposited. Fluorescent tracking is also a useful tool to help monitor if the bait is being consumed by the target rodent. Research has also shown Romax[®] Muskil[®] FLUO-NP[®] baits are more attractive than standard baits resulting in accelerated acceptance by rodents. All of these features combined with the patented combination of low dose actives give Romax[®] Muskil[®] its superior palatability with rodents exhibiting no signs of bait shyness.

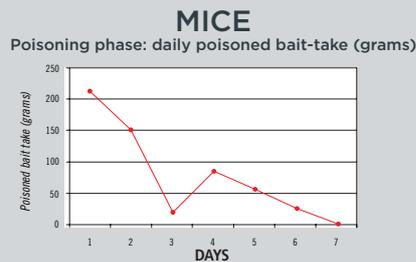

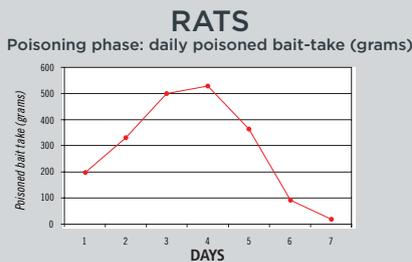

ROMAX[®] MUSKIL[®] PASTA – *The fastest solution.*

Laboratory tests show speed of kill compared with other actives.

Field tests and commercial usage in Europe has proven that Romax[®] Muskil[®] pasta is the fastest solution for controlling both rats and mice. The bait is packed in single dose filter bags which preserves the attracting characteristics effectively maintaining the palatability and performance in a wide range of environments.

ROMAX[®] MUSKIL[®] WAX BLOCK – *Proven palatability.*

An extruded wax block produced with a central hole for anchoring into bait stations with edges to encourage gnawing. The block which has the unique Romax[®] Muskil[®] formulation, makes it highly attractive to both rats and mice while remaining durable in challenging conditions of high humidity and moisture.

ROMAX[®] MUSKIL[®] WHOLEWHEAT – *Special Absorption Technology*

The whole wheat is produced using special absorption technology which ensures an even distribution of the twin active ingredients throughout the grain which means Romax[®] Muskil[®] will be equally effective on mice that kibble (dehusk whole wheats).

SPECIAL ABSORPTION TECHNOLOGY

- Treated using special absorption techniques.
- Active ingredients are evenly distributed through to the core of the grain.

RODENTICIDES - DIFETHIALONE

New Storm[®] Ultra Secure

Take them by Storm[®]

Efficient, reliable & cost effective rodent control

Storm[®] Ultra Secure is a 25ppm rodenticide that has the palatability of a pasta in a block, and is at least twice as palatable as leading anticoagulant bait blocks. This single feed bait offers effective control, even against rats and mice with anticoagulant resistance. It can be used in extreme temperatures, has a high resistance to mould and contains no wax which makes it more appealing to rodents. If you need to control rodents, take them by Storm.

- Ultra palatable** for rats and mice
- Ultra resistant** to extreme conditions
- Ultra effective** with just a single feed
- Ultra quick control** of rodent infestations

FLOCOUMAFEN

A very potent rodenticide reaching similar efficacy levels to that of Brodifacoum.

PROFESSIONAL

STORM® SECURE BAIT BLOCKS

IR

Contains 0.005 % Flocoumafen. Storm is a highly potent anticoagulant rodenticide that is effective against both rats and mice, including resistant strains. Storm is available as a 20 g block packed in 3 kg and may also be used in sewers and covered drains where their resistance to mould growth make them particularly suitable. Approved for Pulse baiting. IR(93137)

Approval No: UK-2015-0850

1 x 3 Kg

ORDER CODE: BSTBB003

PROFESSIONAL

STORM® ULTRA SECURE

Contains 0.0025 % Flocoumafen. Storm Ultra is a highly effective new addition to the successful line of Storm® products. At least twice as palatable as leading anticoagulant block baits, Storm Ultra is stable and durable enough to withstand extreme temperatures. Storm Ultra features a patented formulation employing an innovative BASF binder with superior performance. Approved for pulse baiting and burrow baiting.

RODENT control

PRODUCTS

ROMAX® VENOM FRESH BAIT 29ppm

Romax Venom fresh bait is enclosed within a place-pack ready baiting format of 60 g with slug and snail resistant packaging. The packaging is designed to be pierced through the lid to diffuse the aroma into the surrounding area. Containing Brodifacoum, the most potent rodenticide anticoagulant available for very effective control at a concentration of 0.0029 %, thereby excluding the associated reprotoxic labelling and the 'may cause damage to the unborn child' phrases. Pulse baiting and burrow baiting approved. Approved for use indoors and outdoors (around buildings) as well as sewers. For professional use only. (50 x 60 g trays)

MONITORING & INDICATOR PRODUCTS

RODENT control

PRODUCTS

DETEX BLOX WITH LUMITRACK

Reformulated using Lumitrack, droppings glow bright green under UV light. Highly palatable non-toxic monitoring bait. There is now a demand from food manufacturers and large industrial businesses to monitor constantly for rodents with non-toxic bait. Detex Blox fits perfectly into this situation. The new Detex Blox from Bell contains a fluorescent marker which glows under UV light to aid with tracking infestations.

Standard outer 2

1 x 4 Kg

ORDER CODE: BDEBX004

DETEX SOFT BAIT WITH LUMITRACK

Detex Soft Bait incorporates Lumitrack; a special additive that causes rodent droppings to brightly glow under UV or black light. This tool helps professional pest controllers identify droppings in dark or congested areas where they would normally go unnoticed. Rodent droppings help identify species type and track rodent activity (i.e. entry points, pathways and harbourage areas). Lumitrack® takes the guesswork out of rodent control and improves your baiting strategy.

Each 15g sachet of Detex Soft Bait includes an extruded hole in the centre, making it easier for the professional pest controller to place the bait onto the rod and allowing it to be placed more consistently and securely. Detex Soft Bait has been specially developed to achieve sustained palatability, making it ideal for long-term applications

1 x 3.6 Kg

ORDER CODE: BDEBXSBL

HARMONIX MONITORING PASTE

Harmonix Monitoring Paste is a new non-toxic monitoring bait. With its full traceability day and night, it is also free from the big eight food allergens including wheat and is HACCP certified; making it suitable for use within the food industry. It is the first essential step in integrated pest management for use for early detection of rodent activity and to encourage bait acceptance ahead of treatment.

Use in conjunction with **Harmonix Rodent Paste** to implement a successful integrated pest management programme.

1 x 5 Kg

ORDER CODE: BHARMON5

DEADLINE NON TOXIC PASTE

A very attractive, poison-free, wheat-based paste to test for the presence of rodents. Based on the same base as Deadline Bromadiolone and Difenacoum paste to allow for later introduction of poisons with no change in taste.

1 x 300 g

MOTION SENSOR TECHNOLOGY

NEW

REOLINK GO PLUS

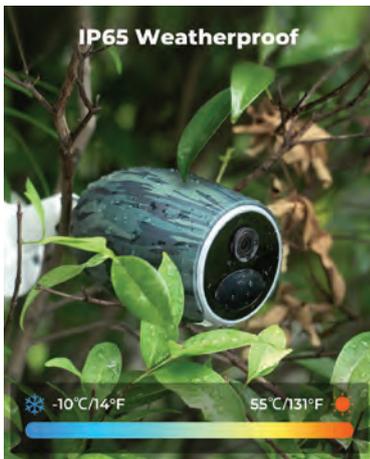

Reolink Go Plus works anywhere, anytime! Reolink Go Plus is a 100% wireless motion detector camera operating on 3G and 4G-LTE networks. An ideal video monitoring solution capable of reporting rodent activity in real-time. No cords, no wiring hassles, and does not depend on access to an active WIFI network to operate.

All live & captured footage can be viewed on the dedicated Reolink app at no extra cost - no sign-up fees or membership required.

The PIR sensor is capable of detecting rodent movement (in tested conditions of between 2-4 metres) 24/7 and then alert the user of any triggers. Ideal for use in the pest control industry for tasks such as live trapping, protecting sensitive areas or areas where further investigation is required to establish where rodents are gaining access or frequently visit.

Key features:

- Instant email alerts and push notifications
- Battery/Solar powered (7800mAh rechargeable battery included - solar charging panel is available on request & sold separately)
- Operates using 3G or 4G-LTE SIM card network (recommend using Vodafone Smart cards - available separately)
- Weatherproof up to IP65 rating
- 2560 x 1440 (4 megapixel) at 15 frames p/sec
- Starlight night vision
- No membership fees to access Reolink app
- Low operating costs
- Can be deployed across multiple jobs or sites as required (no WIFI required)
- Saves you time & money from having to complete physical inspections

ROMAX® CUBE

The Intelligent Motion Sensor Technology for Professional Pest Controllers.

The primary function of the Romax® Cube in a trapping application is to report when a trap has been activated. In commercial applications, this will save many hours travelling time that can be consumed by:

- A) Checking if traps have been activated, or
- B) To determine whether pests are present.

The Romax® Cube is effective in real-time alerting of activated traps and real-time photographic evidence of the presence of pests. This information optimises a technician's daily planning schedule, thereby lowering operational costs.

Should a trap be activated or a pest be photographed near a trap, the technician will receive an alert to their smartphone within 60 seconds.

One Romax® Cube can monitor up to 10 traps (movement tags) within a 50 metre range in a clear view of sight. The Romax® Cube uses a cross-network SIM and the 2G cellular network, which means it works in the most remote locations.

Romax Cube Day & Night: While stocks last.

MULTIPLE SENSORY PLACEMENTS (UP TO 10 SENSORS)

MONITOR TRAPS VIA BLUETOOTH REMOTELY TO SAVE YOU TIME

ROMAX® E-TRAP

The latest in electronic switch technology: Remote monitoring for both rat and mouse traps. Unit consists of a remote monitoring system that sends a message to your smartphone when a trap is triggered. This alert allows the user to schedule visits to premises once traps have been triggered to remove the rodent and reset the traps. Multiple traps can be set via the control module. Ideal device to increase the daily productivity, customer visits and rodent control success rates.

ROMAX[®] CUBE

Be Smart

Intelligent Motion Sensor Technology

Intruder Activity

instant alerts to your smartphone

Giving you peace of mind for monitoring and security applications.

Monitoring uses for:

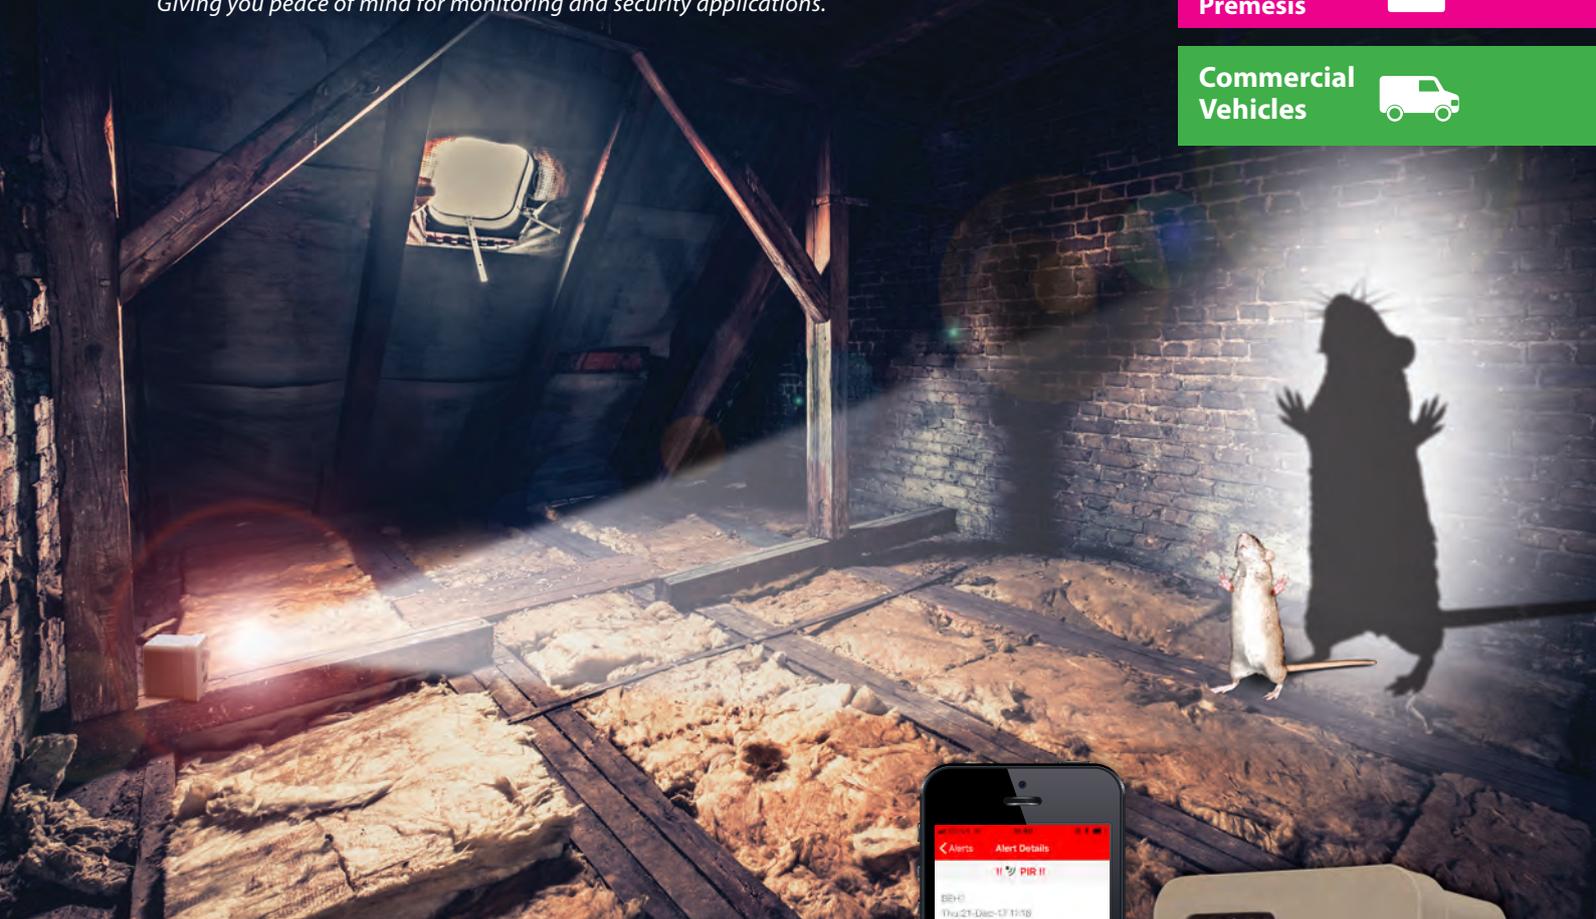

Pest Traps

Domestic/
Commercial
Premises

Commercial
Vehicles

The Romax[®] Cube Features:

- ✓ One Romax[®] Cube can monitor up to 10 traps (movement tags) within a 50 metre range.
- ✓ Passive Infrared Detector (PIR) sensor- detects any movement within a 135 degree angle.
- ✓ High resolution Camera, date and time stamped photos once movement is detected.
- ✓ Bluetooth 'movement sensor tags' – if traps have been activated you will be sent a real-time alert within 60 seconds.
- ✓ GPS location- the alert from the Romax[®] Cube, including the trap's, can be forwarded to colleagues who might be better placed to attend.
- ✓ The Romax[®] Cube uses a cross network SIM and the 2G cellular network, working in the most remote locations.

