

There's A Better Way.

Historically, mattress encasements were designed as a reactive, crisis management tool after an outbreak.

We're here to change all of that.

We want to teach you how to position yourself as their preemptive pest management expert. Transition your service fees from reactive labor to routine reliable inspection services.

CleanRest PRO mattress and box spring encasements are the only encasements that feature a 10-year no-rip guarantee and patented features, making installation more efficient, saving you time and money.
