ALPHA SCT®

Combining the synergy of two pyrethroid molecules (10 % (w/w) Cypermethrin & 0.9 % (w/w) Tetramethrin), Alpha SCT offers the knockdown effectiveness of Tetramethrin and the well-known residual characteristics of Cypermethrin into a single product giving effective control of both flying and crawling insects.

For use on flies, moths, red poultry mite, beetles, fleas, ticks, bed bugs, cockroaches, crickets, silverfish, booklice, mites, ants, mosquitoes, wasps and centipedes. For use in and around domestic properties, public and municipal areas, refuse tips, poultry houses, slaughterhouses and manure heaps.

FLYMAX® G3

Flymax® Super G3 is a novel polymer formulation combined in a water-based delivery system that gives rapid knockdown of flies, ants, fleas, bed bugs and small insects. This product can be used in a wide array of environments. Due to its physical mode of action, Flymax® Super G3 is effective against insect strains that are resistant to organophosphate and pyrethroid insecticides. Use in Public Health / Refuse Tips: Effective in controlling most types of common flying & crawling insects, including flies, ants, fleas, mosquitoes, moths and bed bugs etc. Use in Agricultural Situations: Effective in controlling stored product insects including grain pests, litter beetle, flying insects such as house fly, cluster fly, mosquitoes, etc. (can be applied as surface spray while livestock is present but avoid direct contact with livestock/animals).

1 x 5 Litre

ORDER CODE: BFLYMAX3

£30.45

PERMOST UNI FLY

An effective ready to use surface and space treatment (Fog or ULV) for flying and crawling insects offering rapid knockdown. For use against flies, mosquitoes, moths, wasps, ants, cockroaches, earwigs, bristletails, fleas, beetles, mites, ticks and lice. Contains Permethrin and Tetramethrin with Piperonyl Butoxide as a synergist.

For application as space or surface treatment to hard porous and non-porous surfaces. Space treatment: applied through a fogging machine at a rate of 1 ml of product per cubic metre.

Surface treatment: applied through a hand sprayer or boom and nozzle sprayer apparatus as a medium or coarse spray. An application rate of 10 ml/ m².

PESTICIDE FREE

INSECT control

PRODUCTS

INSECT CONTROL - PESTICIDE FREE

OA2KI® AEROSOL (SILICON DIOXIDE)

Very effective in controlling insects by desiccation- apply a light dust to cracks and crevices to insect harbourage areas. Ideal for direct spray application onto vertical surfaces, and under the bed and in crevices where bedbugs are harbouring.

1 x 500 ml

ORDER CODE: BOA2KIAR

£16.49

MITEMAX®

MiteMax® is highly effective against poultry red mite (*Dermanyssus gallinae*). MiteMax® is a patented formulation that has been optimised to penetrate the dusty layers typically found within hen houses and grain stores to spread deep into the cracks and crevices that harbour mites.

MiteMax® contains an advanced food-grade cellulose polymer that acts on-contact with the mite. MiteMax® functions as a sticky trap rendering mites irreversibly immobile providing rapid knockdown. MiteMax® has a physical mode of action by trapping and the death/ killing effect is the consequence of this, which means it both falls outside the scope of the biocide directive (exempted from EU Reg. 528/2013) and also is effective against mites resistant to chemical insecticides.

1 x 500 ml

ORDER CODE: BMITE500M

£30.60

SIRIUS

A physical pesticide for use on a wide variety of insect pests in crops and fields. Application Rates: 250 ml to 1litre/ha.

1 x 1 Litre

ORDER CODE: BSIRI1LT

£64.85

AQUATAIN AMF

Aquatain AMF is a unique silicone-based liquid for mosquito control. Aquatain is applied to the surface of standing water - even large water bodies and forms a very thin film that rapidly spreads across the water. As silicones have a very low surface tension, the film prevents pupae and larvae from attaching themselves at the surface, resulting in rapid death of larvae and pupae as the insect's respiration is affected. Effective for up to four weeks. Apply 1 ml of Aquatain per square metre of water.

PRODUCTS

MoBe® MOAT

MoBe® Moat has been designed and successfully used by professional pest controllers in conjunction with some of the industries leading food manufacturers.

The MoBe® Moat consists of 18 metres of siliconised paper with adhesive applied to one surface and has been manufactured as an aid to trapping mice and insects around problem, high-risk areas. In addition to physically trapping pests, the strip is wide enough to act as a barrier to help prevent mice or insects from crossing over. The paper comes with pre-printed hazard warning lines so to warn others of the tape as well as usage instructions. The tape can be cut to the desired length giving a great number of potential applications. If trapping/monitoring insect pests, additional lures can be added along the tape's length.

Primarily the MoBe® Moat has been designed as a 'quarantine' barrier working in two ways:

- To stop potential movement by pests into previously infestation-free areas/products
- To cordon off known infested areas or products to prevent the spread of an infestation.

Some of the many potential applications:

- 1) To quarantine contaminated pallets of product and prevent cross-contamination to other stock, e.g. peanuts, rice, pet food.
- 2) To act as a barrier to known clean products, e.g. post fumigation commodities or finished product awaiting dispatch.
- 3) Using tape to glue the underside, MoBe® Moat can be stuck to the inside of silos to prevent migration of grain pests.
- 4) Act as a single large overnight trap in sensitive infested areas e.g. around the perimeter of commercial kitchens against cockroaches.

Please be aware the start of the roll contains no glue.

Standard outer 15

Please note that whilst the glue has been designed and tested successfully against both mice and insects, as with other similar devices, we cannot guarantee that it will successfully retain all pests under all environments and conditions. When using primarily against mice, it should be seen as an aid to protecting goods rather than the only method of control or monitoring. Always use in accordance with the Pest Management Alliance Glue Boards guidelines. The MoBe® Moat is sold as a professional only product.

COCKROACH TRAPS

TRAPPIT CR LO-LINE RTU

Research proves that the Lo-line is one of the most effective cockroach traps on the market. The insects are drawn to the trap by the odours, climb in, over the specially angled ramps and are held fast on the glue floor. The Lo-Line has a large sticky floor area allowing many insects to be caught before replacement is necessary. Lo-line has now been reformulated to utilise a specific food lure within the glue (rather than just a flavouring used in many other traps).

Standard outer 20

1 x 10

ORDER CODE: BTRTRLLR

£5.94

TRAPPIT CR CORNER RTU

A smaller size detector for detection and location of cockroaches and other crawling insects. Detector traps have now been reformulated to utilise a specific food lure within the glue (rather than just a flavouring used in many other traps).

AMENITY MOTH LURES

The Pine Processionary (*Thaumetopoea pityocampa*) is a moth of the family *Thaumetopoeidae*. It is an abundant species of pine woods in central and southern Europe, and as such, has been an important economic pest to Forestry. This is increasing concern, especially in more urban areas due to both the severely irritating hairs that protect the caterpillar larvae. The Oak Processionary Moth is an invasive pest relatively new to England, being found in London in 2006. The Oak processionary Moth is a serious health risk to humans and animals, predominantly from the urticating hairs that cause allergic responses and necrosis on the tongues of dogs that come into direct contact with the caterpillars.

Lures and traps are available to monitor Pine and Oak Processionary Moths in high risk areas. In addition, a number of treatment options are available for both Processionary and Brown Tail Moths, contact the office for more information.

INSECT control

PRODUCTS

INSECT CONTROL - GRAIN STORE HYGIENE

K-OBIOL EC25

Contains 2.5 % (w/w) Deltamethrin synergised with Piperonyl Butoxide. This pyrethroid grain protectant is an ideal alternative to organophosphorus formulations and can be used to treat the fabric of the building pre-harvest, as well as an add-mix to the grain. Unlike other products, there is no withholding period governing use of the grain. K-Obiol is accepted by NABIM and BRI. (Application in empty grain stores requires PA1 and PA6 certificate, application to grain requires PA1 and PA12 certificate).

Standard outer 12

1 x 1 Litre

Effective weed control is a combination of choosing the most suitable product and getting the application right in terms of timing, dose rate and application technique. Professional products are powerful chemicals which if misused, can damage non-target plants and potentially contaminate, for example, watercourses, therefore herbicides must only be applied by operators who hold the appropriate pest application certificates (PA1 & PA6). PA1 is the foundation qualification required by all spray operators and then they will also need the certificate relevant to the specific spray equipment they will be using, for example, a PA6 for applications made using a knapsack sprayer.

Terminology used to describe herbicides:

TOTAL	Refers to products that are non selective and within reason will control all vegetation.
SELECTIVE	Most commonly identifies products that control broad leaved weeds without harming turf/grass.
TRANS-LOCATED	Products that, subject to growing conditions, are absorbed by the plant and move within the plant tissue which unlike contact materials the application does need to cover the whole plant/grass.
CONTACT	Do not move around and only kill green leaf they actually hit so good coverage of the whole target is essential for effective control.
RESIDUAL	Products that sit in the top 2 cm of soil and remain active after initial application to control weeds that germinate in the subsequent weeks.

Products containing glyphosate alone (Gallup) would be classed as both a total and a translocated herbicide, but the inclusion of actives such as diflufenican and flufenacet adds residual activity.

Always read the label and ensure the product you intend to use:-

1. Will control the target weeds and that they are within the size range specified.
2. The weeds are actively growing and are not 'stalled' due to for example drought stress.

In addition, ensure that:-

3. Your application equipment is accurately calibrated and has the correct nozzle(s) to deliver the specified spray quality - fine, medium or coarse.
4. You have the correct PPE specified on the label.
5. You do not spray in conditions particularly windy or very high temperatures that could result in drift damage to non-target vegetation.
6. You have made provision for washing out empty pesticide containers and dealing with chemical washings in accordance with your legal obligations taking specific measures to avoid contamination of ditches and watercourses.

GRAZON PRO

A Selective Herbicide for spot spraying weeds in paddocks or pasture, PA1 / PA6 spraying certification is required to apply Grazon Pro.

Active ingredients: 240 g/litre Triclopyr (acid equivalent) present as 334 g/litre of Triclopyr Butotyl and 60 g/litre (5.5% w/w) Clopyralid. Spot treatment for docks, thistles and nettles.

For use in grassland such as paddocks.

1 x Litre

£68.05

DECIS PROTECH INSECTICIDE

Decis Protech is a non-systemic insecticide which acts by contact and ingestion to sucking and chewing insects. Its high lipophilicity provides a high affinity with the insect cuticle.

Active ingredient contains a broad-spectrum pyrethroid (15 g/l Deltamethrin) for control of aphids, caterpillars and other pests in agricultural, horticultural crops and amenity areas.

INSECT & WEED CONTROL

INSECT control

PRODUCTS

GALLUP XL

Gallup XL is a foliar acting herbicide that controls annual and perennial grasses and most broad-leaved weeds when used as directed. It is translocated from treated vegetation growth to underground roots, rhizomes or stolons. Leaf symptoms, being a reddening then yellowing of the foliage, are first seen on grass weeds but take longer to appear on broad-leaved weeds. To purchase, you must have PA1 and PA6 certification for hand sprayers and PA12 if applied by automatic sprayer.