VICTOR CLEAN KILL TUNNEL MOUSE TRAP

The Victor Clean Kill Tunnel design increases interaction with the mouse. Once the mouse enters the trap to retrieve the bait, the Kill-Gate enables perfect placement for a quick, humane kill. No-see, no-touch tunnel design. No chemicals or poisons, safe to be used around children and pets. The trap is reusable or disposable.

1 x 2

ORDER CODE: BVICTUNL

VICTOR KILL VAULT MOUSETRAP

The Victor Kill Vault is similar to the Hidden Kill from Bell - however, it is resettable, use in conjunction with our ROMAX® Rodent Feed Paste. This mouse kill trap contains the dead mouse, and you can drop the carcass in the bin and reset it for multi-use. This is the same technology as the Victor clean kill - however, the mouse is completely hidden when the trap goes off (No tail hanging out the end). Ideal as a sell on / for use in domestic and offices for mouse control.

1 x 2

ORDER CODE: BMOUM267

SNAP & LIVE CATCH TRAPS

HIDDEN KILL MOUSE TRAP

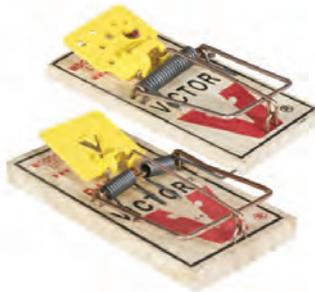

The Hidden Kill has several unique features that combine a quick, no mess capture and kill with exceptional value. The two-way entry allows mice to enter from either direction and the fully enclosed capture area keeps the captured and despatched mouse hidden inside. The design allows an easy "no-touch" disposal.

The Hidden Kill trap is to be used with Provoke mouse.

1 x 24

TRAPPER T-REX

The Trapper T-Rex from Bell is a powerful trap that has many features. It comes with aggressive interlocking teeth and a removable bait cup for safer baiting. The trap can be easily set by either foot or hand and fits into various rat bait stations.

Standard outer 12

Each

ORDER CODE: BTRT-REX

TRAPPER MINI-REX

The Trapper Mini-Rex from Bell is a powerful mouse trap with aggressive interlocking teeth and a removable bait cup for safer baiting. The trap can be easily set by either foot or hand and fits into various rat bait stations.

1 x 24

ORDER CODE: BTRTMREX

SNAP & LIVE CATCH TRAPS

TRAPPER PEST MONITOR

Trapper Pest Monitor is a reusable, plastic station used with Trapper MC Glue Trap to monitor both insects and mice.

For monitoring insects and mice, place a TRAPPER MC Glue Trap in the base, using the clips to hold the glue trap firmly in place. Insects can access Pest Monitor from holes on all four sides. Mice enter through the two larger holes that are adjacent to the wall. To prevent mice from accessing Pest Monitor, rotate the top, covering the two larger holes.

1 x 12

ORDER CODE: BBBPRPEM

TRIP-TRAP

A single live catch mouse trap. A simple one way door that allows entry but no exit. The end section can be removed to place food and take out the trapped mouse.

1 x 6

ORDER CODE: BTRTRIPT

RODENT DETERRENT

NEW ANTI-RODENT LACQUER

Quick-dry formulation for surface treatment to deter rodent pests from chewing or biting treated areas. Anti Rodent Lacquer contains a quick-dry formulation that forms a water-resistant protective film over the treated surface. Simply spray on the area under attack by rats or mice - rodents will be deterred from chewing or biting into the treated area. Contains a bittering agent and natural plant oils. Ideal for use in and around domestic and commercial properties, as well as on farms and other agricultural premises.

- Provides up to 6 months protection to treated areas.
- Indoor and outdoor use.
- Suitable for application to hard surfaces, including electric cabling and insulation.
- Contains peppermint oil, castor oil and bittering agent.

1 x 600 ml

ORDER CODE: BRODLACQ

TRAPPING GUIDELINES FOR RODENTS

Whilst the use of traps is labour intensive, they have a part to play in rodent control, particularly for controlling very small infestations in circumstances where the use of rodenticides is unacceptable. They are unlikely to contribute significantly to large scale control programmes. The major reason for their limited applicability is the behaviour known as neophobia. If large scale control using traps is essential, then the trapping programme needs to be very intensive and very closely monitored.

The use of break-back traps for both rats and mice is probably the most widespread and successful trapping technique. Careful placement is required with break-back traps, the treadle end of the trap being placed across the rodent run against a vertical surface to minimise avoidance. Bait does not need to be used and may reduce the effectiveness of the trap.

All traps should be visited at least once every 24 hours to remove any dead rodents, reset the traps, and ensure that no rodents are being held alive.

One further form of trapping is the use of 'Glue-boards'. These are sheets of material, such as hardboard or plastic, on which a specially designed sticky substance or 'rodent glue' is spread. The boards are placed in strategic areas of rodent activity in the event that rodents will become stuck on the boards and can then be humanely killed and removed.

Rodent boards should only be regarded as a 'last choice' option.

The new 'Alliance' Code of Practice on the responsible use of this technique can be found in the glue board section.

For more information visit: <https://www.pmalliance.org.uk/download/humane-use-of-rodent-glue-boards/>

SPRING TRAPS GENERAL USE

The law requires that spring traps must be set in natural or artificial tunnels, to reduce the risk of killing non-target species. Natural tunnels such as burrows roots may be used, or artificial tunnels, about 60 cm long, can be made from turf, rocks, pipes, boards or fallen timber. This tunnel must be large enough to allow the trap's arms to swing and close, but the tunnel entrance should be reduced to a width of suitable size for the target species by driving sticks into the ground, to exclude pets and other wild mammals and birds. Squirrels will investigate such tunnels and catches may be made throughout the year, particularly in winter and spring. Baiting is unnecessary but will improve catches.

Traps should be placed with the trigger in the middle of the tunnel and should be bedded in flush with the floor. They should be inspected daily and sprung once a week to prevent seizing due to rust. All traps should be securely anchored.

The Spring Trap Pests Act 1954 makes it an offence to use a spring trap for the purposes of killing or taking animals in England and Wales other than one approved by an Order of the Secretary of State. The approval of traps is a devolved issue.

Traps that are currently approved in England are specified in the latest version of The Spring Traps Approval Order 1995. Only traps that have been approved for the purpose may be used.

Those commonly available from Barrettine are the Fenn MK4 & MK6, BMI Body Grip, WCS Tube Trap, Mole Trap, Talpex, Talpirid and Putange may also be used if available. Spring traps should not be used in areas where protected species such as red squirrels or polecats may be present.

MAGNUM SPRING TRAPS

RODENT CONTROL - MAGNUM SPRING TRAPS

BMI BODY GRIP 110 & 116 TRAP

These should not be used where they might take non-target animals. Recent refinements by BMI Magnum Series have made these traps even more effective to use. Every trap has a 4-way trigger that fires the trap when an animal pushes the trigger from any direction, including the side with a new trigger wire to control the strike area.

BMI BODY GRIP 110 TRAP

Target Species - rats, grey squirrel, weasel and stoat.

BMI BODY GRIP 116 TRAP

A larger version of the 110 above. Target species - mink, rabbit plus above species.

110 TRAP - Each

ORDER CODE: BTRMAGNU

116 TRAP - Each

ORDER CODE: BTRMAG16

BODY GRIP TRAP TUNNEL

It is recommended that this tunnel be used to ensure that non-target species do not have access to the trap. Manufactured in the UK with a plastic-coated finish to avoid corrosion.

Each

ORDER CODE: BTRMATUN

WCS TUBE TRAP

The WCS tube trap is a self-contained unit considered to be safe setting, and it's power giving a humane, instant kill. WCS is approved under the Spring Traps Approval order 2009 for use against mink, squirrel, stoat and weasel & it's anti-rust plated finish makes it suitable for a variety of locations against mink, squirrel, stoat and weasel & its anti-rust plated finish makes it suitable for a variety of locations.

MOLE & SQUIRREL TRAPS

MOLE TRAP - SCISSOR TYPE 1

Effective for trapping moles. The trap is to be set in burrows with a round spring.

Each

ORDER CODE: BTRMOLSC

MOLE TRAP HALF BARREL (DUFFUS)

A very popular trap for moles with good effectiveness in burrows.

Each

ORDER CODE: BTRMOLBA

TALPEX® MOLE TRAP

Arguably the best mole trap on the market. Similar to the scissor and pincer traps but more robust. Steve Caple producer of the "Trapping Techniques" video confirmed the following; "Since switching to the Talpex trap my catch rate compared to the more commonly used traps has increased by at least 50 %".

Each

ORDER CODE: BTRMOTAL

TALPIRID MOLE TRAP

An innovative method to catch moles from Bell Labs. Talpirid mole trap has a unique 'easy set' mechanism which reduces the chance of operator injury.

Each

ORDER CODE: BTALPRID

MOLE & SQUIRREL TRAPS

PUTANGE MOLE TRAP

Easy to use robust Mole trap. Each trap purchased will be accompanied by its trigger.

Each

ORDER CODE: BPUTANGE

PUTANGE MOLE TRAP PLIERS

These pliers work in conjunction with the Putange Mole trap. The pliers allow you to set up the Putange Mole trap with ease and allow safer setting of the trap.

Each

ORDER CODE: BPPLIERS

FENN TRAP MARK 4 & 6

FENN TRAP MARK 4

For squirrel, rat or stoat. The trap is to be set in runs or burrows. A artificial surround or tunnel should be created around the trap to protect non-target species.

FENN TRAP MARK 6

A larger version that will cope with rabbit and mink. The same setting conditions as that of the Fenn Mk4.

Mark 4 - Each

LIVE CAPTURE TRAPS

FERAL PIGEON TRAP

A live catch trap constructed using square galvanised mesh. Entrances with easy swing bob wires and top access for removing captured birds. Comes flat packed and complete with vinyl base for easier pre-baiting etc (not shown).

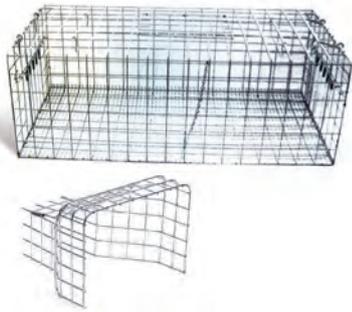

Each

ORDER CODE: BTRA029

FOLDING PIGEON TRAP

The same trap as the Feral Pigeon Trap above but without the vinyl base.

Each

ORDER CODE: BTRA050

Ground Funnel-Pair

ORDER CODE: BTRA031

SQUIRREL & MINK TRAP

Heavy-duty single catch trap. Once an animal steps on the treadle the drop bar holds the door firmly closed.

Dimensions: 600 mm x 175 mm x 150 mm

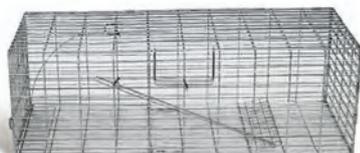

Each

ORDER CODE: BTRAL079

FERAL CAT TRAP

Single catch treadle operated trap. Rear sliding door for removal. Trap also has a carrying handle.

Dimensions: 750 mm x 300 mm x 250 mm

Each

ORDER CODE: BTRAL027

LIVE CAPTURE TRAPS

RABBIT METAL CAGE TRAP

Single catch trap. One door operated by treadle via a release arm.
Dimensions: 800 mm x 200 mm x 225 mm

Each

ORDER CODE: BTRAL006

MC MOUSE MASTER TRAP

A double-entry multi-catch mouse trap. Steel trap design with galvanised finish with the capability to catch up to 30 mice.
Dimensions: 165 mm x 265 mm x 65 mm 0.52 Kg

Each

ORDER CODE: BTRAL010

DOG/FOX TRAP

An extremely strong single live catch cage trap with bait hook release and deadfall galvanised door. The cage is constructed from heavy-duty square galvanised weldmesh and can be folded flat.
Dimensions: 1200 mm x 500 mm x 550 mm
Rigid versions are available on request, additional carriage and lead times apply.

Each

ORDER CODE: BTRDGFLA

PROOFING MATERIALS

ROMAX® RODENT SEAL

Romax® Rodent Seal uses a top-quality industrial sealant in a patented mix of stainless steel fibres. The benefits of such 'wire wool' plus proofing materials have long been known, but they've been combined to offer a professional and time-saving solution to exclusion for the first time. In addition, the product has been commercially tested and is 'metal-detectable', making it a good choice for sealing around plant and machinery in the food industry, whether this be for rodents, insects or just housekeeping.

Standard outer 25

1 x 310 ml

ORDER CODE: BRORODSE

RODENT SEAL ADJUSTABLE NOZZLE

Adjustable nozzle that can be rotated in numerous angles for ease of application. Can also be used with other caulkable rodenticides such as Romax DP and Romax Venom Lipogel.

1 x 5

ORDER CODE: BRORONZ

NEW

REPAIR EXPRESS CEMENT GREY

High speed acrylic polymer based, textured repair cement. For easy and quick reparation or filling of joints and cracks in concrete. Can be applied by caulking gun. Sandable and over-paintable once dried. Can be used for internal and external applications.

Applications:

- Repairing masonry joints
- Closing masonry cracks
- Fixing roof tiles
- Bonding tiling and bricks
- Closing drill holes in facing masonry during repair work
- General repair work

1 x 290 ml

ORDER CODE: BCEMENT3

NEW

EVERBUILD QUICK DRYING CEMENT

Everbuild® Jetcem® Rapid Setting Cement is a specially formulated rapid setting cement-based patching/repair compound that sets in about 30 minutes when mixed with water.

Tested to BSEN1504

- Internal and external repairs to gaps and cracks and walls and floors.
- Repairing flags, slabs, stones and bricks.
- Patching steps and window sills.
- Pointing brick and stone.
- Jointing earthenware pipes and drains.
- Leak sealing in concrete based surfaces.
- Rapid setting (30 minutes, depending on ambient temperature and conditions)
- Easy mixing, just add water.

1 x 3 Kg

ORDER CODE: BJETCEM3

EXPANDING FOAM

Polyurethane Expanding Foam (for use with foam gun). Also option for hand application without a gun.

For use with foam gun.

1 x 750 ml

ORDER CODE: BEXPF700

Applied by hand.

1 x 750 ml

ORDER CODE: BEXPF750

SOLVENT CLEANER

Solvent is used to flush and clean the gun applicator or dissolve 'stray' foam during proofing.

1 x 500 ml

ORDER CODE: BEXPFSOL

FIRE RATED EXPANDING FOAM

Fire-rated expanding Polyurethane Foam has been tested in horizontal and vertical applications to BS476 Part 20. Suitable for sealing joints where fire integrity and insulation is required e.g. walls, floors and partitioning. Perimeter joints around door and window frames and service penetrations.

For use with foam gun.

1 x 750 ml

ORDER CODE: BEXPFRGU

Applied by hand.

1 x 750 ml

MoBe® MOAT

MoBe® Moat has been designed and successfully used by professional pest controllers in conjunction with some of the industries leading food manufacturers.

The MoBe® Moat consists of 18 metres of siliconised paper with adhesive applied to one surface and has been manufactured as an aid to trapping insects around problem, high risk areas. In addition to physically trapping pests, the strip is wide enough to act as a barrier to help prevent insects from crossing over. The paper comes with pre-printed hazard warning lines so to warn others of the tape as well as usage instructions. The tape can be cut to the desired length giving a great number of potential applications. If trapping/monitoring insect pests, additional lures can be added along the tape's length.

Primarily the MoBe® Moat has been designed as a 'quarantine' barrier working in two ways:

- To stop potential movement by pests into previously infestation-free areas/products
- To cordon off known infested areas or products to prevent the spread of an infestation.

Some of the many potential applications:

- 1) To quarantine contaminated pallets of product and prevent cross-contamination to other stock, e.g. peanuts, rice, pet food.
- 2) To act as a barrier to known clean products, e.g. post fumigation commodities or finished product awaiting dispatch.
- 3) Using tape to glue the underside, MoBe® Moat can be stuck to the inside of silos to prevent migration of grain pests.
- 4) Act as a single large overnight trap in sensitive infested areas, e.g. around the perimeter of commercial kitchens against cockroaches.

Please be aware the start of the roll contains no glue.
Standard outer 15

Please note that whilst the glue has been designed and tested successfully against insects, as with other similar devices, we cannot guarantee that it will successfully retain all pests under all environments and conditions. Always use in accordance with the Pest Management Alliance Glue Boards guidelines. The MoBe® Moat is sold as a professional only product.

1 x 18 m

ORDER CODE: BMOBMOAT

ROMAX® GLUE SOLVENT

A responsible and essential component of a Pest Technicians toolbox, the Romax® Glue Solvent solubilises the non-drying glue. This is ideal for removing insects from the Romax® Glue Boards for identification and cleaning hands or surfaces covered in glue. It is also key in the responsible use of glue boards and traps to release non-target pests quickly.

1 x 50 ml

ORDER CODE: BMOBGLUS

RODENT GLUE BOARDS

PRIEST BAT

An essential part of the Professional Pest Control toolkit - A humane despatch method is a legal requirement to despatch rodents and necessary when live traps or glue boards are used and where an alternative to a rifle is needed. 25 cm long.

Each

ORDER CODE: BPRIESTB

WEILS CARD

Working in close proximity to rodents increases the risk of coming into contact with *Leptospira* bacteria, a potentially lethal bacterial infection that causes Leptospirosis or Weil's disease. Carry this robust Weil's disease card in your wallet to inform and enable a Medical Practitioner to either eliminate this disease from the presented symptoms or initiate treatment.

Each

RODENT GLUE BOARDS

PEST MANAGEMENT ALLIANCE HUMANE USE OF RODENT GLUE BOARDS

Pest Management Alliance - Code of Best Practice - Humane Use of Rodent Glue Boards

In order to protect public health within high-risk environments, the use of rodent glue boards remains an important last option when all other control methods have been considered ineffective. Although glue boards are not designed to physically harm rodents, their use raises valid concerns and they should only be sold to or used by technicians who have been given adequate training and are competent in the effective and humane use of this technique. The following principles must be followed in order to minimise animal welfare concerns:

1. Option of last resort

All other options for rodent control must be considered before glue boards are used. Detailed records must show why other control methods are either considered inappropriate or have failed. Where there is a rodent in a high-risk environment, it may be appropriate for glue boards to be placed strategically to ensure immediate control.

2. Check boards frequently

Where rodent boards are used, these must be inspected at appropriate intervals. This should be within 12 hours of placing, or at least as soon as is reasonably practicable, including weekends and bank holidays. If unavoidable events cause slight extensions to inspection intervals, then the reasons should be recorded. Longer delays must be avoided (see contingency plan below).

Where possible and practical, inspection times must be organised to minimise the time rodents are likely to be on the board (e.g. if rodents are known to be active during certain periods, inspection times should be arranged with this in mind). If a caught animal displays signs of undue suffering or serious physical harm, the intervals between inspection times must be shortened. Records must be updated after all inspections.

3. Contingency plan

A contingency plan must be in place so that in the event of an emergency, a second competent person can be called upon to inspect the boards and deal with any captures or safely remove the boards as appropriate. Where it is known boards will not be inspected at appropriate intervals, they must be taken up (even if only temporarily).

4. Protect non-target species

Boards must be placed in such a manner that they do not present a risk to non-target species.

5. Use the correct size board for the pest species

The size of board must be appropriate for the target species.

6. Detailed records

Detailed copies of records and location plans should be available on-site at all times for all boards laid during any treatment and must be updated as necessary to ensure traceability. Copies ensure information is available should site records be lost or unavailable.

7. Dispatch of trapped rodents humanely

Rodents trapped on rodent boards must be dispatched quickly and humanely by technicians with appropriate training. Placing the glue board in a clear plastic bag and dealing the rodent a sharp blow to the head with a blunt instrument would be an appropriate mode of dispatch. Drowning is not an acceptable method of dispatch.

8. Non-target animals

In the event that a non-target animal is trapped, a suitable food-grade oil or similar emollient should be applied to the animal for removal, or if not a protected species, it may be killed humanely. Non-targets should only be released at their site of capture, not elsewhere, and only if they appear to be physically unharmed and their release is not prohibited by law.

9. Remove boards at the end of treatment

At the end of treatment, all rodent boards must be accounted for, removed by the technician, and the records endorsed accordingly.

10. Dispose of boards safely

Rodent boards should be disposed of with care. The sticky surface should be covered to avoid the accidental trapping of non-target species or subsequent misuse, and the board should be disposed of in accordance with local authority waste requirements.

11. Communication with the customer

This Code of Best Practice must be provided to the customer to make them aware of the standards that the operative is working to.

The humane use of glue boards is the legal responsibility of the pest controller and cannot be delegated to untrained people. All technicians must be suitably trained and competent in their application, maintenance and ultimate disposal, including the dispatch of the target species and safe removal of non-target species.

This Code of Best Practice was produced after consultation with Defra and Natural England. For additional copies of this code, please call the sales office. For more information visit: <https://www.pmalliance.org.uk/download/humane-use-of-rodent-glue-boards/>

FUMIGANTS & ACCESSORIES

For the control of Rabbits, Moles and Rats.

RODENT control

PRODUCTS

RODENT CONTROL - FUMIGANTS & ACCESSORIES

RABBITS (*Oryctolagus coniculus*)

The most effective time for treatment for control of rabbits is from around November to March when the rabbit population is at its lowest, and the burrows are most accessible. Before treatment, ensure that rabbits lying out in the surrounding area are driven to ground.

Treatment

- 1: With the loaded Phostoxin Applicator, insert one pellet as far into each hole as practicable, usually 30cm (12") is adequate.
- 2: As soon as the pellets have been deposited in the hole, seal the hole with turf, grass side down.
- 3: If fresh rabbit activity is noticed after a few days, repeat the treatment until no further activity is visible.
- 4: Please be aware of the new label changes. Burrows, runs and harbourages can not be treated if they are less than 25 m from any building occupied by man or animals.

MOLES (*Talpa europaea*)

Moles are generally found from sea level to 3,000 ft in many soil types and live almost entirely underground in tunnel systems which consist of main and subsidiary tunnels, whose main purpose is to trap earthworms for food.

Tunnelling is carried out from the nest, which is its sleeping and breeding quarters. Breeding in March and May is the only time moles meet, otherwise, they are solitary animals. Molehills are a problem in lawns, sports grounds and pasture, causing considerable damage to soil and machinery. The mole, who consumes vast quantities of earthworms, can also cause serious disturbance to crop root systems.

Moles are solitary animals and very territorially protective of their area. This can be very misleading when confronted with an area with many molehills, but as a rule, even heavy infestations can mean only eight moles per hectare (three per acre) even in good feeding areas with a high population of earthworms, their primary food.

(Above text courtesy of Rentokil Ltd.)

PHOSTOXIN SPHERICAL TABLETS

Phostoxin is supplied in packs of 30 x 3g tablets, each containing 57% Aluminium Phosphide for the control of rats, rabbits and moles. Please note that all users must hold a current and recognised certificate in the safe use of metallic phosphides. To purchase Aluminium Phosphine, you must hold a level 2 Safe Use of Aluminium Phosphide qualification. The certified person must also be at the delivery address to receive the product.

30 x 3 g

ORDER CODE: BPHOS.09

TALUNEX SPHERICAL TABLETS

Contains 56% Aluminium Phosphide.
Each flask contains 160 x 0.6 g aluminium phosphide tablets.

Animal burrows, runs and harbourages cannot be treated if they are less than 10 metres from any building occupied by man or animals. The previous label regarding the distance from occupied buildings referenced three metres. Please contact the sales office for the latest product information as legislation regarding this product is regularly amended/ updated.

NILAQUA 'ALCOHOL FREE' HAND SANITIZER

Nilaqua is a fragrance & alcohol free advanced Hard Surface / Multi-Surface cleaner and Hand Sanitiser.

1 x 500 ml

ORDER CODE: BNWRH005

WEPALM HAND SANITISER DISPENSER & REFILL POUCH

Use our cost effective top up system & save money and time! WePalm hand sanitiser comes in easy to store, easy refill pouches. Made with a synergistic blend of detergents to provide a mild but thorough cleaning and sanitising action. With its skin friendly sanitising, cleaning and moisturising action, it allows constant use in catering/kitchen areas, hospitals, nursing homes and can be mounted inside a pest control vehicle for ease of action & access. Once dispensed, produces a pre-lathered foam. The spread-ability of the foam increases the cleaning and disinfecting performance, getting to areas such as in-between the fingers where bacteria hide. Used in conjunction with our pump action dispenser that does not rely on battery operation to provide further cost savings. Complies to BS EN 13727, 13624, & 14476. BPR compliant.

BIOPREN 6 EC

A highly effective formulation containing the insect growth regulator s-methoprene 6.74 % (w/w), as well as a flushing agent and knock-down insecticide pyrethrins 4.81 % (w/w). Suitable for both bed bugs and fleas.

1 x 500 ml

ORDER CODE: BBIOPREC

FLYMAX® G3

Flymax® Super G3 is a novel polymer formulation combined in a water-based delivery system that gives rapid knockdown of flies, ants, fleas, bed bugs and small insects. This product can be used in a wide array of environments. Due to its physical mode of action, Flymax® Super G3 is effective against insect strains that are resistant to organophosphate and pyrethroid insecticides. Use in Public Health / Refuse Tips: Effective in controlling most types of common flying & crawling insects, including flies, ants, fleas, mosquitoes, moths and bed bugs etc. Use in Agricultural Situations: Effective in controlling stored product insects including grain pests, litter beetle, flying insects such as house fly, cluster fly, mosquitoes, etc. (can be applied as surface spray while livestock is present but avoid direct contact with livestock/animals).

1 x 5 Litre

ORDER CODE: BFLYMAX3

PERMOST UNI FLY

An effective ready to use surface and space treatment (Fog or ULV) for flying and crawling insects offering rapid knockdown. For use against flies, mosquitoes, moths, wasps, ants, cockroaches, earwigs, bristletails, fleas, beetles, mites, ticks and lice. Contains Permethrin and Tetramethrin with Piperonyl Butoxide as a synergist.

For application as space or surface treatment to hard porous and non-porous surfaces. Space treatment: applied through a fogging machine at a rate of 1 ml of product per cubic metre.