1 x 5 Litre	ORDER CODE: BGLYFOS5	£24.41
1 x 20 Litre	ORDER CODE: BGLYFO20	£87.23

GALLUP HOME & GARDEN AMATEUR PACK

360 g/l professional strength Glyphosate with 'clean wetting system' for sale to both non PA certified users and professionals requiring small quantities (covers approx. 1600 m²)

1 x 1 Litre	ORDER CODE: BGALHG1L	£12.13
1 x 2 Litre	ORDER CODE: BGALHG2L	£16.87

GALLUP BIOGRADE AMENITY

Gallup Biograde Amenity is a systemic herbicide that goes down to the plants roots and will kill most perennial and annual weeds. It's superior and clean formulation of 360 g/l Glyphosate that contains no hazardous wetting agents making it the product of choice when doing a COSHH assessment. It is ideal for clearing unwanted vegetation from most situations including permeable surfaces such as paths/driveways and to spot treat weeds on hard impermeable surfaces like paving (do not apply as a blanket spray to hard surfaces). Where it is applied to land that will subsequently be replanted a minimum of one week after application, sometimes longer (see label) is required before cultivating and replanting.

It is a professional product and must only be applied by an operator holding the relevant PA certification for the spray applicator to be used, for example PA1 and PA6 for Knapsack/other handheld sprayers.

1 x 5 Litre	ORDER CODE: BGALBIO5	£66.52

LIGNUM INSECTICIDE PRO I62.5

Lignum Pro I62.5 is a concentrated professional product containing an insecticide to eradicate and prevent attack by wood boring beetles. It is highly effective against all life stages of wood-boring insects and woodworm. The formulation is water-based, producing a non-flammable, quick drying product containing no volatile organic compounds (VOCs). It has virtually no odour.

1 x 1 Litre

ORDER CODE: BLINING5

£26.53

LIGNUM FUNGICIDE AND INSECTICIDE PRO D156

This professional concentrated dual-purpose product contains an insecticide and fungicide to protect and preserve timber. It is designed to eradicate and prevent attack by wood boring beetles and prevent wood-destroying and discolouring fungi. Lignum Pro D156 is effective against a wide range of wood rotting fungi, including both wet rot and dry rot, whilst the pyrethroid insecticide is effective against all life stages of wood boring insects. It is also effective against fungal staining. The concentrated product is diluted with water and can be used during the drying out period after eliminating the source of damp. It is virtually odourless and can be applied either by brush or low pressure spray to provide long-lasting protection.

1 x 1 Litre

ORDER CODE: BLINGFUN

£34.98

LIGNUM PRO FUNGICIDE AND INSECTICIDE GEL

Ready to use deep penetrating "mayonnaise" type paste for the control and prevention of attack by wood-boring insects and wood rotting fungi. The active ingredients in the gel are highly effective against a wide range of wood-boring insects. The fungicide it contains has excellent efficacy against fungal decay. IPBC is added to protect against a range of wood staining fungi.

LED ELECTRIC FLY KILLERS

NEW

NANO G4 LED

The new Nano G4 fly control unit embraces the latest LED (light-emitting diodes) technology which uses less power consumption when compared to standard electronic ballast machines, resulting in a cost-saving for the customer on all-year-round operating costs. LED technology can save as much as 75-80%* in energy consumption when compared to traditional UV fly units. The Nano G4 LED shatter-proof lamps have an in-built driver that makes for easy tool-free servicing and further cost savings. Nano G4 is the professional UK manufactured glue board fly control unit suitable for restaurants, kitchens, food shops etc., where flying insects pose a problem. (*Dependant upon the comparable fly unit).

Features & Benefits:

1. Long life LED lamps
(Lamps are recommended to be changed every three years)
2. Made for wall mounting, suspending or free standing
3. 'Lift and lock' front guard enables tool free servicing
4. Annual cost savings
5. Competitively priced
6. Available in White or Stainless steel
7. Versatile installation
8. Shatter-proof lamps as standard
9. Dimensions: W 50 x H 35.5 x D 12 cm
10. Coverage: Up to 100sq/m (*Dependant upon the comparable fly unit)

Read the label before use. Using these products in a manner that is inconsistent with the label may be an offence. Refer to the CRRU UK Code of Best Practice (or equivalent) for guidance. When this product is supplied to a user for the control of rodents, it shall only be supplied to a professional user holding certification demonstrating compliance with UK rodenticide stewardship regime requirements”.

RODENT control

PRODUCTS

COUMATETRALYL

Excellent efficacy against rats and demonstrates reduced risks of secondary poisoning.

PROFESSIONAL

ROMAX® RAT CP (SOFT BLOCK)

Contains 0.0375 % (w/w) Coumatetralyl. Based on a special 100 g 'soft block' formulation, this bait has proved to be particularly attractive to rats. Indeed tests have shown it to be preferred to cereal-based baits. As a block, however, it is 'non-spill' and can be secured in place. It has proved to be effective against both the 'good feeders' and the more difficult to control 'hesitant feeders' in the rat population, and as a multi-feed bait, can be as potent as Brodifacoum.

- Reduced risk of secondary poisoning.
- Unique active ingredient.
- Highly palatable.
- Palatable and securable 'soft bait' formulation.

Approval No: UK-2016-0953-001

1 x 5 Kg

PROFESSIONAL

RACUMIN® FOAM

IR

Contains 0.4 % (w/w) Coumatetralyl. Racumin® Foam is a new, non-bait rodenticide from Bayer, offering an alternative method to control rat and mice infestations. This truly innovative foam formulation works with the rodent's natural grooming habits and is effective as a result. When faced with difficult to access areas, Racumin® Foam is for indoor use and can be applied in known rat runways, passages, entrance points / holes, covered tracks and wall cavities.

Approval No: UK-2014-0860

Supplied with free contact station, pictured below.

FREE ROMAX® CONTACT STATION

6 x 500 ml

ORDER CODE: BRACFO.5

£41.21

ROMAX® CONTACT STATION

The Station was designed to allow contact rodenticides currently available to be applied within the station to allow rodents to come into contact with the active ingredients. Following the rodent control program, the contact stations can be conveniently removed.

The unique design of the Romax® Contact Station incorporates end flaps on either side of the station that has the effect of increasing the transfer area of the active ingredient to the coat of the rodent as the rodent passes through the station.

BROMADIOLONE & DIFENACOU M

RODENT control

PRODUCTS

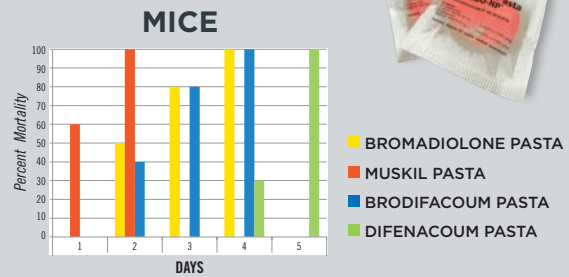

AVAILABLE IN THREE BAIT FORMULATIONS

Romax® Muskil® technology is based on high-grade food ingredients containing natural feeding enhancers. The block and pasta formulations have the FLUO-NP® technology, a fluorescent tracking component that helps monitor rodent activity including routes of travel by using a UV torch on faeces deposited. Fluorescent tracking is also a useful tool to help monitor if the bait is being consumed by the target rodent. Research has also shown Romax® Muskil® FLUO-NP® baits are more attractive than standard baits resulting in accelerated acceptance by rodents. All of these features combined with the patented combination of low dose actives give Romax® Muskil® its superior palatability with rodents exhibiting no signs of bait shyness.

ROMAX® MUSKIL® PASTA – The fastest solution.

Laboratory tests show speed of kill compared with other actives.

Field tests and commercial usage in Europe has proven that Romax® Muskil® pasta is the fastest solution for controlling both rats and mice. The bait is packed in single dose filter bags which preserves the attracting characteristics effectively maintaining the palatability and performance in a wide range of environments.

ROMAX® MUSKIL® WAX BLOCK – Proven palatability.

An extruded wax block produced with a central hole for anchoring into bait stations with edges to encourage gnawing. The block which has the unique Romax® Muskil® formulation, makes it highly attractive to both rats and mice while remaining durable in challenging conditions of high humidity and moisture.

ROMAX® MUSKIL® WHOLEWHEAT – Special Absorption Technology

The whole wheat is produced using special absorption technology which ensures an even distribution of the twin active ingredients throughout the grain which means Romax® Muskil® will be equally effective on mice that kibble (dehusk whole wheats).

SPECIAL ABSORPTION TECHNOLOGY

- Treated using special absorption techniques.
- Active ingredients are evenly distributed through to the core of the grain.

New Storm[®] Ultra Secure

Take them by Storm[®]

Efficient, reliable & cost effective rodent control

Storm[®] Ultra Secure is a 25ppm rodenticide that has the palatability of a pasta in a block, and is at least twice as palatable as leading anticoagulant bait blocks. This single feed bait offers effective control, even against rats and mice with anticoagulant resistance. It can be used in extreme temperatures, has a high resistance to mould and contains no wax which makes it more appealing to rodents. If you need to control rodents, take them by Storm.

- Ultra palatable** for rats and mice
- Ultra resistant** to extreme conditions
- Ultra effective** with just a single feed
- Ultra quick control** of rodent infestations

PROFESSIONAL

STORM® SECURE BAIT BLOCKS

IR

MONITORING & INDICATOR PRODUCTS

RODENT control

PRODUCTS

RODENT CONTROL - MONITORING & INDICATOR PRODUCTS

DETEX BLOX WITH LUMITRACK

Reformulated using Lumitrack, droppings glow bright green under UV light. Highly palatable non-toxic monitoring bait. There is now a demand from food manufacturers and large industrial businesses to monitor constantly for rodents with non-toxic bait. Detex Blox fits perfectly into this situation. The new Detex Blox from Bell contains a fluorescent marker which glows under UV light to aid with tracking infestations.

Standard outer 2

1 x 4 Kg

ORDER CODE: BDEBX004

£25.22

DETEX SOFT BAIT WITH LUMITRACK

Detex Soft Bait incorporates Lumitrack; a special additive that causes rodent droppings to brightly glow under UV or black light. This tool helps professional pest controllers identify droppings in dark or congested areas where they would normally go unnoticed. Rodent droppings help identify species type and track rodent activity (i.e. entry points, pathways and harbourage areas). Lumitrack® takes the guesswork out of rodent control and improves your baiting strategy.

Each 15g sachet of Detex Soft Bait includes an extruded hole in the centre, making it easier for the professional pest controller to place the bait onto the rod and allowing it to be placed more consistently and securely. Detex Soft Bait has been specially developed to achieve sustained palatability, making it ideal for long-term applications

1 x 3.6 Kg

ORDER CODE: BDEBXSBL

£44.54

HARMONIX MONITORING PASTE

Harmonix Monitoring Paste is a new non-toxic monitoring bait. With its full traceability day and night, it is also free from the big eight food allergens including wheat and is HACCP certified; making it suitable for use within the food industry. It is the first essential step in integrated pest management for use for early detection of rodent activity and to encourage bait acceptance ahead of treatment.