Surface treatment: applied through a hand sprayer or boom and nozzle sprayer apparatus as a medium or coarse spray. An application rate of 10 ml/ m².

1 x 5 Litre

PESTICIDE FREE

OA2KI® AEROSOL (SILICON DIOXIDE)

Very effective in controlling insects by desiccation- apply a light dust to cracks and crevices to insect harbourage areas. Ideal for direct spray application onto vertical surfaces, and under the bed and in crevices where bedbugs are harbouring.

1 x 500 ml

ORDER CODE: BOA2KIAR

MITEMAX®

MiteMax® is highly effective against poultry red mite (*Dermanyssus gallinae*). MiteMax® is a patented formulation that has been optimised to penetrate the dusty layers typically found within hen houses and grain stores to spread deep into the cracks and crevices that harbour mites.

MiteMax® contains an advanced food-grade cellulose polymer that acts on-contact with the mite. MiteMax® functions as a sticky trap rendering mites irreversibly immobile providing rapid knockdown. MiteMax® has a physical mode of action by trapping and the death/ killing effect is the consequence of this, which means it both falls outside the scope of the biocide directive (exempted from EU Reg. 528/2013) and also is effective against mites resistant to chemical insecticides.

6 x 500 ml

ORDER CODE: BMITE500M

SIRIUS

A physical pesticide for use on a wide variety of insect pests in crops and fields. Application Rates: 250 ml to 1litre/ha.

1 x 1 Litre

ORDER CODE: BSIRI1LT

AQUATAIN AMF

Aquatain AMF is a unique silicone-based liquid for mosquito control. Aquatain is applied to the surface of standing water - even large water bodies and forms a very thin film that rapidly spreads across the water. As silicones have a very low surface tension, the film prevents pupae and larvae from attaching themselves at the surface, resulting in rapid death of larvae and pupae as the insect's respiration is affected. Effective for up to four weeks. Apply 1 ml of Aquatain per square metre of water.

INSECT CONTROL - INSECT / MICE TRAPS

MoBe® MOAT

MoBe® Moat has been designed and successfully used by professional pest controllers in conjunction with some of the industries leading food manufacturers.

The MoBe® Moat consists of 18 metres of siliconised paper with adhesive applied to one surface and has been manufactured as an aid to trapping insects around problem, high risk areas. In addition to physically trapping pests, the strip is wide enough to act as a barrier to help prevent insects from crossing over. The paper comes with pre-printed hazard warning lines so to warn others of the tape as well as usage instructions. The tape can be cut to the desired length giving a great number of potential applications. If trapping/monitoring insect pests, additional lures can be added along the tape's length.

Primarily the MoBe® Moat has been designed as a 'quarantine' barrier working in two ways:

- To stop potential movement by pests into previously infestation-free areas/products
- To cordon off known infested areas or products to prevent the spread of an infestation.

Some of the many potential applications:

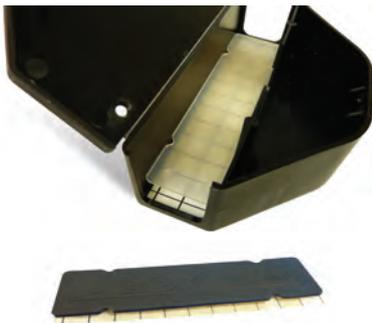

- 1) To quarantine contaminated pallets of product and prevent cross-contamination to other stock, e.g. peanuts, rice, pet food.
- 2) To act as a barrier to known clean products, e.g. post fumigation commodities or finished product awaiting dispatch.
- 3) Using tape to glue the underside, MoBe® Moat can be stuck to the inside of silos to prevent migration of grain pests.
- 4) Act as a single large overnight trap in sensitive infested areas, e.g. around the perimeter of commercial kitchens against cockroaches.

Please be aware the start of the roll contains no glue.
Standard outer 15

Please note that whilst the glue has been designed and tested successfully against insects, as with other similar devices, we cannot guarantee that it will successfully retain all pests under all environments and conditions. Always use in accordance with the Pest Management Alliance Glue Boards guidelines. The MoBe® Moat is sold as a professional only product.

COCKROACH TRAPS

NEW

MOBE® ROACH TRAP

The MoBe roach trap is an effective, low profile, monitoring trap that can be placed under shelving and into restricted spaces which can be used before, during, and after treatment of cockroach infestations to locate problem areas of harbourage, allowing pest controllers to focus their efforts in specific areas. The MoBe roach traps have a high capacity to detect low-level populations and can also be used in a wide variety of environments, including the food industry, as part of an integrated pest management programme. The traps are a safe and non-toxic way to identify cockroaches of all species.

Benefits:

- Ready to use
- Glue board with integrated attractant lure
- Non-toxic monitoring
- Low profile for effective placement

1 x 10

ORDER CODE: BMOBECRT

TRAPPIT CR LO-LINE RTU

Research proves that the Lo-line is one of the most effective cockroach traps on the market. The insects are drawn to the trap by the odours, climb in, over the specially angled ramps and are held fast on the glue floor. The Lo-Line has a large sticky floor area allowing many insects to be caught before replacement is necessary. Lo-line has now been reformulated to utilise a specific food lure within the glue (rather than just a flavouring used in many other traps).

Standard outer 20

1 x 10

ORDER CODE: BTRTRLLR

TRAPPIT CR CORNER RTU

Wasp Dome Trap: the original wasp trap developed over 30 years ago. Tried, tested, reliable and reusable. To be used with the Trappit liquid wasp bait. Available individually or in packs of 40.

BUY 4 GET 1 FREE
20% OFF

Each

ORDER CODE: BTRDOMNL

VESPULURE WASP BAIT

A highly effective monitoring liquid to be placed within wasp monitoring traps to monitor the presence of wasps and hornets, including Asian hornets (*Vespa velutina*). The use of the Vespure monitoring liquid can draw wasps away from areas and can also be used as an effective feeding station to identify the location of wasp and hornet nests for areas that subsequently, need to be cleared of these stinging insects.

The monitoring liquid is formulated with carbohydrates and volatile solvents that assist in expanding of the monitoring area. The formulation contains a bee repellent.

TRAPPIT BEETLE (PITFALL)

An easy to use continuous insect monitor for use in stored cereals, pulses and feedstuffs. It is used to detect mites, weevils and beetles.

Standard outer 6

1 x 10

ORDER CODE: BTRPITFA

GENERAL GRAIN BEETLE ATTRACTANT

The lure has been formulated to be particularly effective in attracting: *Sitophilus granarius* (grain weevil, wheat weevil, or granary weevil) a serious pest of oats wheat, barley, rye, corn and rice. *Sitophilus oryzae* (lesser grain weevil or rice weevil) pests of stored cereals such as barley, maize, rice and wheat, split peas and pasta. *Oryzaephilus surinamensis* (saw-toothed grain beetle) a pest of damaged cereal grains.

1 x 10

ORDER CODE: BGRBTATT

NEW QUICK-CHANGE MONITORING SYSTEMS

The STORGARD QUICK-CHANGE monitoring product line provides pre-baited, multi-species, cost-effective methods for detecting moth and beetle activity at the earliest possible stages. They are designed to manage and control the release of each pheromone and kairomone compound that attracts species-specific moths and beetles into a specially designed trap. This ensures optimal insect capture. Each system improves precision targeting of key insects while capturing important but less visible insects. These systems are easy to install, maintain, and service while providing LONG-LIFE™ Broad Spectrum™ attraction. Each pack contains x6 Traps and x6 Lures.

INSECT CONTROL - INSECT PHEROMONES & LURES

AMENITY MOTH LURES

The Pine Processionary (*Thaumetopoea pityocampa*) is a moth of the family *Thaumetopoeidae*. It is an abundant species of pine woods in central and southern Europe, and as such, has been an important economic pest to Forestry. This is increasing concern, especially in more urban areas due to both the severely irritating hairs that protect the caterpillar larvae. The Oak Processionary Moth is an invasive pest relatively new to England, being found in London in 2006. The Oak processionary Moth is a serious health risk to humans and animals, predominantly from the urticating hairs that cause allergic responses and necrosis on the tongues of dogs that come into direct contact with the caterpillars.

Lures and traps are available to monitor Pine and Oak Processionary Moths in high risk areas. In addition, a number of treatment options are available for both Processionary and Brown Tail Moths, contact the office for more information.

INSECT & WEED CONTROL

Effective weed control is a combination of choosing the most suitable product and getting the application right in terms of timing, dose rate and application technique. Professional products are powerful chemicals which if misused, can damage non-target plants and potentially contaminate, for example, watercourses, therefore herbicides must only be applied by operators who hold the appropriate pest application certificates (PA1 & PA6). PA1 is the foundation qualification required by all spray operators and then they will also need the certificate relevant to the specific spray equipment they will be using, for example, a PA6 for applications made using a knapsack sprayer. It is a legal requirement to be certified on the application of professional herbicides or biocides for plant protection applications. For specific sprayer training on professional products to receive a license from a certified provider please visit: www.lantra.co.uk or www.nptc.org.uk

Terminology used to describe herbicides:

TOTAL	Refers to products that are non selective and within reason will control all vegetation.
SELECTIVE	Most commonly identifies products that control broad leaved weeds without harming turf/grass.
TRANS-LOCATED	Products that, subject to growing conditions, are absorbed by the plant and move within the plant tissue which unlike contact materials the application does need to cover the whole plant/grass.
CONTACT	Do not move around and only kill green leaf they actually hit so good coverage of the whole target is essential for effective control.
RESIDUAL	Products that sit in the top 2 cm of soil and remain active after initial application to control weeds that germinate in the subsequent weeks.

Products containing glyphosate alone (Gallup) would be classed as both a total and a translocated herbicide, but the inclusion of actives such as diflufenican and flufenacet adds residual activity.

Always read the label and ensure the product you intend to use:-

1. Will control the target weeds and that they are within the size range specified.
 2. The weeds are actively growing and are not 'stalled' due to for example drought stress.
- In addition, ensure that:-**
3. Your application equipment is accurately calibrated and has the correct nozzle(s) to deliver the specified spray quality - fine, medium or coarse.
 4. You have the correct PPE specified on the label.
 5. You do not spray in conditions particularly windy or very high temperatures that could result in drift damage to non-target vegetation.
 6. You have made provision for washing out empty pesticide containers and dealing with chemical washings in accordance with your legal obligations taking specific measures to avoid contamination of ditches and watercourses.

GRAZON PRO

A Selective Herbicide for spot spraying weeds in paddocks or pasture, PA1 / PA6 spraying certification is required to apply Grazon Pro.

Active ingredients: 240 g/litre Triclopyr (acid equivalent) present as 334 g/litre of Triclopyr Butotyl and 60 g/litre (5.5% w/w) Clopyralid. Spot treatment for docks, thistles and nettles.

For use in grassland such as paddocks.

1 x Litre

ORDER CODE: BGRAZ1LT

NEW

GARLON ULTRA HERBICIDE

Garlon Ultra Herbicide, a soluble concentrate selective weedkiller that can be applied with a knapsack or tractor mounted boom sprayer. Effective control of a wide range of deep-rooted perennial, herbaceous weeds and woody weeds such as hogweed, bramble, gorse and Japanese Knotweed on amenity grassland. Can be applied to non-crop land such as motorways and railway embankments, roadsides and industrial areas. MAPP - 16211

Active Ingredients - Aminopyralid and Triclopyr.

For professional training (PA1 and PA6 / PA12) required to apply this product please visit: www.lantra.co.uk or www.nptc.org.uk

INSECT & WEED CONTROL

INSECT control

PRODUCTS

DECIS PROTECH INSECTICIDE

Decis Protech is a non-systemic insecticide which acts by contact and ingestion to sucking and chewing insects. Its high lipophilicity provides a high affinity with the insect cuticle.

Active ingredient contains a broad-spectrum pyrethroid (15 g/l Deltamethrin) for control of aphids, caterpillars and other pests in agricultural, horticultural crops and amenity areas.

1 x 1 Litre

ORDER CODE: BDECIS1L

GALLUP XL

Gallup XL is a foliar acting herbicide that controls annual and perennial grasses and most broad-leaved weeds when used as directed. It is translocated from treated vegetation growth to underground roots, rhizomes or stolons. Leaf symptoms, being a reddening then yellowing of the foliage, are first seen on grass weeds but take longer to appear on broad-leaved weeds. To purchase, you must have PA1 and PA6 certification for hand sprayers and PA12 if applied by automatic sprayer.

1 x 5 Litre

ORDER CODE: BGLYFOS5

1 x 20 Litre

ORDER CODE: BGLYFO20

GALLUP HOME & GARDEN AMATEUR PACK

360 g/l professional strength Glyphosate with 'clean wetting system' for sale to both non PA certified users and professionals requiring small quantities (covers approx. 1600 m²)

1 x 1 Litre

ORDER CODE: BGALHG1L

GALLUP BIOGRADE AMENITY

Gallup Biograde Amenity is a systemic herbicide that goes down to the plants roots and will kill most perennial and annual weeds. It's superior and clean formulation of 360 g/l Glyphosate that contains no hazardous wetting agents making it the product of choice when doing a COSHH assessment. It is ideal for clearing unwanted vegetation from most situations including permeable surfaces such as paths/driveways and to spot treat weeds on hard impermeable surfaces like paving (do not apply as a blanket spray to hard surfaces). Where it is applied to land that will subsequently be replanted a minimum of one week after application, sometimes longer (see label) is required before cultivating and replanting.

It is a professional product and must only be applied by an operator holding the relevant PA certification for the spray applicator to be used, for example PA1 and PA6 for Knapsack/other handheld sprayers.

INSECT CONTROL - WOOD PRESERVATION & TREATMENTS

PREMIER CLEAR UNIVERSAL PRESERVER

Clear Universal Wood Preservative (CUWP) is a solvent-borne ready to use product. It contains active ingredients effective against wood destroying and wood discolouring fungi and against wood-boring insects. CUWP penetrates wood quickly and thereby gets deep into inner layers. It is moisture regulating and provides an adhesive surface suitable for glues, fillers, and solvent or water-based finishing treatments such as paints, varnishes and stains.

2 x 5 Litre

ORDER CODE: BUPCL005

LIGNUM INSECTICIDE PRO I62.5

Lignum Pro I62.5 is a concentrated professional product containing an insecticide to eradicate and prevent attack by wood boring beetles. It is highly effective against all life stages of wood-boring insects and woodworm. The formulation is water-based, producing a non-flammable, quick drying product containing no volatile organic compounds (VOCs). It has virtually no odour.

1 x 1 Litre

ORDER CODE: BLINING5

LIGNUM FUNGICIDE AND INSECTICIDE PRO D156

This professional concentrated dual-purpose product contains an insecticide and fungicide to protect and preserve timber. It is designed to eradicate and prevent attack by wood boring beetles and prevent wood-destroying and discolouring fungi. Lignum Pro D156 is effective against a wide range of wood rotting fungi, including both wet rot and dry rot, whilst the pyrethroid insecticide is effective against all life stages of wood boring insects. It is also effective against fungal staining. The concentrated product is diluted with water and can be used during the drying out period after eliminating the source of damp. It is virtually odourless and can be applied either by brush or low pressure spray to provide long-lasting protection.

1 x 1 Litre

ORDER CODE: BLINGFUN

LIGNUM PRO FUNGICIDE AND INSECTICIDE GEL

Ready to use deep penetrating "mayonnaise" type paste for the control and prevention of attack by wood-boring insects and wood rotting fungi. The active ingredients in the gel are highly effective against a wide range of wood-boring insects. The fungicide it contains has excellent efficacy against fungal decay. IPBC is added to protect against a range of wood staining fungi.

PRODUCTS 

NANO G4 LED

The new Nano G4 fly control unit embraces the latest LED (light-emitting diodes) technology which uses less power consumption when compared to standard electronic ballast machines, resulting in a cost-saving for the customer on all-year-round operating costs. LED technology can save as much as 75-80%* in energy consumption when compared to traditional UV fly units. The Nano G4 LED shatter-proof lamps have an in-built driver that makes for easy tool-free servicing and further cost savings. Nano G4 is the professional UK manufactured glue board fly control unit suitable for restaurants, kitchens, food shops etc., where flying insects pose a problem. (*Dependant upon the comparable fly unit).

Features & Benefits:

1. Long life LED lamps
(Lamps are recommended to be changed every three years)
2. Made for wall mounting, suspending or free standing
3. 'Lift and lock' front guard enables tool free servicing
4. Annual cost savings
5. Competitively priced
6. Available in White or Stainless steel
7. Versatile installation
8. Shatter-proof lamps as standard
9. Dimensions: W 50 x H 35.5 x D 12 cm
10. Coverage: Up to 100sq/m (*Dependant upon the comparable fly unit)

BIRD REPELLENTS & GUANO CLEANING

ORNAWAY® BIRD REPELLENT

Ornaway® Bird Gel is a novel, highly effective yet discrete bird deterrent for use on buildings and other structures.

The convenience of Ornaway in pre-filled dishes allows a significant time-saving aspect to the bird installation. The formulation combines initial olfactory repellents with high electromagnetic reflectance spectrums that birds avoid. To be used within an integrated approach to manage birds that could include housekeeping/ cleaning, trapping, spikes and netting. Once properly installed, the product remains effective for at least two years, even in harsh climates.

The gel is intended to be applied in the UV stabilised, low-profile dishes that are supplied with the product. Once installed, the dishes are usually invisible from ground level, so do not detract from buildings' visual appearance.

Ornaway® Bird Gel is also offered in pre-filled dishes as pictured below. The 300 g Caulking Tube includes 15 dishes for filling.

ORDER CODE	DESCRIPTION	PACK SIZE
BBIRORGE	Caulking Tube	1 x 300 g
BORNDISH	Pre-filled Dishes	1 x 15

ORNAWAY® DISH MAGNETS

Ornaway® bird dish magnets offer the user ultimate versatility in the installation of Ornaway® bird gel. The heavy-duty magnets allow the dishes to be securely attached to metallic structures and will remain in place, even in windy conditions.

ORDER CODE	DESCRIPTION	PACK SIZE

25% OFF

Disinfectant and cleaner. Contains Didecylidimethylammonium Chloride for use with the cleaning up of bird waste. Unlike other products, Guanaway is a powerful alkaline cleaner degreaser that neutralises the acidic by-product associated with bird droppings. This reduces the corrosion to the stonework and increases safety by removing the slippery, greasy waste. Also available as a handy RTU trigger spray version ideal for those small jobs when making up a full sprayer isn't justified. Ideal for disinfecting traffic lights, won't discolour plastic.

ORDER CODE	DESCRIPTION	PACK SIZE

BIRD NET INSTALLATION

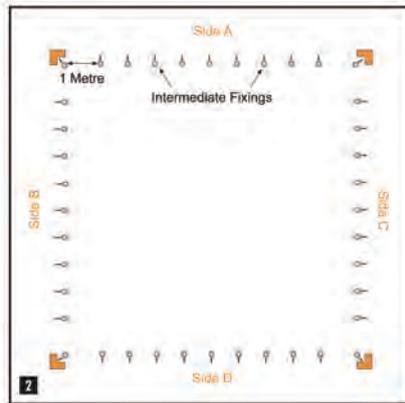

INSTALLING A NET UP TO 10 m BY 10 m

Before starting to install a net, it is always important to make sure that the design of the installation is optimum. You want the net to be effective at keeping birds off the building, whilst at the same time not looking obtrusive.

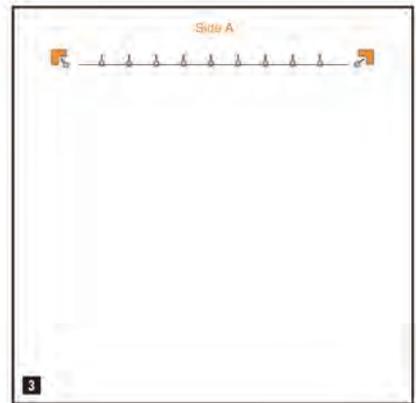

Nets should be installed in a way that minimises the risk of damage by the action of wind. You also want the net to be as straightforward to install as possible. Net installations will vary depending upon the bird species you are proofing against, the substrate you are attaching the net to, e.g. masonry, timber, steelwork or cladding/soft substrate, and the size of the net. Below is a step-by-step guide into effectively installing a pigeon net of size 10 m by 10 m or less.

1 Drill holes and fit Corner Fixings where the net will turn a corner.

2 Drill holes and fit intermediate fixings at 1 m intervals in a straight line between the corner fixings.

3 Run 10 m of wire rope through the fixings of one side.

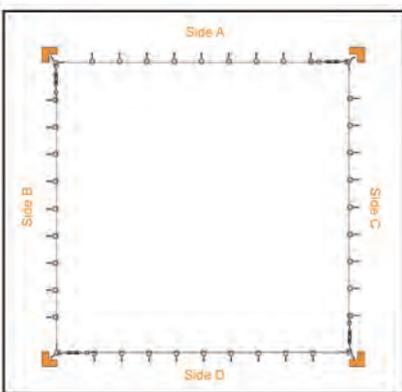

4 Attach one end of the wire rope to a corner fixing using a loop of wire and secure with either 2 ferrules (each crimped twice) or 2 wire rope grips.

5 Hook an opened barrel strainer to other corner fixing and thread the free end of the wire through the eye of the barrel strainer, and pull the rope tight. Secure the looped wire using 2 ferrules (each crimped twice) or 2 wire rope grips.

6 Run 10 m of wire rope through the fixings of one side.

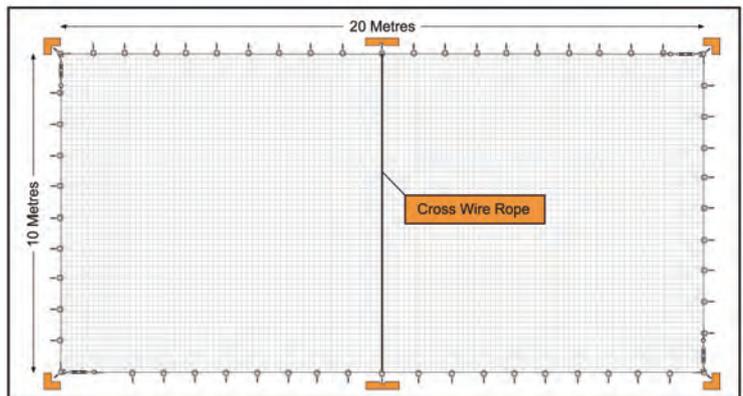

To install the net itself, attach one corner of the net to the corner fixing using the net corner tie.

Hogging every mesh to the wire rope ensuring that the net is pulled tight and is square. Attach the other 3 corners using net corner ties. Trim off any surplus net.

Repeat steps 3 to 6 for the other three sides.

For nets larger than 10 m by 10 m

The only major differences for installing a larger net, is that you will need to install corner fixings every 10 m to spread the weight of the net. You may also need to install additional cross wires to prevent the net from sagging in the middle. e.g. 20 m x 10 m net.

Complex Net Installations

We recognise that some bird net installations are more complex than fixing a square net onto a flat surface. If you are uncomfortable about carrying out a complex installation, we recommend that you contact a professional and experienced bird management company.

OTHER BIRD NETS & LABELLING

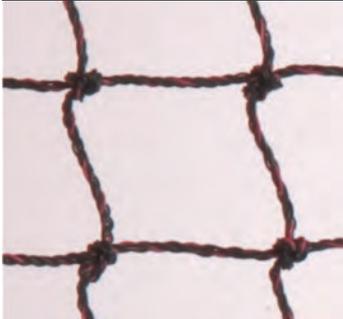

BIRD NET RANGE

The range of mesh sizes available allows protection against all common species of urban bird pest. Choose from a variety of colours (black, stone and translucent) and no-flame to suit most situations. All Bird Nets have the corners marked with ties and the longest side identified with a label for ease of installation.

MESH	SPECIES	COLOURS
19 mm (3/4")	House Sparrow	Black, Stone, Translucent & No-Flame
28 mm (1 1/8")	Starling	Black & Stone
50 mm (2")	Feral Pigeon	Black, Stone, Translucent & No-Flame
75 mm (3")	Herring Gull & Lesser Black-backed Gull	Black

CUT NETS

All cut nets are priced and cut to whole metre sizes. Please review the T&C's information before ordering this product.

As with the Stock nets, the product codes for Cut Nets make it easy for you to order. For cut nets, the code has a prefix of CUT followed by the mesh size, colour and dimensions of net you require (longest side X shortest side).

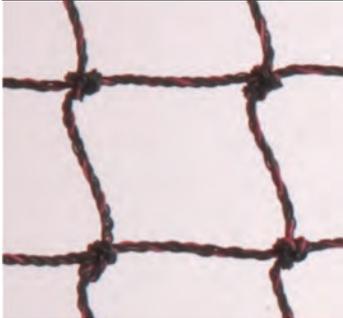

For example: For a Translucent 50 mm net of size 8 m x 7 m the code is: BCUT50T8X7

Please ensure that the size is not too big to handle. We do not advise you to handle a net larger than 900 m².

Minimum net size is 1 m x 1 m, and we are unable to cut nets to less than full metre units.

TO AVOID POSSIBLE ERRORS, PLEASE NOTE THAT WE WILL ONLY ACCEPT ORDERS FOR CUT NETS IN WRITING (VIA E-MAIL).

NO-FLAME NET (19 mm & 50 mm)

Designed to provide a cost-effective and safe solution for bird proofing in areas where people or combustible materials would be at risk, such as over fire escapes, under canopies and in warehouses. There are two main differences between a standard net and a No-Flame Net: whilst a standard net will continue to burn when a flame source is removed and will drop burning pieces of molten plastic; a No-Flame Net shrinks away from a flame reducing the amount of molten debris and minimising fire spread.

No-Flame Bird Net is a knotted polyethylene net made with UV stabilised, flame retarded 12/6 twine that does not absorb water and is chemically inert. It includes a red strand to clearly distinguish it from other nets when bundled but, when correctly installed, this identifier is virtually invisible.

No-Flame Net meets performance specification: BS5867

NET LABEL

NET LABEL: Advertise your net installation with the Bird Net Label. The PVC net label is weather resistant and can be easily hogringed or cable tied onto your installed net. The label can include: Your company name and/or logo, telephone number, website and/or email address.

The label size is 20 cm by 10 cm. Digitally printed to one side in up to four colours with four holes punched in the corners.

Minimum order: 50

Please contact the sales office for a quotation.

NET MAGNETS & CLADDING FIXINGS

NET MAGNETS FOR CABLE

Net Magnets come in handy when drilling or screwing is not an option. These magnets are extremely quick to secure in place and can be useful for following contours of a metal substrate with a wire cable. Use Caution as these are not as strong as screwed fasteners. Holds up to 7 kg.

ORDER CODE	DESCRIPTION	PACK SIZE
BMPT7610	Net Magnet for Cable	10

STAINLESS STEEL PROFESSIONAL INTERMEDIATE CLADDING FIXINGS

Angle Brackets: are fixed in position using Self Drill Screws or Self Tap Screws.

Bonded Washers: are available to provide a watertight seal under the screw.

Self Drill Screws: are installed using the Hex Drive Socket.

The **Multi-Purpose Cable Bracket** is a versatile stainless steel bracket that is screwed into position. Wire rope can be threaded through the hole or supported over the 'hook'. Barrel Strainers can be hooked into the hole if used as a corner fixing on a small net.

The **Stick-on Fixing** can be glued onto cladding, metals, lead flashing and glass. Ensure **Surface Activator** is used to pre-treat the fixings prior to gluing with **Avifix**.