SENSOR TECHNOLOGY

RODENT CONTROL - SENSOR TECHNOLOGY

ROMAX® CUBE

The Intelligent Motion Sensor Technology for Professional Pest Controllers.

The primary function of the Romax® Cube in a trapping application is to report when a trap has been activated. In commercial applications, this will save many hours travelling time that can be consumed by:

- A) Checking if traps have been activated, or
- B) To determine whether pests are present.

The Romax® Cube is effective in real-time alerting of activated traps and real-time photographic evidence of the presence of pests. This information optimises a technician's daily planning schedule, thereby lowering operational costs.

Should a trap be activated or a pest be photographed near a trap, the technician will receive an alert to their smartphone within 60 seconds.

One Romax® Cube can monitor up to 10 traps (movement tags) within a 50 metre range in a clear view of sight. The Romax® Cube uses a cross-network SIM and the 2G cellular network, which means it works in the most remote locations.

Romax® Cube Day & Night	ORDER CODE: BCUBEDAN	£331.29
Romax® Cube Carry Case	ORDER CODE: BCUBCASE	£9.29
Bluetooth Sensor (Hook)	ORDER CODE: BTAGHOOK	£31.00
Enclosure (Waterproof)	ORDER CODE: BWATCADN	£40.60

TRACK & RECORD ACTIVITY VIA MOBILE APP

MULTIPLE SENSORY PLACEMENTS (UP TO 10 SENSORS)

MONITOR TRAPS VIA BLUETOOTH REMOTELY TO SAVE YOU TIME

ROMAX® E-TRAP

The latest in electronic switch technology: Remote monitoring for both rat and mouse traps. Unit consists of a remote monitoring system that sends a message to your smartphone when a trap is triggered. This alert allows the user to schedule visits to premises once traps have been triggered to remove the rodent and reset the traps. Multiple traps can be set via the control module. Ideal device to increase the daily productivity, customer visits and rodent control success rates.

- Rat System (one trap per box)
- Mouse System (two traps per box)

Intelligent Motion Sensor Technology

Intruder Activity

instant alerts to your smartphone

Giving you peace of mind for monitoring and security applications.

Monitoring uses for:

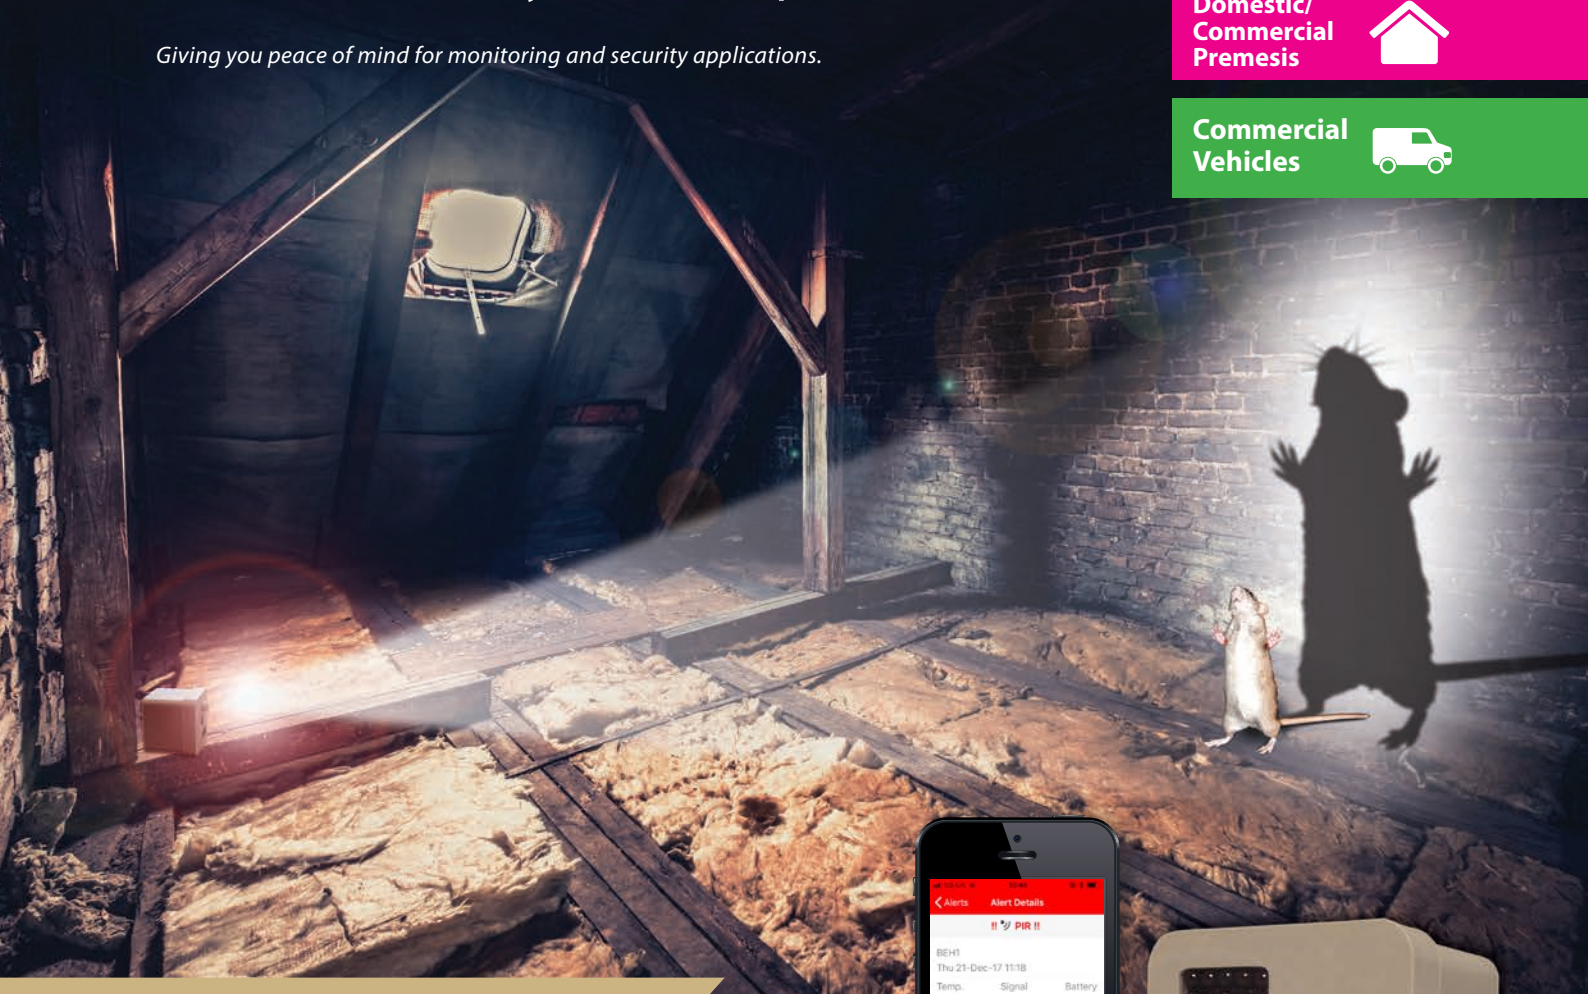

Pest Traps

Domestic/
Commercial
Premises

Commercial
Vehicles

The Romax[®] Cube Features:

- ✓ One Romax[®] Cube can monitor up to 10 traps (movement tags) within a 50 metre range.
- ✓ Passive Infrared Detector (PIR) sensor- detects any movement within a 135 degree angle.
- ✓ High resolution Camera, date and time stamped photos once movement is detected.
- ✓ Bluetooth 'movement sensor tags' – if traps have been activated you will be sent a real-time alert within 60 seconds.
- ✓ GPS location- the alert from the Romax[®] Cube, including the trap's, can be forwarded to colleagues who might be better placed to attend.
- ✓ The Romax[®] Cube uses a cross network SIM and the 2G cellular network, working in the most remote locations.

£3.26

VICTOR CLEAN KILL TUNNEL MOUSE TRAP

The Victor Clean Kill Tunnel design increases interaction with the mouse. Once the mouse enters the trap to retrieve the bait, the Kill-Gate enables perfect placement for a quick, humane kill. No-see, no-touch tunnel design. No chemicals or poisons, safe to be used around children and pets. The trap is reusable or disposable.

1 x 2

ORDER CODE: BVICTUNL

£5.37

VICTOR KILL VAULT MOUSETRAP

The Victor Kill Vault is similar to the Hidden Kill from Bell - however, it is resettable, use in conjunction with our ROMAX® Rodent Feed Paste. This mouse kill trap contains the dead mouse, and you can drop the carcass in the bin and reset it for multi-use. This is the same technology as the Victor clean kill - however, the mouse is completely hidden when the trap goes off (No tail hanging out the end). Ideal as a sell on / for use in domestic and offices for mouse control.

1 x 2

ORDER CODE: BMOUM267

£4.29

HIDDEN KILL MOUSE TRAP

The Hidden Kill has several unique features that combine a quick, no mess capture and kill with exceptional value. The two-way entry allows mice to enter from either direction and the fully enclosed capture area keeps the captured and despatched mouse hidden inside. The design allows an easy "no-touch" disposal.

The Hidden Kill trap is to be used with Provoke mouse.

1 x 24	ORDER CODE: BHIDTRAP	£37.01
--------	----------------------	--------

VICTOR RAT & MOUSE TRAPS

The original break-back traps. Widely used and preferred by many pest control technicians. Heavy-duty spring for large rats ensuring clean kill.

1 x 30 (Mouse Traps)	ORDER CODE: BMSEM325	£26.52

TRAPPER T-REX

The Trapper T-Rex from Bell is a powerful trap that has many features. It comes with aggressive interlocking teeth and a removable bait cup for safer baiting. The trap can be easily set by either foot or hand and fits into various rat bait stations.

Standard outer 12

Each	ORDER CODE: BTRT-REX	£5.43
------	----------------------	-------

TRAPPER MINI-REX

The Trapper Mini-Rex from Bell is a powerful mouse trap with aggressive interlocking teeth and a removable bait cup for safer baiting. The trap can be easily set by either foot or hand and fits into various rat bait stations.

1 x 24	ORDER CODE: BTRTMREX	£37.80
--------	----------------------	--------

SNAP & LIVE CATCH TRAPS

TRAPPER PEST MONITOR

Trapper Pest Monitor is a reusable, plastic station used with Trapper MC Glue Trap to monitor both insects and mice.

For monitoring insects and mice, place a TRAPPER MC Glue Trap in the base, using the clips to hold the glue trap firmly in place. Insects can access Pest Monitor from holes on all four sides. Mice enter through the two larger holes that are adjacent to the wall. To prevent mice from accessing Pest Monitor, rotate the top, covering the two larger holes.

1 x 12

ORDER CODE: BBBPRPEM

£36.62

TRIP-TRAP

A single live catch mouse trap. A simple one way door that allows entry but no exit. The end section can be removed to place food and take out the trapped mouse.