ORDER CODE	DESCRIPTION	PACK SIZE
1: BNET077	Angle Bracket	100
2: BNET099	Net Guides	100
3: BNET126	20 mm Self Drill Screw	100
4: BNET125	25 mm Self Drill Screw	100

10: BNET122	19 mm Self Drill Screw	100
11: BNET121	25 mm Self Drill Screw	100
12: BNET075	Stick-on Fixing, grey	10

BRACKETS & WIRE ROPE

BIRD CONTROL - BRACKETS & WIRE ROPE

STAINLESS STEEL PROFESSIONAL BIRD NET BRACKETS

BNET275 - Pro External Corner Fixings Bracket

When running a straining wire around a corner, it can be difficult getting a fixing close to the corner to prevent damaging the straining wire or the building. This new bracket will help to solve this problem. Thanks to the angle of the hole, this bracket can also be used to fit a wire neatly up an outside corner of a building. Fixing holes 6 mm diameter.

BNET277 - Pro Capital Bracket 45 Degrees

This bracket replaces the original Capital Bracket. The angle of the hole allows the straining wire to be run either vertically or horizontally with the same fixing position of the bracket. Fixing holes 8 mm diameter (will accept BNET123 Dynabolt).

BNET278 - Pro 'Net Off' Slider

The Pro 'Net Off' Slider replaces all four previous 'Net Off's'. It will support straining wire 105 mm to 210 mm from the substrate in places where the net needs to be held away from a protrusion to help prevent abrasion damage to the net. Fixing holes 6 mm diameter. Tighten the nuts with 10 mm spanners.

ORDER CODE	DESCRIPTION	PACK SIZE
1: BNET275	External Corner Fixings Bracket	Each
2: BNET277	Capital Bracket 45 Degrees	Each
3: BNET278	'Net Off' Slider	Each
BNET123	Dynabolt, M6	10
4: BNET282	Internal Corner Bracket	Each

STAINLESS STEEL PROFESSIONAL WIRE ROPE & TENSIONING

2 mm diameter Wire Rope is appropriate for the majority of nets. The Wire Rope allows good flexibility. M6 Barrel Strainers are suitable for most nets. 2.5 mm Copper Ferrules should be used with stainless steel wire. Wire Rope Grips can be used as an alternative to ferrules.

ORDER CODE	DESCRIPTION	PACK SIZE
BNET308	Wire Rope, 2 mm diameter	50 m
1: BNET008	Wire Rope, 2 mm diameter	200 m
2: BNET316A	Barrel Strainer, M6	Each

WIRE ROPE & CORNER FIXINGS

STAINLESS STEEL & GALVANISED WIRE ROPE CORNER FIXINGS < 5 m

For runs of wire less than 5 meters between Corner Fixings. All products are Stainless Steel unless stated otherwise.

ORDER CODE	DESCRIPTION	PACK SIZE
1: BNET149	Wire Rope, 1.2 mm dia. (Light Duty)	100 m
2: BNET073	Ferrules, 1.5 mm diameter	100 m
3: BNET305	Barrel Strainer, M4	Each
4: BNET314	Pro Barrel Strainer, M5	Each
5: BNET313-10	Barrel Strainer, M5 (Galvanised Steel)	10

STAINLESS STEEL PROFESSIONAL WIRE ROPE CORNER FIXINGS >10 m / EXPOSED HORIZONTAL NET >20 m

In some circumstances where the length of wire rope exceeds 10 m or for exposed horizontal net greater than 20 m, it may not be feasible to fit a corner fixing in the middle of the wire rope span. Therefore it is important that you choose the fixings and wire rope that are strong enough to hold the weight of the net.

ORDER CODE	DESCRIPTION	PACK SIZE
1: BNET089	Wire Rope, 3 mm diameter	100 m
2: BNET326	Barrel Strainer, M8	Each
3: BNET018	Wire Rope Grip	10

GALVANISED STEEL PROFESSIONAL WIRE ROPE CORNER FIXINGS >10 m / EXPOSED HORIZONTAL NET >20 m

As above but manufactured from Galvanised Steel.

ORDER CODE	DESCRIPTION	PACK SIZE

5: BNET330-10	Barrel Strainer, M8	10
6: BNET335-20	Wire Rope Grip	20
BNET049	Nut Spinner	1

WIRE REEL HOLDER

The Wire Reel Holder has been specifically designed to hold wire rope reels for bird work. It allows you to pull off the wire as required to help avoid wire tangling or reels rolling away. The reel simply drops on to the centre spindle, and the retaining pin clips in place to hold it on. This handy tool can save you a lot of installation time and frustration.

ORDER CODE	DESCRIPTION	PACK SIZE
BNET208	Wire Reel Holder	Each

ROOF NET FIXINGS

STAINLESS STEEL PROFESSIONAL

ROOF CORNER & INTERMEDIATE BRACKETS

These sturdy stainless steel Dormer Brackets are designed to look acceptable above dormer windows on private houses, but they can also be used in a variety of other situations, such as on parapet walls. Pigeon and Gull brackets are available, and Dynabolts should be used to secure the brackets in place.

ORDER CODE	DESCRIPTION	PACK SIZE
BNET270	Corner Bracket, Pigeon, 240 mm	Each
BNET271	Intermediate Bracket Pigeon, 240 mm	Each
1: BNET272	Corner Bracket, Gull, 360 mm	Each
2: BNET273	Intermediate Bracket, Gull, 360 mm	10
3: BNET123	Pro Dynabolt, M6	Each

STAINLESS STEEL PROFESSIONAL

ROOF INTERMEDIATE FIXINGS

Stainless steel Roof Spikes are designed to hold the wire rope above roof ridges. These spikes are hammered through the mortar between the ridge tiles into the wooden joist below. The rod is 520 mm in length, 10 mm in diameter, with a 3 mm hole in the top for the straining wire. The holes can be weatherproofed with a Roof Spike Seal and glued in place with Avifix. The Two Way Slate Bracket slips between adjoining slates to hold the wire rope close to the surface of the roof. It is designed to allow the wires to be attached horizontally or vertically.

ORDER CODE	DESCRIPTION	PACK SIZE
1: BNET190	Roof Spike, 520 mm	Each
2: BNET274	Two Way Slate Bracket	10

STAINLESS STEEL PROFESSIONAL

ROOF RIDGE FIXINGS

This Bracket holds the straining wire above a roof ridge. Half-Round Ridge Brackets rods on the brackets are 450 mm in height. Half-Round Brackets are designed to clamp under the edge of the ridge tiles.

ORDER CODE	DESCRIPTION	PACK SIZE
BNET183	Half-Round Ridge Net Bracket	Each

ROOF NET FIXINGS

ROOF INTERMEDIATE FIXINGS

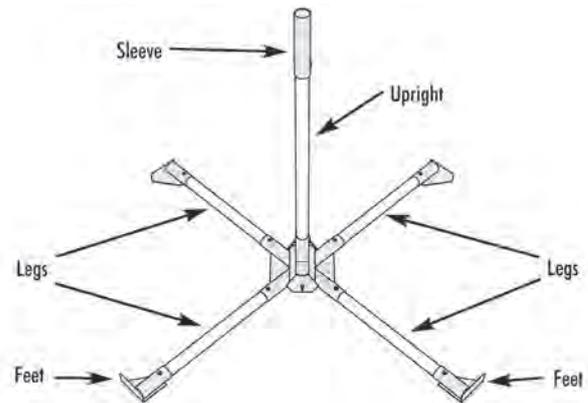

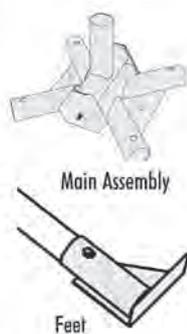

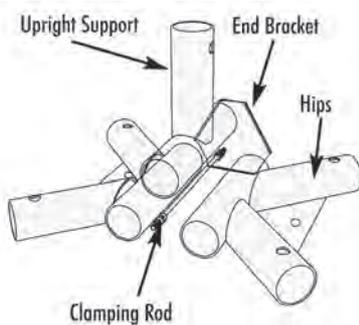

Increasingly, large roofs are being proofed to protect against pigeons and gulls. In most circumstances, it is not feasible to drill into the roof itself, so net supports that can be weighted down are required. As no two roofs are the same, the supports need to be adaptable to fit different roof shapes, angles and obstacles.

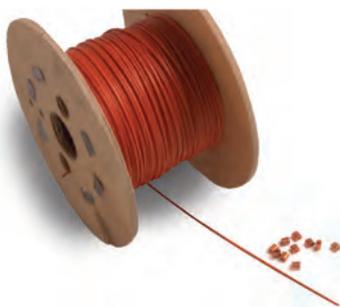

The patented Roof Mount far exceeds these criteria. It is light-weight, very easy to handle, extremely versatile and allows fast installation.

ORDER CODE	DESCRIPTION	PACK SIZE
BNET950	Roof Mount Base Includes: Includes: 1 x Main assembly (2x hips 1 upright support, 2x end caps, 1 clamping rod) 4x Feet & 10 x 19mm self drill screws	Each
BNET951	Roof Mount Legs Includes: 4x Legs (0.55 m)	Each
BNET952	Roof Mount 1 m Upright Includes: 1x 1m Pole & 1x Sleeve	Each
BNET953	Roof Mount 2 m Upright Includes: 1x 2 m Pole & 1x Sleeve	Each
BNET960	For Standing Seam Ridges	Each

GULL PARALLEL WIRE ROOF SYSTEMS

An alternative to a roof net installation for gulls is to use the same brackets and same perimeter straining wire as for a net installation, but to fit a series of parallel orange coated 1.2 mm wires instead of a net.

ORDER CODE	DESCRIPTION	PACK SIZE
BNET926	Wire Rope, 1.2 mm orange	100 m
BNET321-100	Copper Ferrules, 2.5 mm diameter	100

NET CLIPS, ZIPS & STAPLES

NET CLIPS

Bird Net Clips are made from stainless steel, blend well into the net and are easy to install. Sometimes access is required through netting for maintenance or cleaning.

To help other contractors carry out this work, access systems can be installed into the net at appropriate points.

ORDER CODE	DESCRIPTION	NET MESH	PACK SIZE
BNET167	Net clips, small	19 mm	100
BNET169	Net clips, large	50 mm	100

NET ZIPS

Bird Net Zips are made entirely of non-corroding materials and are very robust. They are easier to open and close than net clips, but are more noticeable in the net. They are available in two sizes: No. 10 size for 19 mm and 50 mm mesh net and No. 5 size for 28 mm mesh net. The zips can be stitched into the net with repair twine, or they can be hog-ringed in.

ORDER CODE	DESCRIPTION	NET MESH	PACK SIZE

BIRD SPIKE CLIPS

AVICLIPS FOR GUTTERS

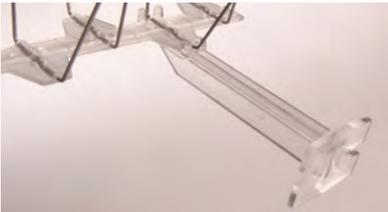

Aviclips for Gutters fit securely onto the base of Avipoint™ P14, P20, P32 and G20 Bird Spikes. The Aviclips for Gutters allows the spike strips to be clipped onto the side of a wide variety of different types of gutters, allowing free flow of water underneath. Two clips are required per Avipoint™ strip.

Aviclips for Lipped Gutters fit securely onto the base of Avipoint™ P14, P20, P32 and G20 Bird Spikes. They allow the spike strips to be clipped onto the side of a variety of lipped gutters, including many international style gutters, allowing free flow of water underneath. Two clips are required per Avipoint™ strip.

ORDER CODE	DESCRIPTION	PACK SIZE

BAVI163	Aviclips for Lipped Gutters	10

AVICLIPS FOR WINDOWS

Aviclips for Windows fit securely onto the base of Avipoint™ P20, P32 and G20 Bird Spikes. They allow the spike strips to be easily secured onto window frames using Avifix White adhesive or screws. These clips are extremely useful as they allow the spikes to protect the window sill without hindering the operation of the window. Two clips are required per Avipoint™ strip.

ORDER CODE	DESCRIPTION	PACK SIZE
BAVI171	Aviclips for Windows	10

AVICLIPS FOR BEAMS

Aviclips for Beams fit securely onto the base of Avipoint™ P14, P20, P32 and G20 bird spikes. They allow the spike strips to be clipped onto beams up to 35 mm thick and 40 mm to 230 mm deep. The clips should be used where you cannot glue the Avipoint™ Bird Spikes onto the Beam. The clips and attached spikes can be removed if access to the beam is required for maintenance, cleaning or painting. Two clips are required per Avipoint™ strip.

ORDER CODE	DESCRIPTION	PACK SIZE
BAVI181	Aviclips for Beams	10

AVICLIPS FOR SOLAR PANELS

Designed to fit both solar panels and roof ridges it is easily glued or screwed in to place. Avipoint clips securely into place and is compatible with P14 and P20, P32 & G20.

Made from a UV stable polycarbonate material which is compatible with 90°, 105° and 125° roof tiles and compatible with both 45° and 37.5° solar panels.

SURFACE PREPARATION

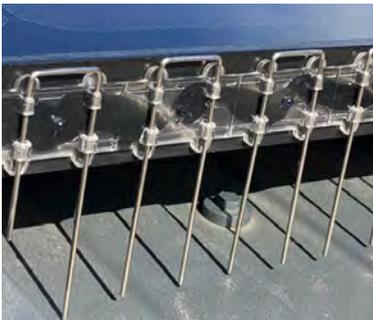

BIRD STOPPER

The SnapFast BirdStopper is an easy to fit and effective solution for preventing birds from accessing the underside of solar panels. The unique clip-on solution allows the pest controller to pre-cut the desired lengths, then simply clip the product into place. This minimizes the amount of time the pest controllers needs to spend working from heights - no more cutting and screwing whilst on the rooftops. Unlike some other solutions, it is also easy to remove and re-attach which allows easy access for maintenance of the panels. Made from sturdy recycled plastic.

ORDER CODE	DESCRIPTION	PACK SIZE

BBIRCORN	Bird Stopper Corners	8
BBIRBRAC	Bird Stopper Metal Brackets	12

NEW SOLARGUARD SOLAR PANEL PROOFING

Solar panels are being installed on the roofs of commercial and residential properties across the United Kingdom. While they're great places to raise pigeons, the acidic faeces from bird's guano can cause gutter blockages and damage to the arrays themselves. SolarGuard does not use mechanical fixings to attach the solar panels to the roof to avoid warranty issues. This product is the best option for solar panels without a lip on the underside for the traditional solar mesh and clip system. 160mm and 210mm adjustable spike lengths can be trimmed for a clean straight edge. You will get two 500mm lengths per metre. Avisil adhesive can be used to attach the system to the side of your solar panels. It's easy to install, apply silicone directly to the surface, and then cut or adjust the pins as needed. The roof, wiring, and equipment in solar arrays are all protected from damage by this ground-breaking system.

ORDER CODE	DESCRIPTION	PACK SIZE
BSOLARPR	Solar Panel Proofing	1 x 1 Metre

SURFACE PREPARATION

Primer 150 - For treatment of porous surfaces, such as sandstone, prior to gluing on AVIPOINT.™

Surface Activator - Surface Activator is a cleaner, degreaser and primer all-in-one. It will activate non-porous surfaces such as plastics, coatings and metals for improved adhesion of Avisil and Avifix adhesive. You will not require our Surface Cleaner if you are using Surface Activator.

GUANAWAY & GUANAWAY RTU

BUY 3
RTU
GET 1
FREE
25% OFF

Disinfectant and cleaner. Contains didecyldimethylammonium chloride for use with the cleaning up of bird waste. Unlike other products, Guanaway is a powerful alkaline cleaner degreaser that neutralises the acidic by-product associated with bird droppings. This reduces the corrosion to the stonework and increases safety by removing the slippery, greasy waste. Also available as a handy RTU trigger spray version ideal for those small jobs when making up a full sprayer isn't justified. Ideal for disinfecting traffic lights, won't discolour plastic.

PIGEON BIRD WIRE & POSTS

DRILLED RODS

Drilled Rods are used for horizontal installation to protect wide ledges. They are installed above the ledge you are proofing and can carry a number of wires.

ORDER CODE	DESCRIPTION	PACK SIZE
1: BBIR015	295 mm x 6 mm (4 holes)	10
2: BBIR027	360 mm x 6 mm (5 holes)	10
3: BBIR170	490 mm x 6 mm (7 holes)	10

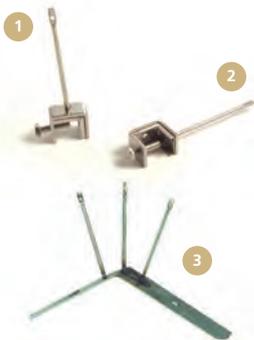

STICK-ON BIRD POSTS

Stick-on Bird Posts are used on metal flashing, cladding and other areas where you are unable to drill. The posts are mounted in a nylon base which can be glued or screwed into place.

ORDER CODE	DESCRIPTION	PACK SIZE
1: BBIR024	Bird Posts, 95 mm x 4 mm	100
2: BBIR033	Bird Posts, 125 mm x 4 mm	100
3: BBIR007	Stick-on Plastic Base, grey	10
4: BBIR008	Stick-on Post with base, 95 mm	10
5: BBIR006	Stick-on Post with base, 125 mm	10

CLAMPS AND BRACKETS

Gutter Posts are for clamping Bird Wire onto vertical flanges and gutters. The Beam Clamps are designed for horizontal flanges, girders and beams. Triangular and Half-Round Ridge Brackets are used to proof roof ridges with Bird Wire. Both can be secured with Blind Anchor Rivets and Avifix.

ORDER CODE	DESCRIPTION	PACK SIZE
1: BBIR019	Gutter Post 95 mm x 4 mm	10
2: BBIR026	Beam Clamp & Post 95 mm x 4 mm	10
3: BBIR042	Triangular Ridge Bracket 3 posts	Each
BBIR043	Half-Round Ridge Bracket 3 posts	Each

SPRINGS, CRIMPS AND TOOLS

Bird Wire Springs are made from stainless steel, and Crimps from nickel plated copper.

ORDER CODE	DESCRIPTION	PACK SIZE
1: BBIR009	Birdwire Standard Spring	100
2: BBIR040	Birdwire Micro Spring	100
3: BBIR012	Birdwire Crimps	100
4: BBIR018	Birdwire Crimp & Cutter Tool	Each

PIGEON / GULL BIRD WIRE & POSTS

RAIL CLAMPS

Rail Clamps a popular way of supporting Bird Wire on rails and pipes. These new two-part Rail Clamps and Rail Clamp Posts allow more functionality: You can fasten the clamp tightening screw in any position that best suits the installation; the Rail Clamp Posts can be used separately for installation onto cladding by screwing in place through the 5 mm fixing hole in the base.

ORDER CODE	DESCRIPTION	PACK SIZE
BBIR171	Pigeon Rail Clamp post	10
BBIR172	Gull Rail Clamp post	10
BBIR174	Rail Clamp, 45 - 60 mm dia.	10
BNET049	7 mm Nut Spinner	Each

GULL WIRE, SPRINGS AND CRIMPS

The same basic principals as for pigeons are followed for Gulls, but heavier-duty components are required.

ORDER CODE	DESCRIPTION	PACK SIZE
BNET087	Gullwire, 0.96 mm diameter	200 m
BBIR040	Birdwire Micro Spring	100
BNET079	Ferrules, Copper, 1 mm (for 0.96 mm wire)	100

GULL POSTS AND FIXINGS

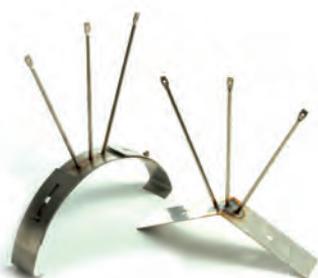

For Black Headed Gulls use the 180 mm x 4 mm Gull Posts.

ORDER CODE	DESCRIPTION	PACK SIZE
BBIR035	Gull Posts, 180 mm x 4 mm	100
BBIR013	Split Pin, stainless steel, 25 mm	100
BBIR010	Anchor Rivets, grey, 25 mm	100
BBIR311-100	Anchor Rivets, grey, 38 mm	100
BBIR314-100	Split Pin, stainless steel, 38 mm	100

GULL RIDGE BRACKETS

Both brackets have three Gull posts attached.

AVISHOCK ENERGISERS, TRACK & CONNECTORS

ENERGISERS

SMALL

The Energiser sends a pulse of electricity along the Avishock™ track every 1.3 seconds. The pulse lasts only a fraction of a second and is indicated by a quiet click and a small flashing light. The energisers are powered simply by plugging them into a power socket.

For added safety, all energisers are supplied with a detachable lead so it can be removed when the system is being worked on. Energisers must be installed in an upright position.

The Small Energiser is designed for a run of Flex-Track up to 150 m. The Large Energiser is designed for Flex-Track runs between 150 m and 300 m.

The Small Energiser is designed for a run of Flex-Track up to 150 m.

The Large Energiser is designed for Flex-Track runs between 150 m and 300 m.

AVISHOCK LEAD WIRE & SEALANTS

LEAD WIRE & WIRE GUIDES

Lead wire is supplied in 20 m reels and is available in two colours to compliment your track choice. The heavy insulated copper, is east to cut, strip and crimp. A choice of wire guides is available for different applications. Wire guides hold the wire in place, creating a neat and visible installation.

Quick guide - Lead Wire: Is used to transfer power from an Energiser to the track or from one section of track to another- Screw in wire guides: Easily secured using a self-tap screw, these guides are lower profile so more discreet and are ideal for installations on stone.

ORDER CODE	DESCRIPTION	PACK SIZE
BSHK112	Lead Wire, Black	20 m
BSHK031	Wire Guides, Screw-in	100

AVISIL & AVIFIX HIGH TACK

AVISIL

For use with a caulking gun, this is a professional product that cannot be found in DIY shops. Avisil is vastly superior to ordinary clear DIY silicone due to it's ease of application, it stays permanently elastic after curing, Avisil has a high temperature resistance and UV resistance. A clear, high quality, neutral-curing silicone adhesive, Avisil is recommended for use where the surface is dry. It offers excellent adhesion on most building materials. One tube (310 ml) of Avisil can install up to 15 m of Avipoint Bird.

AVIFIX HIGH TACK

For use with a caulking gun, this is a professional product that is superior to general purpose high tack adhesives, found in DIY shops. This is due to it's flexible elastic rubber movement, which accommodates up to 20 %, and because it gives primerless adhesion even on damp surfaces. A multipurpose, high tack adhesive. Avifix "High Tack" can be used for fixing AVIPOINT™ Bird Spikes where the surface is damp. It offers outstanding initial grab and excellent adhesion on most building materials such as brick, stone, metal, glass, wood, PVC, GRP and nylon.

The Digital Voltage Tester is required to ensure that the system is sending the correct amount of electricity. Solid connections are a must for a long-lasting installation. - Use the middle setting (1.5-2 mm) (Blue) of the Connector Crimp Tool to deliver the perfect crimp. The Wire Stripping Tool easily strips lead wires. Use the 2.6 mm setting and strip 10 mm from the end of the lead wire. - Avishock™ Track Shears are a valuable tool for cutting the Avishock™ track and lead wire.

Warning signs should be positioned wherever a person may gain access to the system or at 5 m intervals on an open wall. Hard wearing rigid Warning Plates can be glued or screwed to the ledge or side of the building. Double sided Window Warning Stickers should be stuck onto a window if the sill or ledge associated to it is protected with AVISHOCK.

BMIS075	Sparrow 25 mm x 12.5 mm	6 m
BNET057	Weld Mesh Clips, 5 mm hole	50

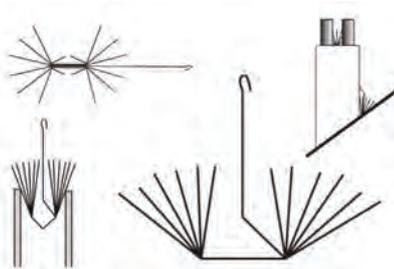

SOLAR PANEL MESH & CLIPS

This innovative system is designed specifically to keep all creatures from getting under solar arrays, protecting the roof, wiring and equipment from their damage. This non-penetrating system is fast and easy to install, and can be removed for service. The Solar Mesh Clips are recommended every 18 inches. Tin Snips and other basic tools required for Installation.

ORDER CODE	DESCRIPTION	PACK SIZE
BSLRMESH	50 ft x 8 inch Mesh	15 m
BSLRCP10	Solar Clips	10

CHIMNEY SPIKE

Heavy-duty spike designed to prevent seagulls from nesting in small areas on roofs. Made from 3 mm stainless steel rods, it can be bent in place to protect areas such as chimney pots, between the slope of a roof and the chimney stack. Recommended to be used in conjunction with Avipoint G20 Bird Spikes. Supplied flat packed.

ORDER CODE	DESCRIPTION	PACK SIZE
BCHI001	Chimney Spike	Each

CHIMNEY GUARD

The Chimney Guard is a device designed to keep birds from landing on chimney pots. Made from black painted mild steel, the Chimney Guard will fit most standard size chimney pots. For roof work, we also supply the Ladder Stopper that prevents a ladder from slipping on any surface and the Ladder Clamp that secures your ladder on the top of your vehicle for transportation.

BIRD PROOFING & TRAPS

DADDI LONG LEGS

This system has a freely rotating head with long stainless steel wires that bounce in the wind or when birds contact it. This not only irritates the birds, but also interferes with their attempts to land or take off. The device can be screwed in place through the 3 mounting holes. If it is to be glued in place the Plastic Stick-on-Base (BDAD005) will be required.

ORDER CODE	DESCRIPTION	PACK SIZE
BDAD001	1.25 m diameter Daddi Long Legs	Each
BDAD002	2.5 m diameter Daddi Long Legs	Each
BDAD005	DLL Plastic Stick-on-Base (inc. 3 screws)	Each

PRICKLER STRIP

Mainly used on top of garden walls and fences to protect against cats. It has also been used successfully against light pressure pigeon infestations in areas where height is restricted and for short-term problems on window sills where crows are perching.

ORDER CODE	DESCRIPTION	PACK SIZE
BMIS003	Prickler Strip (46 cm x 5 cm)	Each

PIGEON TRAPS

All pigeon traps are flat packed and easy to assemble. When assembled, the dimensions are 1 m x 60 cm x 30 cm. Two sets of 'bob-wire' entrances are supplied as standard in all the traps. If required, these can be replaced with ground funnel entrances, available as an optional extra.

ORDER CODE	DESCRIPTION	PACK SIZE
BTRA029	Feral Pigeon Trap with floor	Each
BTRA050	'Foldaway' Feral Pigeon Trap no base	Each
BTRA031	Ground Funnels	Pair

SPARROW TRAPS

This is a rigid multi-catch trap with two one-way entrance tunnels leading to a trapping section. From here a further one-way entrance tunnel leads to the holding section. Dimensions: 62 cm x 35 cm x 22 cm

FOGGERS

NEW

COMMANDER TRI-JET FOGGING MACHINE

The Commander Tri-Jet Fogger is suitable for chemical fogging (using pesticides, sanitisers etc.) and can also be used for humidifying.

With adjustable particle size and discharge rate, the Tri-Jet can mist up to 9 metres in any direction indoors or outdoors. Also ideal for deodorising smoke contaminated buildings, and the fine fog can be used to penetrate porous materials. Pest control, odour control, and disinfection or sanitising are just a few of the many uses for this product.

Aluminium housing, fuel and oil resistant vinyl tubing, and brass control valves and fittings round out this sturdy apparatus.

The Tri-Jet is CE approved and can be used with water and oil-based liquids.

Each

ORDER CODE: BTRIJETF

NEW

FOGMASTER JUNIOR

Fogmaster Jr. is a compact, general usage ULV fogger with a wide variety of applications, from removing unpleasant odours and moulds from indoor places to applying water & oil-based insecticides. As the manufacturer states, this fogger is for those jobs for which an industrial fogger is too large and a hand sprayer is too small. This fogger comes with a UK plug.