1 x 6

ORDER CODE: BTRTRIPT

£15.90

ROMAX® RODENT FEED

Contains a highly effective seed substance formulation in a convenient 55 ml syringe container to load both live and lethal traps. This paste formulation allows easy application and effective grab onto the trap's trigger plate to enhance catch rate. Ideal for use in food premises as this product does not contain nuts. To be used by professionals who have gel style syringe gun applicators.

TRAPPING GUIDELINES FOR RODENTS

Whilst the use of traps is labour intensive, they have a part to play in rodent control, particularly for controlling very small infestations in circumstances where the use of rodenticides is unacceptable. They are unlikely to contribute significantly to large scale control programmes. The major reason for their limited applicability is the behaviour known as neophobia. If large scale control using traps is essential, then the trapping programme needs to be very intensive and very closely monitored.

The use of break-back traps for both rats and mice is probably the most widespread and successful trapping technique. Careful placement is required with break-back traps, the treadle end of the trap being placed across the rodent run against a vertical surface to minimise avoidance. Bait does not need to be used and may reduce the effectiveness of the trap.

All traps should be visited at least once every 24 hours to remove any dead rodents, reset the traps, and ensure that no rodents are being held alive.

One further form of trapping is the use of 'Sticky-boards'. These are sheets of material, such as hardboard or plastic, on which a specially designed sticky substance or 'rodent glue' is spread. The boards are placed in areas of rodent activity in the hope that animals will become stuck on the boards and can then be humanely killed and removed.

Rodent boards should only be regarded as a 'last choice' option.

The new 'Alliance' Code of Practice on the responsible use of this technique can be found in the glue board section.

SPRING TRAPS GENERAL USE

The law requires that spring traps must be set in natural or artificial tunnels, to reduce the risk of killing non-target species. Natural tunnels such as burrows roots may be used, or artificial tunnels, about 60 cm long, can be made from turf, rocks, pipes, boards or fallen timber. This tunnel must be large enough to allow the trap's arms to swing and close, but the tunnel entrance should be reduced to a width of suitable size for the target species by driving sticks into the ground, to exclude pets and other wild mammals and birds. Squirrels will investigate such tunnels and catches may be made throughout the year, particularly in winter and spring. Baiting is unnecessary but will improve catches.

Traps should be placed with the trigger in the middle of the tunnel and should be bedded in flush with the floor. They should be inspected daily and sprung once a week to prevent seizing due to rust. All traps should be securely anchored.

The Spring Trap Pests Act 1954 makes it an offence to use a spring trap for the purposes of killing or taking animals in England and Wales other than one approved by an Order of the Secretary of State. The approval of traps is a devolved issue.

Traps that are currently approved in England are specified in the latest version of The Spring Traps Approval Order 1995. Only traps that have been approved for the purpose may be used.

Those commonly available from Barrettine are the Fenn MK4 & MK6, the Springer No 4 and No 6, Magnum 110 & 116 & Kania 2000 may also be used if available. Spring traps should not be used in areas where protected species such as red squirrels or polecats may be present.

MAGNUM SPRING TRAPS

BMI BODY GRIP 110 & 116 TRAP

These should not be used where they might take non-target animals. Recent refinements by BMI Magnum Series have made these traps even more effective to use. Every trap has a 4-way trigger that fires the trap when an animal pushes the trigger from any direction, including the side with a new trigger wire to control the strike area.

BMI BODY GRIP 110 TRAP

Target Species - rats, grey squirrel, weasel and stoat.

BMI BODY GRIP 116 TRAP

A larger version of the 110 above. Target species - mink, rabbit plus above species.

110 TRAP - Each

FERAL PIGEON TRAP

A live catch trap constructed using square galvanised mesh. Entrances with easy swing bob wires and top access for removing captured birds. Comes flat packed and complete with vinyl base for easier pre-baiting etc (not shown).

Each	ORDER CODE: BTRA029	£108.21
------	---------------------	---------

FOLDING PIGEON TRAP

The same trap as the Feral Pigeon Trap above but without the vinyl base.

Each	ORDER CODE: BTRA050	£75.31
Ground Funnel	ORDER CODE: BTRA031	£22.94

SQUIRREL & MINK TRAP

Heavy-duty single catch trap. Once an animal steps on the treadle the drop bar holds the door firmly closed.

Dimensions: 600 mm x 175 mm x 150 mm

Each	ORDER CODE: BTRAL079	£24.20
------	----------------------	--------

FERAL CAT TRAP

Single catch treadle operated trap. Rear sliding door for removal. Trap also has a carrying handle.

Dimensions: 750 mm x 300 mm x 250 mm

Each	ORDER CODE: BTRAL027	£47.63
------	----------------------	--------

LIVE CAPTURE TRAPS

RABBIT METAL CAGE TRAP

Single catch trap. One door operated by treadle via a release arm.

Dimensions: 800 mm x 200 mm x 225 mm

Each

ORDER CODE: BTRAL006

£32.54

MC MOUSE MASTER TRAP

A double-entry multi-catch mouse trap. Steel trap design with galvanised finish with the capability to catch up to 30 mice.

Dimensions: 165 mm x 265 mm x 65 mm 0.52 Kg

Each

ORDER CODE: BTRAL010

£13.07

DOG/FOX TRAP

An extremely strong single live catch cage trap with bait hook release and deadfall galvanised door. The cage is constructed from heavy-duty square galvanised weldmesh and can be folded flat.

Dimensions: 1200 mm x 500 mm x 550 mm

Rigid versions are available on request, additional carriage and lead times apply.

Each

ORDER CODE: BTRDGFLA

£153.64

RAT & SQUIRREL TRAP

Very effective, single entry, spring door trap. Will catch adult and young rats and squirrels.

Each

ORDER CODE: BTRAL023

£14.51

ALBI 025 RAT TRAP

Compact, single entry, spring door trap. Can be secured to beams.

Each	ORDER CODE: BTRAL025	£12.65
------	----------------------	--------

MONARCH TYPE MULTI-CATCH RAT TRAP

This multi-catch rat trap has a one-way entrance and self-resetting door into the retention area. This tried and tested design is made from 15 swg welded zinc plated mesh.

Dimensions: 430 mm x 240 mm x 180 mm

Each	ORDER CODE: BTRAL022	£18.50
------	----------------------	--------

DOUBLE ENTRY SQUIRREL/MINK TRAP

Similar trap to the Standard Squirrel and Mink trap but slightly longer and with a door at both ends. The target species can see a clear exit the other end and therefore enters the trap more readily.

Dimensions: 160 mm x 150 mm x 710 mm

Each	ORDER CODE: BTRAL009	£43.59
------	----------------------	--------

FOLD-FLAT LARSEN CAGE TRAP

A flat-pack trap that pops up in seconds to trap magpies, rooks and jays. Single side-entry door with breakable perch for easy setting. Transportation handle, decoy sunshade, food and water drinker as standard.

Dimensions: 950 mm x 480 mm x 430 mm

Each	ORDER CODE: BTREC079	£85.96
------	----------------------	--------

BAIT SAFE LITTER BINS

PLASTIC BAIT SAFE LITTER BIN

The bins are dual function in that they can be used to collect litter and provide a secure enclosure for a bait station. The discarded litter/takeaway foodstuffs act as an attraction to rodents, and the enclosure provides safe and friendly harbourage. The bin can be used in any location, and because the bait stations are not in view, it is discreet and does not draw attention to the issue of vermin that are being dealt with.

In a recent trial, double Protecta LP bait stations were emptied by rodents in two days. Previously, bait boxes in the same location but placed in the open took ten to fourteen days to be emptied. As well as using high-quality tamper-resistant Protecta LP bait stations, the outer sleeve of the bin is also locked in place providing, excellent security.

Other options available including:
Different coloured sleeves; Replacement plastic sleeve; Spare Keys; Ash Tray and Cross foot and rooted frames for setting in concrete - POA.

Additional carriage charge applies for all bins - POA.
Please allow up to 21 working days for delivery.

Prices start from:

Each - 90 Litre	ORDER CODE: BBASABIN	£271.71
Each - 120 Litre	ORDER CODE: BBASA120	£335.73

ROMAX® RODENT SEAL

Romax® Rodent Seal uses a top-quality industrial sealant in a patented mix of stainless steel fibres. The benefits of such 'wire wool' plus proofing materials have long been known, but they've been combined to offer a professional and time-saving solution to exclusion for the first time. In addition, the product has been commercially tested and is 'metal-detectable', making it a good choice for sealing around plant and machinery in the food industry, whether this be for rodents, insects or just housekeeping.

Standard outer 25

1 x 310 ml

ORDER CODE: BRORODSE

£10.41

RODENT SEAL ADJUSTABLE NOZZLE

Adjustable nozzle that can be rotated in numerous angles for ease of application. Can also be used with other caulkable rodenticides such as Romax DP and Romax Venom Lipogel.

1 x 5

ORDER CODE: BRORONoz

£5.97

SODAL SILIRUB® 2 SEALANT

High-quality neutral silicone sealant that is UV resistant with very good adhesion on a variety of materials.

1 x 300 ml

ORDER CODE: BADHSIL2

£3.50

SODAL FIX ALL® TURBO

A high-quality adhesive-sealant based on SMX-Polymer. Good adhesion to most common materials, even on slightly damp surfaces. Weather and UV resistant.

1 x 290 ml

ORDER CODE: BADHFTUR

£6.25

EXPANDING FOAM

Polyurethane Expanding Foam (for use with foam gun). Also option for hand application without a gun.

For use with foam gun.

1 x 750 ml	ORDER CODE: BEXP700	£8.47
------------	---------------------	-------

Applied by hand.

1 x 750 ml	ORDER CODE: BEXP750	£7.98
------------	---------------------	-------

SOLVENT CLEANER

Solvent is used to flush and clean the gun applicator or dissolve 'stray' foam during proofing.

1 x 500 ml	ORDER CODE: BEXPFSOL	£8.78
------------	----------------------	-------

FIRE RATED EXPANDING FOAM

Fire-rated expanding Polyurethane Foam has been tested in horizontal and vertical applications to BS476 Part 20. Suitable for sealing joints where fire integrity and insulation is required e.g. walls, floors and partitioning. Perimeter joints around door and window frames and service penetrations.

For use with foam gun.

1 x 750 ml	ORDER CODE: BEXPFRGU	£10.73
------------	----------------------	--------

Applied by hand.

1 x 750 ml	ORDER CODE: BEXPFRHA	£10.73
------------	----------------------	--------

EXPANDING FOAM GUN

Expanding foam gun - Ideal for larger proofing works, an economical and professional method of applying expandable foam. Works with replaceable foam canister and cleaner. This system allows operators to apply foam accurately and cleanly!

Each	ORDER CODE: BEXPFGUN	£31.35

RODENT GLUE BOARDS

ROMAX® RAT & MOUSE GLUE BOARD

Barrettine has long campaigned that glue boards should be available to professional users only, and to encourage responsible use of these valuable last resort tools, we have launched a new 'professional only' Romax® glue board - As well as a modern design, the product has the added benefit of the code of conduct and guidelines printed inside- along with their professional only recommendation. For efficacy & humaneness, it's also made to the highest specification to minimise the risk of escape. Each board is wrapped individually.