Each

ORDER CODE: BFOGJUNI

DYNA-FOG HURRICANE

ULV/misting electric portable aerosol applicator, dispenses both OIL and WATER-BASED liquids. Adjustable output up to 19 litres/h. Available with tank float valve for continuous operation. Particle size: 5-50 microns (mmD). Tank capacity: 3.8 L. Weight: 3 Kg. Metering valve to control output and droplet size.

Each

ORDER CODE: BFUDYHU2

B & G MODEL 2600 FOGGER (240V)

A robust plastic fogging machine with directional hose and flow adjustment knob. 110 volt option also available.

Each-18" Hose

ORDER CODE: BFOBG262

Each-48" Hose

ORDER CODE: BFOBGR61

DYNAFOG CYCLONE - ULV FLEX HOSE

18" flexible hose with adjustable nozzle. Suitable for hard-to-reach areas.
Tank capacity: 3.8 L. Weight (empty): 4.8 Kg.

For similar unit with higher tank capacity see Dynafog Tornado.

Each

ORDER CODE: BFODYCFH

DYNAFOG TORNADO ULV

Multi-range adjustment allows flow range from 19 litre per hour down to ULV range.
Ideal for humidity and pest control in warehouses/greenhouses etc.
Tank capacity: 11.4 L. Weight (empty): 9.1 Kg.

Each

ORDER CODE: BFOTO240

DYNAFOG CYCLONE ULV

The Cyclone ULV Ultra-precision meters particles under 20 microns at any flow rate and viscosity. Ideal for pest control in Warehouses/greenhouses etc.
Tank Capacity: 3.8 L. Weight (empty): 4.25 Kg. 110 volt option available.

Each

ORDER CODE: BFODYCY2

IGEBA NEBULO

Manufactured from strong durable resistant thermoplastics. Powerful electric motor producing greater aerosol volume, at higher velocity, with deeper penetration. More uniform droplet spectrum. Droplet size can be regulated by increasing or decreasing the solution flow.

KNAPSACK SPRAYERS

BIRCHMEIER RPD 15 SPRAYER

10 Litre

ORDER CODE: BSPBIRPD

The backpack sprayer has a new designed external pump which is integrated directly into the RPD's 15 pump lever. The results is an easy to use and quick to clean sprayer. The new hose positioning is also a lot handier. Also includes a non-drip piston pump. Can be used with the XL8 extension.

BIRCHMEIER REC ELECTRIC KNAPSACK

Each

ORDER CODE: BSPBIREC

Battery-operated backpack sprayer with completely new concept of controlling the pressure by electronics providing options for the user. You operate pressure at the nozzle, which is adjusted with an application controller. Complete with 0.5-6 bar pressure for an optimised spray pattern. Can be used with the XL8 extension.

XL8 EXTENSION

Each

ORDER CODE: BDR5EX8M

Spay Nozzle Extension

ORDER CODE: BDR5EX8N

The XL8 8 metre extension lance is a lightweight telescopic extension lance that extends from 1.5 m to 8 m, allowing easier treatment of hard to reach areas. The end of the extension lance has a flexible hi-viz tip allowing the operator to bend it to the required angle and easily see the tip. The extra reach eliminates the need for costly access equipment. The extension lance stores into a 1.3 m long protective case and has an overall weight of 1.5 Kg.

MINI FLEX EXTENSION

Each

ORDER CODE: BDR5MFEX

The 50 cm Mini Flex Extension can be manoeuvred into various angles for ease of application. Can be used with Birchmeier sprayers and dusters by connecting to the trigger or lance.

DR5 PROFESSIONAL POWDER DUSTER

A 5 litre tank that holds approximately 3-4 Kg of insecticide powder/dust. It works at a maximum operating pressure of three bar. Other features include pressure relief valve and air valve.

Each

ORDER CODE: BSPBIDU5

DR5 SUPPORT BRACKET & HANDLE

DUSTERS

NEW

AR8 PRO TELESCOPIC DUSTING LANCE

A new telescopic dusting lance with a working height of 8 m. An easy to fill 1-litre stainless steel pressure tank with a regular stirrup pump (approximately 9 pump actions = 3 bar). A 35 cm flexible nozzle allows for precise application. Can also be inflated with a battery-powered car tyre pump. All service parts and conversion kits are available on request.

Product Details:

- Long and light for precise height dusting.
- Lance height adjustable from 2 to 8 m.
- Suitable for treating wasp nests in roofs and eaves of houses when applied from outside.
- Elimination of ladder use reduces the need for access equipment and the risk of injury.
- Reduces sting risk when treating large or difficult nests.
- Easy to assemble.

MOTION CAMERAS

NEW

REOLINK GO PLUS

Reolink Go Plus works anywhere, anytime! Reolink Go Plus is a 100% wireless motion detector camera operating on 3G and 4G-LTE networks. An ideal video monitoring solution capable of reporting rodent activity in real-time. No cords, no wiring hassles, and does not depend on access to an active WIFI network to operate.

All live & captured footage can be viewed on the dedicated Reolink app at no extra cost - no sign-up fees or membership required.

The PIR sensor is capable of detecting rodent movement (in tested conditions of between 2-4 metres) 24/7 and then alert the user of any triggers. Ideal for use in the pest control industry for tasks such as live trapping, protecting sensitive areas or areas where further investigation is required to establish where rodents are gaining access or frequently visit.

Key features:

- Instant email alerts and push notifications
- Battery/Solar powered (7800mAh rechargeable battery included - solar charging panel is available on request & sold separately)
- Operates using 3G or 4G-LTE SIM card network (recommend using Vodafone Smart cards - available separately)
- Weatherproof up to IP65 rating
- 2560 x 1440 (4 megapixel) at 15 frames p/sec
- Starlight night vision
- No membership fees to access Reolink app
- Low operating costs
- Can be deployed across multiple jobs or sites as required (no WIFI required)
- Saves you time & money from having to complete physical inspections

CHEMICAL SPILLAGE KITS

VAN SPILLAGE KIT

A quality spill kit with an economical clear outer. Great for absorbing oil, fuel & mild chemical spills up to 20 litre Ideal to keep in the van, cab, garage, warehouse, site or depot.

Each

ORDER CODE: BBIP0120

CHEMICAL STORE SPILLAGE KIT

Covers up to 15 litre spillages of hazardous liquids. The kit contains ten large chemical absorbent pads, two chemical absorbent socks, one instruction sheet and two disposal carry bags & ties. Every chemical store should have one.

Each

ORDER CODE: BBIP0123

POLVO POWDER

Polvo comes as a super-absorbent powder for any spillages (from insecticides to paint to 'body fluids') - ideal for the van, stores or even as a sell-on. Polvo Powder is an inert mineral, and due to its extremely fine granular structure, it completely absorbs the spill within itself. The spill is prevented from spreading and is absorbed to a point that it can be cleaned up leaving a slip-free surface that is residue-free.

1 x 3 Litre

WEPALM HAND SANITISER DISPENSER & REFILL POUCH

Use our cost effective top up system & save money and time! WePalm hand sanitiser comes in easy to store, easy refill pouches. Made with a synergistic blend of detergents to provide a mild but thorough cleaning and sanitising action. With its skin friendly sanitising, cleaning and moisturising action, it allows constant use in catering/kitchen areas, hospitals, nursing homes and can be mounted inside a pest control vehicle for ease of action & access. Once dispensed, produces a pre-lathered foam. The spread-ability of the foam increases the cleaning and disinfecting performance, getting to areas such as in-between the fingers where bacteria hide. Used in conjunction with our pump action dispenser that does not rely on battery operation to provide further cost savings. Complies to BS EN 13727, 13624, & 14476. BPR compliant

FREE
25% OFF**

Disinfectant and cleaner for use with the cleaning up bird waste, kills fungi associated with bird droppings. Unlike other products, Guanaway is a powerful alkaline cleaner degreaser that neutralises the acidic by-product associated with bird droppings. This reduces the damage to the stonework and increases safety by removing the slippery, greasy waste. Also available as a handy RTU trigger spray version ideal for those small jobs when making up a full sprayer isn't justified. Ideal for disinfecting traffic lights, as it won't discolour plastic.

COSHH & PPE REGULATIONS

A GUIDE TO THE BARRETTINE RANGE OF PERSONAL PROTECTIVE EQUIPMENT COSHH AND PPE REGULATIONS

The COSHH Regulations 2002, as amended in 2003 and 2004 are a key part of health and safety at work. The regulations place a legal requirement on all employers and operators including self-employed people to undertake an assessment of the risks created by exposure to any substances hazardous to health. The risk assessment shall include consideration of the hazardous properties of the substance, manufacturers information contained in any material safety data sheet, the level and type of duration of exposure, working circumstances and other factors relating to exposure limits, control measures etc.

The COSHH amendment Regulation 2004 which came into force on 1st April 2005. It introduced a new framework of adequate control of exposure by specifying principles of good practice (Schedule 2A) and by replacing occupational exposure standards (OES's) and Maximum Exposure levels (MEL's) with workplace exposure limits (WEL's).

The Personal Protective Equipment Regulations 1992 require that where PPE is issued it must be suitable for the task for which it is required, and it must take into account the demands it places on the worker. It must be maintained in good condition and stored when not in use in a clean cabinet or container.

What does this mean to you?

The provisions make the duty holders focus on applying principles of good practice to controlling exposure rather than compliance with any OEL. (Schedule 2A)

This has the effect of bringing into the definition of adequate control all substances within the scope of the COSHH regulations, irrespective of whether they have an OEL, and all routes of exposure i.e. inhalation, absorption and ingestion and injection. It is now accepted that it is not possible to give a "Safe limit" as before because in practice a guarantee for health protection for all individuals, even if exposure is below a specified limit, is not scientifically secure.

The revised system of WEL's will be set by the advisory committee on toxic substances (ACTS). These are listed in a publication EH40-2005. There is a specific WEL values in Table 1 for all substances. The WEL value is a limit that must not be exceeded and there is a duty, similar to the previous regulations, to ensure adequate control and to reduce exposure as far as possible.

The amendments to COSHH should make it easier for enforcers and duty holders to determine whether exposures to substances are adequately controlled and proportionate to the risk.

As part of the Barrettine professional services, we have available qualified COSHH Consultants who are able, on a fee basis, to undertake COSHH Assessments and preparation of COSHH documentation for our customers, as well as being able to define the personal protective equipment required in the specific situations encountered by our customers. In addition we are happy for our staff to offer advice, at no charge, on the level of protection required in applying and using any of the PPE which we offer as part of our Technical Sales Service to our customers.

Schedule 2A

Principles of good practice for the control of exposure to substances hazardous to health.

The eight principles of good practice for the control of exposure to substances hazardous to health are set out in Schedule 2A of The Control of Substances Hazardous to Health Regulations 2002 (as amended). Approved Code of Practice and guidance .

The principles are reproduced below:

- (A) Design and operate processes and activities to minimise emission, release and spread of substances hazardous to health;
- (B) Take into account all relevant routes of exposure - inhalation, skin absorption and ingestion - when developing control measures;
- (C) Control exposure by measures that are proportionate to health risk;
- (D) Choose the most effective and reliable control options which minimise the escape and spread of substances hazardous to health;
- (E) Where adequate control of exposure cannot be achieved by other means, provide, in combination with other control measures, suitable personal protective equipment;
- (F) Check and review regularly all elements of control measures for their continuing effectiveness;
- (G) Inform and train all employees on the hazards and risks from the substances with which they work and the use of control measures developed to minimise the risk;
- (H) Ensure that the introduction of control measures does not increase the overall risk to health and safety. If employers apply the principles correctly, exposure should be below any relevant WEL. Control by personal protective equipment should only be used when other measures are not reasonably practicable. The list of WEL's applies to concentrations of hazardous substances breathed in by the worker and are used to determine the adequacy of control measures. There are several publications, which give advice and guidance on what is required under the COSHH Regulations.

Regulation 7 COSHH 2002. Fit Testing of Facepieces

The performance of RPE with a tight-fitting facepiece (filtering facepieces, half and full full-face masks) depend on a good contact between the wearer's skin and the face seal of the mask. A good face seal can only be achieved if the wearer is clean-shaven in the region of the seal and the facepiece is the correct size and shape to fit the wearer's face. Employers should ensure that the selected facepiece (tight and loose fitting types) is of the right size and can correctly fit each wearer. For a tight-fitting facepiece (filtering facepieces usually known as disposable masks, half and full face masks) the initial selection should include fit testing to ensure the wearer has the correct device. Barrettine can advise customers about this requirement.

WHY CHOOSE BARRETTINE?

WHY CHOOSE BARRETTINE AS YOUR PREFERRED SUPPLIER?

QUALITY PRODUCTS

As well as working directly with the key major Biocide Manufacturers, Barrettine manufacture and source a fantastic wide range of products, many of which are award-winning, helping you and your business to stay ahead.

Discretion is key. We're not your competitor!

Unlike some other distributors we are careful how and where product prices are displayed.

Our products are only sold to qualified Pest control Companies/ Technicians or recognised distributors with appropriate facilities.

TECHNICAL SUPPORT, PRODUCT STEWARDSHIP, REGULATORY & LEGISLATIVE UPDATES.

Professional products are only sold onto qualified/competent personnel that can demonstrate they have the required training and qualifications.

QUALIFIED STAFF

Barrettine at the heart of our Industry, constantly update Customers with the ever-changing regulatory & legislative issues we must implement. A number of Barrettine staff represent the company and the Industry within a number of independent bodies and organisations such as the BPCA, NPATA & CRRU.

TRAINING

Barrettine is a Lantra approved Training provider have put together a number of excellent, independent and recognised training courses to help support your business, your staff & colleagues. Contact the Sales office for further information.

FREE INSECT ID

From an independent industry-leading entomologist, quick and easy and free to our Customers.

LICENSED WASTE TAKE BACK SCHEME