£23.29

TRAPPER LTD GLUE TRAP

A trap designed to catch mice and insects. Consists of a powerful adhesive on fibreboard and covered with a special release paper. The LTD also fits into the Trapper 24/7.

1 x 72

ORDER CODE: BTRAPLTD

£41.33

TRAPPER MAX GLUE TRAPS

The Trapper Max offers 40 % more surface area than the Trapper LTD and can be used against mice or insects. The pre-baited glue has been vigorously tested to ensure maximum holding power. The trap can either be laid out flat or folded into a tunnel.

1 x 72

ORDER CODE: BTRAPMAX

£27.90

MoBe® MOAT

MoBe® Moat has been designed and successfully used by professional pest controllers in conjunction with some of the industries leading food manufacturers.

The MoBe® Moat consists of 18 metres of siliconised paper with adhesive applied to one surface and has been manufactured as an aid to trapping mice and insects around problem, high risk areas. In addition to physically trapping pests, the strip is wide enough to act as a barrier to help prevent mice or insects from crossing over. The paper comes with pre-printed hazard warning lines so to warn others of the tape as well as usage instructions. The tape can be cut to the desired length giving a great number of potential applications. If trapping/monitoring insect pests, additional lures can be added along the tape's length.

Primarily the MoBe® Moat has been designed as a 'quarantine' barrier working in two ways:

- To stop potential movement by pests into previously infestation-free areas/products
- To cordon off known infested areas or products to prevent the spread of an infestation.

Some of the many potential applications:

- 1) To quarantine contaminated pallets of product and prevent cross-contamination to other stock, e.g. peanuts, rice, pet food.
- 2) To act as a barrier to known clean products, e.g. post fumigation commodities or finished product awaiting dispatch.
- 3) Using tape to glue the underside, MoBe® Moat can be stuck to the inside of silos to prevent migration of grain pests.
- 4) Act as a single large overnight trap in sensitive infested areas, e.g. around the perimeter of commercial kitchens against cockroaches.

Please be aware the start of the roll contains no glue.
Standard outer 15

Please note that whilst the glue has been designed and tested successfully against both mice and insects, as with other similar devices, we cannot guarantee that it will successfully retain all pests under all environments and conditions. When using primarily against mice, it should be seen as an aid to protecting goods rather than the only method of control or monitoring. Always use in accordance with the Pest Management Alliance Glue Boards guidelines. The MoBe® Moat is sold as a professional only product.

1 x 18 m

ORDER CODE: BMOBMOAT

£28.83

ROMAX® GLUE SOLVENT

A responsible and essential component of a Pest Technicians toolbox, the Romax® Glue Solvent solubilises the non-drying glue. This is ideal for removing insects from the Romax® Glue Boards for identification and cleaning hands or surfaces covered in glue. It is also key in the responsible use of glue boards and traps to release non-target pests quickly.

PEST MANAGEMENT ALLIANCE HUMANE USE OF RODENT GLUE BOARDS

Pest Management Alliance - Code of Best Practice - Humane Use of Rodent Glue Boards

In order to protect public health within high-risk environments, the use of rodent glue boards remains an important last option when all other control methods have been considered ineffective. Although glue boards are not designed to physically harm rodents, their use raises valid concerns and they should only be sold to or used by technicians who have been given adequate training and are competent in the effective and humane use of this technique. The following principles must be followed in order to minimise animal welfare concerns:

1. Option of last resort

All other options for rodent control must be considered before glue boards are used. Detailed records must show why other control methods are either considered inappropriate or have failed. Where there is a rodent in a high-risk environment, it may be appropriate for glue boards to be placed strategically to ensure immediate control.

2. Check boards frequently

Where rodent boards are used, these must be inspected at appropriate intervals. This should be within 12 hours of placing, or at least as soon as is reasonably practicable, including weekends and bank holidays. If unavoidable events cause slight extensions to inspection intervals, then the reasons should be recorded. Longer delays must be avoided (see contingency plan below).

Where possible and practical, inspection times must be organised to minimise the time rodents are likely to be on the board (e.g. if rodents are known to be active during certain periods, inspection times should be arranged with this in mind). If a caught animal displays signs of undue suffering or serious physical harm, the intervals between inspection times must be shortened. Records must be updated after all inspections.

3. Contingency plan

A contingency plan must be in place so that in the event of an emergency, a second competent person can be called upon to inspect the boards and deal with any captures or safely remove the boards as appropriate. Where it is known boards will not be inspected at appropriate intervals, they must be taken up (even if only temporarily).

4. Protect non-target species

Boards must be placed in such a manner that they do not present a risk to non-target species.

5. Use the correct size board for the pest species

The size of board must be appropriate for the target species.

6. Detailed records

Detailed copies of records and location plans should be available on-site at all times for all boards laid during any treatment and must be updated as necessary to ensure traceability. Copies ensure information is available should site records be lost or unavailable.

7. Dispatch of trapped rodents humanely

Rodents trapped on rodent boards must be dispatched quickly and humanely by technicians with appropriate training. Placing the glue board in a clear plastic bag and dealing the rodent a sharp blow to the head with a blunt instrument would be an appropriate mode of dispatch. Drowning is not an acceptable method of dispatch.

8. Non-target animals

In the event that a non-target animal is trapped, a suitable food-grade oil or similar emollient should be applied to the animal for removal, or if not a protected species, it may be killed humanely. Non-targets should only be released at their site of capture, not elsewhere, and only if they appear to be physically unharmed and their release is not prohibited by law.

9. Remove boards at the end of treatment

At the end of treatment, all rodent boards must be accounted for, removed by the technician, and the records endorsed accordingly.

10. Dispose of boards safely

Rodent boards should be disposed of with care. The sticky surface should be covered to avoid the accidental trapping of non-target species or subsequent misuse, and the board should be disposed of in accordance with local authority waste requirements.

11. Communication with the customer

This Code of Best Practice must be provided to the customer to make them aware of the standards that the operative is working to.

The humane use of glue boards is the legal responsibility of the pest controller and cannot be delegated to untrained people. All technicians must be suitably trained and competent in their application, maintenance and ultimate disposal, including the dispatch of the target species and safe removal of non-target species.

This Code of Best Practice was produced after consultation with Defra and Natural England. Updated February 2017. For additional copies of this code, please call the sales office.

FUMIGANTS & ACCESSORIES

For the control of Rabbits, Moles and Rats.

RODENT control

PRODUCTS

RABBITS (*Oryctolagus coniculus*)

The most effective time for treatment for control of rabbits is from around November to March when the rabbit population is at its lowest, and the burrows are most accessible. Before treatment, ensure that rabbits lying out in the surrounding area are driven to ground.

Treatment

- 1: With the loaded Phostoxin Applicator, insert one pellet as far into each hole as practicable, usually 30cm (12") is adequate.
- 2: As soon as the pellets have been deposited in the hole, seal the hole with turf, grass side down.
- 3: If fresh rabbit activity is noticed after a few days, repeat the treatment until no further activity is visible.
- 4: Please be aware of the new label changes. Burrows, runs and harbourages can not be treated if they are less than 25 m from any building occupied by man or animals.

MOLES (*Talpa europaea*)

Moles are generally found from sea level to 3,000 ft in many soil types and live almost entirely underground in tunnel systems which consist of main and subsidiary tunnels, whose main purpose is to trap earthworms for food.

Tunnelling is carried out from the nest, which is its sleeping and breeding quarters. Breeding in March and May is the only time moles meet, otherwise, they are solitary animals. Molehills are a problem in lawns, sports grounds and pasture, causing considerable damage to soil and machinery. The mole, who consumes vast quantities of earthworms, can also cause serious disturbance to crop root systems.

Moles are solitary animals and very territorially protective of their area. This can be very misleading when confronted with an area with many molehills, but as a rule, even heavy infestations can mean only eight moles per hectare (three per acre) even in good feeding areas with a high population of earthworms, their primary food.

RAT BLOCKER

Our stainless steel rat drain blocker fits snugly into wastewater or sewage pipes, acting as a one-way valve. Simply put, waste water can flow out, but rodents are prevented from accessing the property by moving in the opposite direction. Forms an effective barrier for rodent incursions into a property, stopping the problem before it starts.

-------------	----------------------	--------

NILAQUA 'ALCOHOL FREE' HAND SANITIZER

Nilaqua is a fragrance & alcohol free advanced Hard Surface / Multi-Surface cleaner and Hand Sanitiser that is fast-acting and a powerful germ killer (99.9999%), effective within 30 seconds yet kind to the individual and environment, not stripping surfaces as it contains no irritants within its formulation.

1 x 500 ml	ORDER CODE: BNWRH005	£7.09
------------	----------------------	-------

WEPALM HAND SANITISER DISPENSER & REFILL POUCH

Use our cost effective top up system & save money and time! WePalm hand sanitiser comes in easy to store, easy refill pouches. Made with a synergistic blend of detergents to provide a mild but thorough cleaning and sanitising action. With its skin friendly sanitising, cleaning and moisturising action, it allows constant use in catering/kitchen areas, hospitals, nursing homes and can be mounted inside a pest control vehicle for ease of action & access. Once dispensed, produces a pre-lathered foam. The spread-ability of the foam increases the cleaning and disinfecting performance, getting to areas such as in-between the fingers where bacteria hide. Used in conjunction with our pump action dispenser that does not rely on battery operation to provide further cost savings. Complies to BS EN 13727, 13624, & 14476. BPR compliant.

PEST CONTROL CATALOGUE 2021

ORNAWAY® BIRD REPELLENT

Ornaway® Bird Gel is a novel, highly effective yet discrete bird deterrent for use on buildings and other structures.

The convenience of Ornaway in pre-filled dishes allows a significant time-saving aspect to the bird installation. The formulation combines initial olfactory repellents with high electromagnetic reflectance spectrums that birds avoid. To be used within an integrated approach to manage birds that could include housekeeping/ cleaning, trapping, spikes and netting. Once properly installed, the product remains effective for at least two years, even in harsh climates.

The gel is intended to be applied in the UV stabilised, low-profile dishes that are supplied with the product. Once installed, the dishes are usually invisible from ground level, so do not detract from buildings' visual appearance.

Ornaway® Bird Gel is also offered in pre-filled dishes as pictured below. The 300 g Caulking Tube includes 15 dishes for filling.

1 x 300 g Caulking Tube	ORDER CODE: BBIRORGE	£32.66
15 Pre-Filled Dishes	ORDER CODE: BORNDISH	£34.97

ORNAWAY® DISH MAGNETS

Ornaway® bird dish magnets offer the user ultimate versatility in the installation of Ornaway® bird gel. The heavy-duty magnets allow the dishes to be securely attached to metallic structures and will remain in place, even in windy conditions.

25% OFF

Disinfectant and cleaner. Contains Didecylidimethylammonium Chloride for use with the cleaning up of bird waste. Unlike other products, Guanaway is a powerful alkaline cleaner degreaser that neutralises the acidic by-product associated with bird droppings. This reduces the corrosion to the stonework and increases safety by removing the slippery, greasy waste. Also available as a handy RTU trigger spray version ideal for those small jobs when making up a full sprayer isn't justified. Ideal for disinfecting traffic lights, won't discolour plastic.

INSTALLING A NET UP TO 10 m BY 10 m

Before starting to install a net, it is always important to make sure that the design of the installation is optimum. You want the net to be effective at keeping birds off the building, whilst at the same time not looking obtrusive.

Nets should be installed in a way that minimises the risk of damage by the action of wind. You also want the net to be as straightforward to install as possible. Net installations will vary depending upon the bird species you are proofing against, the substrate you are attaching the net to, e.g. masonry, timber, steelwork or cladding/soft substrate, and the size of the net. Below is a step-by-step guide into effectively installing a pigeon net of size 10 m by 10 m or less.

1 Drill holes and fit Corner Fixings where the net will turn a corner.

2 Drill holes and fit intermediate fixings at 1 m intervals in a straight line between the corner fixings.

3 Run 10 m of wire rope through the fixings of one side.

4 Attach one end of the wire rope to a corner fixing using a loop of wire and secure with either 2 ferrules (each crimped twice) or 2 wire rope grips.

5 Hook an opened barrel strainer to other corner fixing and thread the free end of the wire through the eye of the barrel strainer, and pull the rope tight. Secure the looped wire using 2 ferrules (each crimped twice) or 2 wire rope grips.

6 Run 10 m of wire rope through the fixings of one side.

To install the net itself, attach one corner of the net to the corner fixing using the net corner tie.

Hogging every mesh to the wire rope ensuring that the net is pulled tight and is square. Attach the other 3 corners using net corner ties. Trim off any surplus net.

Repeat steps 3 to 6 for the other three sides.

For nets larger than 10 m by 10 m
The only major differences for installing a larger net, is that you will need to install corner fixings every 10 m to spread the weight of the net. You may also need to install additional cross wires to prevent the net from sagging in the middle. e.g. 20 m x 10 m net.

Complex Net Installations
We recognise that some bird net installations are more complex than fixing a square net onto a flat surface. If you are uncomfortable about carrying out a complex installation, we recommend that you contact a professional and experienced bird management company.

BIRD NET RANGE

The range of mesh sizes available allows protection against all common species of urban bird pest. Choose from a variety of colours (black, stone and translucent) and no-flame to suit most situations. All Bird Nets have the corners marked with ties and the longest side identified with a label for ease of installation.

MESH	SPECIES	COLOURS	PRICE Black, Stone, Trans.	PRICE No-flame
19 mm (3/4")	House Sparrow	Black, Stone, Translucent & No-Flame	£1.46 m ²	£1.96 m ²
28 mm (1 1/8")	Starling	Black & Stone	£0.92 m ²	N/A
50 mm (2")	Feral Pigeon	Black, Stone, Translucent & No-Flame	£0.47 m ²	£0.60 m ²
75 mm (3")	Herring Gull & Lesser Black-backed Gull	Black	£0.46 m ²	N/A

CUT NETS

All cut nets are priced and cut to whole metre sizes. Please review the T&C's information before ordering this product.

As with the Stock nets, the product codes for Cut Nets make it easy for you to order. For cut nets, the code has a prefix of CUT followed by the mesh size, colour and dimensions of net you require (longest side X shortest side).

For example: For a Translucent 50 mm net of size 8 m x 7 m the code is: BCUT50T8X7

Please ensure that the size is not too big to handle. We do not advise you to handle a net larger than 900 m².

Minimum net size is 1 m x 1 m, and we are unable to cut nets to less than full metre units.

TO AVOID POSSIBLE ERRORS, PLEASE NOTE THAT WE WILL ONLY ACCEPT ORDERS FOR CUT NETS IN WRITING (VIA E-MAIL).

£POA

NO-FLAME NET (19 mm & 50 mm)

Designed to provide a cost-effective and safe solution for bird proofing in areas where people or combustible materials would be at risk, such as over fire escapes, under canopies and in warehouses. There are two main differences between a standard net and a No-Flame Net: whilst a standard net will continue to burn when a flame source is removed and will drop burning pieces of molten plastic; a No-Flame Net shrinks away from a flame reducing the amount of molten debris and minimising fire spread.

No-Flame Bird Net is a knotted polyethylene net made with UV stabilised, flame retarded 12/6 twine that does not absorb water and is chemically inert. It includes a red strand to clearly distinguish it from other nets when bundled but, when correctly installed, this identifier is virtually invisible.

No-Flame Net meets performance specification: BS5867

£POA

NET LABEL

NET LABEL: Advertise your net installation with the Bird Net Label. The PVC net label is weather resistant and can be easily hogringed or cable tied onto your installed net. The label can include: Your company name and/or logo, telephone number, website and/or email address.

The label size is 20 cm by 10 cm. Digitally printed to one side in up to four colours with four holes punched in the corners.

Minimum order: 50

Please contact the sales office for a quotation.

NET MAGNETS FOR CABLE

Net Magnets come in handy when drilling or screwing is not an option. These magnets are extremely quick to secure in place and can be useful for following contours of a metal substrate with a wire cable. Use Caution as these are not as strong as screwed fasteners. Holds up to 7 kg.

ORDER CODE	DESCRIPTION	PACK SIZE	PRICE
BMPT7610	Net Magnet for Cable	10	£32.25

STAINLESS STEEL PROFESSIONAL

INTERMEDIATE CLADDING FIXINGS

Angle Brackets: are fixed in position using Self Drill Screws or Self Tap Screws.

Bonded Washers: are available to provide a watertight seal under the screw.

Self Drill Screws: are installed using the Hex Drive Socket.

The **Multi-Purpose Cable Bracket** is a versatile stainless steel bracket that is screwed into position. Wire rope can be threaded through the hole or supported over the 'hook'. Barrel Strainers can be hooked into the hole if used as a corner fixing on a small net.

The **Stick-on Fixing** can be glued onto cladding, metals, lead flashing and glass. Ensure **Surface Activator** is used to pre-treat the fixings prior to gluing with **Avifix**.

ORDER CODE	DESCRIPTION	PACK SIZE	PRICE

STAINLESS STEEL PROFESSIONAL

BIRD NET BRACKETS

BNET275 - Pro External Corner Fixings Bracket

When running a straining wire around a corner, it can be difficult getting a fixing close to the corner to prevent damaging the straining wire or the building. This new bracket will help to solve this problem. Thanks to the angle of the hole, this bracket can also be used to fit a wire neatly up an outside corner of a building. Fixing holes 6 mm diameter.

BNET277 - Pro Capital Bracket 45 Degrees

This bracket replaces the original Capital Bracket. The angle of the hole allows the straining wire to be run either vertically or horizontally with the same fixing position of the bracket. Fixing holes 8 mm diameter (will accept BNET123 Dynabolt).

BNET278 - Pro 'Net Off' Slider

The Pro 'Net Off' Slider replaces all four previous 'Net Off's'. It will support straining wire 105 mm to 210 mm from the substrate in places where the net needs to be held away from a protrusion to help prevent abrasion damage to the net. Fixing holes 6 mm diameter. Tighten the nuts with 10 mm spanners.

ORDER CODE	DESCRIPTION	PACK SIZE	PRICE
1: BNET275	External Corner Fixings Bracket	Each	£12.54
2: BNET277	Capital Bracket 45 Degrees	Each	£6.73
3: BNET278	'Net Off' Slider	Each	£7.76

WIRE ROPE CORNER FIXINGS >10 m / EXPOSED HORIZONTAL NET >20 m

In some circumstances where the length of wire rope exceeds 10 m or for exposed horizontal net greater than 20 m, it may not be feasible to fit a corner fixing in the middle of the wire rope span. Therefore it is important that you choose the fixings and wire rope that are strong enough to hold the weight of the net.

ORDER CODE	DESCRIPTION	PACK SIZE	PRICE
1: BNET089	Wire Rope, 3 mm diameter	100 m	£40.33
2: BNET326	Barrel Strainer, M8	Each	£4.18

WIRE REEL HOLDER

The Wire Reel Holder has been specifically designed to hold wire rope reels for bird work. It allows you to pull off the wire as required to help avoid wire tangling or reels rolling away. The reel simply drops on to the centre spindle, and the retaining pin clips in place to hold it on. This handy tool can save you a lot of installation time and frustration.

ORDER CODE	DESCRIPTION	PACK SIZE	PRICE
BNET208	Wire Reel Holder	Each	£24.98

ROOF NET FIXINGS

STAINLESS STEEL PROFESSIONAL

ROOF CORNER & INTERMEDIATE BRACKETS

These sturdy stainless steel Dormer Brackets are designed to look acceptable above dormer windows on private houses, but they can also be used in a variety of other situations, such as on parapet walls. Pigeon and Gull brackets are available, and Dynabolts should be used to secure the brackets in place.

ORDER CODE	DESCRIPTION	PACK SIZE	PRICE
BNET270	Corner Bracket, Pigeon, 240 mm	Each	£35.90
BNET271	Intermediate Bracket Pigeon, 240 mm	Each	£26.75
1: BNET272	Corner Bracket, Gull, 360 mm	Each	£40.46
2: BNET273	Intermediate Bracket, Gull, 360 mm	10	£34.99
3: BNET123	Pro Dynabolt, M6	Each	£20.33

STAINLESS STEEL PROFESSIONAL

ROOF INTERMEDIATE FIXINGS

Stainless steel Roof Spikes are designed to hold the wire rope above roof ridges. These spikes are hammered through the mortar between the ridge tiles into the wooden joist below. The rod is 520 mm in length, 10 mm in diameter, with a 3 mm hole in the top for the straining wire. The holes can be weatherproofed with a Roof Spike Seal and glued in place with Avifix. The Two Way Slate Bracket slips between adjoining slates to hold the wire rope close to the surface of the roof. It is designed to allow the wires to be attached horizontally or vertically.

ORDER CODE	DESCRIPTION	PACK SIZE	PRICE
1: BNET190	Roof Spike, 520 mm	Each	£11.17
2: BNET274	Two Way Slate Bracket	10	£21.21

STAINLESS STEEL PROFESSIONAL

ROOF RIDGE FIXINGS

This Bracket holds the straining wire above a roof ridge. Half-Round Ridge Brackets rods on the brackets are 450 mm in height. Half-Round Brackets are designed to clamp under the edge of the ridge tiles.

ORDER CODE	DESCRIPTION	PACK SIZE	PRICE
BNET183	Half-Round Ridge Net Bracket	Each	£15.88

ROOF INTERMEDIATE FIXINGS

Increasingly, large roofs are being proofed to protect against pigeons and gulls. In most circumstances, it is not feasible to drill into the roof itself, so net supports that can be weighted down are required. As no two roofs are the same, the supports need to be adaptable to fit different roof shapes, angles and obstacles.

The patented Roof Mount far exceeds these criteria. It is light-weight, very easy to handle, extremely versatile and allows fast installation.

ORDER CODE	DESCRIPTION	PACK SIZE	PRICE
BNET950	Roof Mount Base Includes: Includes: 1 x Main assembly (2x hips 1 upright support, 2x end caps, 1 clamping rod) 4x Feet & 10 x 19mm self drill screws	Each	£88.35
BNET951	Roof Mount Legs Includes: 4x Legs (0.55 m)	Each	£45.50
BNET952	Roof Mount 1 m Upright Includes: 1x 1m Pole & 1x Sleeve	Each	£36.40
BNET953	Roof Mount 2 m Upright Includes: 1x 2 m Pole & 1x Sleeve	Each	£45.50
BNET960	For Standing Seam Ridges	Each	£19.64

GULL PARALLEL WIRE ROOF SYSTEMS

An alternative to a roof net installation for gulls is to use the same brackets and same perimeter straining wire as for a net installation, but to fit a series of parallel orange coated 1.2 mm wires instead of a net.

ORDER CODE	DESCRIPTION	PACK SIZE	PRICE
BNET926	Wire Rope, 1.2 mm orange	100 m	£42.36
BNET321-100	Copper Ferrules, 2.5 mm diameter	100	£10.98

NET CLIPS, ZIPS & STAPLES

NET CLIPS

Bird Net Clips are made from stainless steel, blend well into the net and are easy to install. Sometimes access is required through netting for maintenance or cleaning.

To help other contractors carry out this work, access systems can be installed into the net at appropriate points.

ORDER CODE	DESCRIPTION	NET MESH	PACK SIZE	PRICE
BNET167	Net clips, small	19 mm	100	£18.35
BNET169	Net clips, large	50 mm	100	£30.23

NET ZIPS

Bird Net Zips are made entirely of non-corroding materials and are very robust. They are easier to open and close than net clips, but are more noticeable in the net. They are available in two sizes: No. 10 size for 19 mm and 50 mm mesh net and No. 5 size for 28 mm mesh net. The zips can be stitched into the net with repair twine, or they can be hog-ringed in.

CABLE TIES & S-CLIPS

CABLE TIES: Manufactured from rugged nylon 66 material, the ties simply wrap around the bird spike strip and the object to which they are being attached and pull tight. Any excess protruding cable tongue can be snipped off for neatness and to attach to bird spikes to bulkier items, the cable ties can be daisy chained together to form a longer strap.

S-CLIPS: Moulded black HDPE plastic clip, UV stabilised for outdoor use as either a netting to perimeter fixing or netting access / repair fixing allowing the net to be easily demounted for access and servicing procedure on equipment that may be behind the net.

ORDER CODE	DESCRIPTION	PACK SIZE	PRICE
BMIS032	Cable Ties 200 mm	100	£7.35
BMIS033	Cable Ties 432 mm	100	£11.17
BNET350	S Clips	200	£7.73

NET REPAIR TWINE

Bird Net Repair Twine can be used for repairing holes or for sewing in zips.

ORDER CODE	DESCRIPTION	LENGTH	PRICE
BNET070	Net Repair Twine, Black, 12/6	150 m	£3.12

NEW

SCREW EYE DRIVER

The Screw Eye Driver is a small attachment used for installing Screw Eyes into wood surfaces. The Screw Eye Driver attaches into the chuck of a hand drill for fast and easy installation. Use to quickly install Screw Eyes into wood surfaces.

ORDER CODE	DESCRIPTION	PACK SIZE	PRICE
BNET036	Screw Eye Driver	Each	£23.36

HOGRING STAPLER

Hogring staplers are essential tools for fixing the net to the Wire Rope. The Pro Hogring Stapler, P7 is designed for speedy one-hand operation and holds 50 Hogring Staples.

ORDER CODE	DESCRIPTION	PACK SIZE	PRICE
BNET009	Hogring Stapler, P7 (Stanley Bostich)	Each	£62.49

RATCHET CRIMPING TOOL

The Pro Ratchet Crimping Tool is specially designed for crimping 2.5 mm ferrules to the Wire Rope.

ORDER CODE	DESCRIPTION	PACK SIZE	PRICE
BNET022	Ratchet Crimping Tool	Each	£112.63

FELCO C7 WIRE CUTTERS & N7 WIRE CUTTERS

The heavy-duty Pro Felco C7 Wire Cutters are ideal for regular use and essential to ensure the Wire Rope is cut cleanly. The N7 Wire Cutters are ideal for the 'one-off' job but are not recommended for regular usage.

ORDER CODE	DESCRIPTION	PACK SIZE	PRICE
1: BNET050	Felco C7 Wire Cutters	Each	£71.07
2: BNET171	N7 Wire Cutters	Each	£31.23

NET SHEARS

Heavy-duty sprung Net Shears with stainless steel blades are a valuable tool for cutting and trimming nets.

ORDER CODE	DESCRIPTION	PACK SIZE	PRICE
BNET136	Net Shears	Each	£8.03

NUT SPINNER

The 7 mm Nut Spinner should be used when tightening Wire Rope Grips.

ORDER CODE	DESCRIPTION	PACK SIZE	PRICE
BNET049	Nut Spinner, 7 mm	Each	£13.79

DRIVE SOCKETS

These Drive Sockets are designed for quick installation of Screwpins, Screw Eyes and Self Drill Screws respectively.

ORDER CODE	DESCRIPTION	PACK SIZE	PRICE
1: BNET207	Screwpin Drive Socket	Each	£10.29
2: BNET134	Hex Drive Socket	Each	£6.67

DRILL BITS

SDS MASONRY DRILL BITS FOR USE WITH SDS DRILLS

Professional installers should use either 110 V drills or battery drills. More powerful drills are available. Special Direct System (SDS) drills use drill bits with fluted ends that allow power to be transferred to the drill bit more efficiently than standard chucks.

Listed below is the choice of drill bits available together with the appropriate fixing.

ORDER CODE	DESCRIPTION	PACK SIZE	USE WITH	PRICE
BDR1020-10	SDS 4.8 mm x 50mm	10	Net Spike	£24.52

AVICLIPS FOR GUTTERS

Aviclips for Gutters fit securely onto the base of Avipoint™ P14, P20, P32 and G20 Bird Spikes. The Aviclips for Gutters allows the spike strips to be clipped onto the side of a wide variety of different types of gutters, allowing free flow of water underneath. Two clips are required per Avipoint™ strip.

Aviclips for Lipped Gutters fit securely onto the base of Avipoint™ P14, P20, P32 and G20 Bird Spikes. They allow the spike strips to be clipped onto the side of a variety of lipped gutters, including many international style gutters, allowing free flow of water underneath. Two clips are required per Avipoint™ strip.

ORDER CODE	DESCRIPTION	PACK SIZE	PRICE
BAVI162	Aviclips for Gutters	10	£3.78
BAVI163	Aviclips for Lipped Gutters	10	£3.83

AVICLIPS FOR WINDOWS

Aviclips for Windows fit securely onto the base of Avipoint™ P20, P32 and G20 Bird Spikes. They allow the spike strips to be easily secured onto window frames using Avifix White adhesive or screws. These clips are extremely useful as they allow the spikes to protect the window sill without hindering the operation of the window. Two clips are required per Avipoint™ strip.

ORDER CODE	DESCRIPTION	PACK SIZE	PRICE
BAVI171	Aviclips for Windows	10	£4.87

AVICLIPS FOR BEAMS

Aviclips for Beams fit securely onto the base of Avipoint™ P14, P20, P32 and G20 bird spikes. They allow the spike strips to be clipped onto beams up to 35 mm thick and 40 mm to 230 mm deep. The clips should be used where you cannot glue the Avipoint™ Bird Spikes onto the Beam. The clips and attached spikes can be removed if access to the beam is required for maintenance, cleaning or painting. Two clips are required per Avipoint™ strip.

ORDER CODE	DESCRIPTION	PACK SIZE	PRICE
BAVI181	Aviclips for Beams	10	£3.83

AVICLIPS FOR SOLAR PANELS

Designed to fit both solar panels and roof ridges it is easily glued or screwed in to place. Avipoint clips securely into place and is compatible with P14 and P20, P32 & G20.

Made from a UV stable polycarbonate material which is compatible with 90°, 105° and 125° roof tiles and compatible with both 45° and 37.5° solar panels.

ORDER CODE	DESCRIPTION	PACK SIZE	PRICE
BAVI191	Aviclips for Solar Panels	10	£3.97

750 ml

BIRD STOPPER

The SnapFast BirdStopper is an easy to fit and effective solution for preventing birds from accessing the underside of solar panels.

The unique clip-on solution allows the pest controller to pre-cut the desired lengths, then simply clip the product into place. This minimizes the amount of time the pest controllers needs to spend working from heights - no more cutting and screwing whilst on the rooftops.

Unlike some other solutions, it is also easy to remove and re-attach which allows easy access for maintenance of the panels. Made from sturdy recycled plastic.

GULL RIDGE BRACKETS

Both brackets have three Gull posts attached.

ORDER CODE	DESCRIPTION	PACK SIZE	PRICE
BBIR161	Triangular Gull Ridge Bracket	Each	£9.29
BBIR163	Half-Round Gull Ridge Bracket	Each	£10.74

ENERGISERS

SMALL

LARGE

The Energiser sends a pulse of electricity along the Avishock™ track every 1.3 seconds. The pulse lasts only a fraction of a second and is indicated by a quiet click and a small flashing light. The energisers are powered simply by plugging them into a power socket.

For added safety, all energisers are supplied with a detachable lead so it can be removed when the system is being worked on. Energisers must be installed in an upright position.

The Small Energiser is designed for a run of Flex-Track up to 150 m. The Large Energiser is designed for Flex-Track runs between 150 m and 300 m.

The Small Energiser is designed for a run of Flex-Track up to 150 m.

The Large Energiser is designed for Flex-Track runs between 150 m and 300 m.

ORDER CODE	DESCRIPTION	PACK SIZE	PRICE
BSHK040	Small Energiser	Each	£148.19
BSHK120	Large Energiser	Each	£179.39

AVISHOCK TRACK

The unique Avishock track is supplied in 20 m lengths and offers simple installation from an easy to handle reel. The UV stable track incorporates copper strips, covered by a conductive plastic cover, protecting the strips from weather and corrosion.

Avishock™ track is available in two colours to match most common buildings.

AVISIL & AVIFIX HIGH TACK

AVISIL

For use with a caulking gun, this is a professional product that cannot be found in DIY shops. Avisil is vastly superior to ordinary clear DIY silicone due to it's ease of application, it stays permanently elastic after curing, Avisil has a high temperature resistance and UV resistance. A clear, high quality, neutral-curing silicone adhesive, Avisil is recommended for use where the surface is dry. It offers excellent adhesion on most building materials. One tube (310 ml) of Avisil can install up to 15 m of Avipoint Bird.

AVIFIX HIGH TACK

For use with a caulking gun, this is a professional product that is superior to general purpose high tack adhesives, found in DIY shops. This is due to it's flexible elastic rubber movement, which accommodates up to 20 %, and because it gives primerless adhesion even on damp surfaces. A multipurpose, high tack adhesive. Avifix "High Tack" can be used for fixing AVIPOINT™ Bird Spikes where the surface is damp. It offers outstanding initial grab and excellent adhesion on most building materials such as brick, stone, metal, glass, wood, PVC, GRP and nylon.

4

The Digital Voltage Tester is required to ensure that the system is sending the correct amount of electricity. Solid connections are a must for a long-lasting installation. - Use the middle setting (1.5-2 mm) (Blue) of the Connector Crimp Tool to deliver the perfect crimp. The Wire Stripping Tool easily strips lead wires. Use the 2.6 mm setting and strip 10 mm from the end of the lead wire. - Avishock™ Track Shears are a valuable tool for cutting the Avishock™ track and lead wire.

Warning signs should be positioned wherever a person may gain access to the system or at 5 m intervals on an open wall. Hard wearing rigid Warning Plates can be glued or screwed to the ledge or side of the building. Double sided Window Warning Stickers should be stuck onto a window if the sill or ledge associated to it is protected with AVISHOCK.

BIRD MESH & PROOFING

WELD MESH FOR BIRDS

Galvanised welded wire square mesh is an ideal solution for preventing bird access. The benefit of using a welded square mesh is the range of wire thicknesses available, roll thickness or mesh panels sizes.

ORDER CODE	DESCRIPTION	PACK SIZE	PRICE
BMIS073	Pigeon/Starling Weld Mesh	6 m	£36.00
BMIS072	Pigeon/Starling 25 mm x 25 mm	30 m	£170.62
BMIS088	Pigeon 50 mm x 50 mm	25 m	£272.28
BMIS075	Sparrow 25 mm x 12.5 mm	6 m	£33.13
BNET057	Weld Mesh Clips, 5 mm hole	50	£26.87

SOLAR PANEL MESH & CLIPS

This innovative system is designed specifically to keep all creatures from getting under solar arrays, protecting the roof, wiring and equipment from their damage. This non-penetrating system is fast and easy to install, and can be removed for service. The Solar Mesh Clips are recommended every 18 inches. Tin Snips and other basic tools required for Installation.

ORDER CODE	DESCRIPTION	PACK SIZE	PRICE
BSLRMESH	50 ft x 8 inch Mesh	15 m	£110.31
BSLRCP10	Solar Clips	10	£25.91

CHIMNEY SPIKE

Heavy-duty spike designed to prevent seagulls from nesting in small areas on roofs. Made from 3 mm stainless steel rods, it can be bent in place to protect areas such as chimney pots, between the slope of a roof and the chimney stack. Recommended to be used in conjunction with Avipoint G20 Bird Spikes. Supplied flat packed.

ORDER CODE	DESCRIPTION	PACK SIZE	PRICE
BCHI001	Chimney Spike	Each	£11.93

CHIMNEY GUARD

The Chimney Guard is a device designed to keep birds from landing on chimney pots. Made from black painted mild steel, the Chimney Guard will fit most standard size chimney pots. For roof work, we also supply the Ladder Stopper that prevents a ladder from slipping on any surface and the Ladder Clamp that secures your ladder on the top of your vehicle for transportation.

ORDER CODE	DESCRIPTION	PACK SIZE	PRICE
BMIS125	Chimney Guard for Roofs & Chimneys	Each	£20.03

DADDI LONG LEGS

This system has a freely rotating head with long stainless steel wires that bounce in the wind or when birds contact it. This not only irritates the birds, but also interferes with their attempts to land or take off. The device can be screwed in place through the 3 mounting holes. If it is to be glued in place the Plastic Stick-on-Base (BDAD005) will be required.

ORDER CODE	DESCRIPTION	PACK SIZE	PRICE
BDAD001	1.25 m diameter Daddi Long Legs	Each	£60.21
BDAD002	2.5 m diameter Daddi Long Legs	Each	£78.03
BDAD005	DLL Plastic Stick-on-Base (inc. 3 screws)	Each	£5.50

PRICKLER STRIP

Mainly used on top of garden walls and fences to protect against cats. It has also been used successfully against light pressure pigeon infestations in areas where height is restricted and for short-term problems on window sills where crows are perching.

ORDER CODE	DESCRIPTION	PACK SIZE	PRICE
BMIS003	Prickler Strip (46 cm x 5 cm)	Each	£2.34

PIGEON TRAPS

All pigeon traps are flat packed and easy to assemble. When assembled, the dimensions are 1 m x 60 cm x 30 cm. Two sets of 'bob-wire' entrances are supplied as standard in all the traps. If required, these can be replaced with ground funnel entrances, available as an optional extra.

ORDER CODE	DESCRIPTION	PACK SIZE	PRICE
BTRA029	Feral Pigeon Trap with floor	Each	£108.21
BTRA050	'Foldaway' Feral Pigeon Trap no base	Each	£75.31
BTRA031	Ground Funnels	Pair	£22.94

SPARROW TRAPS

This is a rigid multi-catch trap with two one-way entrance tunnels leading to a trapping section. From here a further one-way entrance tunnel leads to the holding section. Dimensions: 62 cm x 35 cm x 22 cm

ORDER CODE	DESCRIPTION	PACK SIZE	PRICE
BTRA007	Sparrow Cage Trap	Each	£66.62

BIRD TRAPS & SCARING DEVICES

SPARROW TRAP DOOR

The Sparrow "Trap Door" was specifically designed to provide a discrete, gentle, hygienic, and cost-effective way to get small birds out from buildings. When set, the "Trap Door" is simply a welcoming platform with food. To increase the effectiveness of the trap, an audio module imitating a variety of sparrow calls is sold with this unit.

ORDER CODE	DESCRIPTION	PACK SIZE	PRICE
BPT7200	Sparrow Trap Door with Audio Module	Each	£252.97

HUMANE BIRD DISPATCHER

A special tool available to ensure that bird control is achieved in the correct, humane manner. Suitable for use in pest control, game bird management and poultry care. High quality British made product. An essential tool for the professional bird controller.

ORDER CODE	DESCRIPTION	PACK SIZE	PRICE
BMIS020	Semark Dispatcher	Each	£54.23

LASER STRIKE

Precision bird scaring laser - intended only as a bird scaring device for professional users - keep out of the reach of minors. The Laser Strike uses optical quality precision lenses and components and has been specifically developed for use as a safe, effective, silent, bird scaring tool which is ideal for agricultural use in built-up areas and buildings where loud noises are a problem to livestock and the general public.

ORDER CODE	DESCRIPTION	PACK SIZE	PRICE

AN AWARD winning

COMBINATION

Charles Phillips
MBA M.Sc
COMMERCIAL
DIRECTOR

Charles has extensive experience in leading the development and integration of existing and new products into global markets as well as the strategic and tactical growth for brand expansion into new territories. In addition to his formal qualifications, he has specialist knowledge in biological control and insect attractants/ repellents and control with pheromones as well as the regulatory requirements of these active ingredients.

Paul Fisher
SALES &
COMMERCIAL
DIRECTOR

Paul has spent over 20 years of his pest control career in the service sector specialising in areas such as the Food & Beverage and Pharmaceutical sector as well developing his career into Corporate Account Management overseeing & supporting some of the most recognised brands throughout the UK and around the world. Having joined the BEH team Paul is keen to build on the strong customer-focused experience that BEH pride themselves whilst continuing to provide our customers with the good, honest product & technical support that they deserve.

Will Kirkpatrick
UK SALES
MANAGER

Will has over 16 years experience in the pest control industry. Will has worked much of his career in operational roles and holds RSPH Level 2 qualification. With extensive field knowledge Will is available for site visits and advice for those challenging pest issues that need additional support. For all practical advice, Will will be happy to provide his support by telephone or in-person.

Ellen Rogers
SENIOR
ACCOUNT
SALES MANAGER
& EXPORT

Ellen has been with Barretine for over 20 years and has excellent knowledge of the pest control industry. Ellen has shown this by passing the Lantra Rodent Control course, Wildlife Aware and IATA dangerous goods certification. Ellen is always willing to help with any technical query, quotations and advice with treatments.

Josh Randall
TECHNICAL
SALES MANAGER

Josh has 9 years experience in the pest control industry. His qualifications include RSPH 2, a number of industry standard training certificates as well as an approved BASIS NSK. He is available for site visits and technical advice.

Carly Richards
ADMIN TEAM
LEADER
& TRAINING
CO-ORDINATOR

Carly has a great knowledge and understanding of the pest control industry. This has been demonstrated by passing numerous pest control courses including Lantra rodent, bird & insect control.

Carly has a customer service level 3 (NVQ) and is happy to help with any quotations, technical queries and advice regarding most aspects of pest control.

PEST CONTROL CATALOGUE 2021

If you are unsure which insecticides can be applied through the various applicators, then please see our A-Z charts within the Technical Section to the rear of the catalogue.

DYNA-FOG HURRICANE

ULV/misting electric portable aerosol applicator, dispenses both OIL and WATER-BASED liquids. Adjustable output up to 19 litres/h. Available with tank float valve for continuous operation. Particle size: 5-50 microns (mmD). Tank capacity: 3.8 L. Weight: 3 Kg. Metering valve to control output and droplet size.

Each

ORDER CODE: BFUDYHU2

£593.38

B & G MODEL 2600 FOGGER (240V)

A robust plastic fogging machine with directional hose and flow adjustment knob. 110 volt option also available.

Each-18" Hose

ORDER CODE: BFOBG262

£371.56

Each-48" Hose

ORDER CODE: BFOBGR61

£397.53

DYNAFOG CYCLONE - ULV FLEX HOSE

18" flexible hose with adjustable nozzle. Suitable for hard-to-reach areas. Tank capacity: 3.8 L. Weight (empty): 4.8 Kg.

For similar unit with higher tank capacity see Dynafog Tornado.

Each

ORDER CODE: BFODYCFH

£1124.31

DYNAFOG TORNADO ULV

Multi-range adjustment allows flow range from 19 litre per hour down to ULV range. Ideal for humidity and pest control in warehouses/greenhouses etc. Tank capacity: 11.4 L. Weight (empty): 9.1 Kg.

Each

ORDER CODE: BFOTO240

£1186.77

FOGGERS

APPLICATION equipment PRODUCTS

DYNAFOG CYCLONE ULV

The Cyclone ULV Ultra-precision meters particles under 20 microns at any flow rate and viscosity. Ideal for pest control in Warehouses/greenhouses etc.
Tank Capacity: 3.8 L. Weight (empty): 4.25 Kg. 110 volt option available.

Each

ORDER CODE: BFODYCY2

£944.72

IGEBA NEBULO

Manufactured from strong durable resistant thermoplastics. Powerful electric motor producing greater aerosol volume, at higher velocity, with deeper penetration. More uniform droplet spectrum. Droplet size can be regulated by increasing or decreasing the solution flow.

Each-48" Hose

ORDER CODE: BFOINEBU

£585.45

IGEBA NEBUROTOR

Similar to the Nebulo but this unit can be set to rotate between 90 and 360 degrees. The Neburotor can also be fitted to the wall by means of a wall support.

Each

ORDER CODE: BFOINERO

£738.25

SS MINI FOGGER

Constructed of corrosion resistant materials and available in 110V and 240V, it is designed for jobs where a smaller and less expensive fogging machine is desirable.
User friendly. Use the rotary valve to adjust the output size, 15-40 microns, adjustable.

Each

ORDER CODE: BFOSSMIN

£278.34

FONTAN STARLET ULV FOGGER/LV

The Fontan Starlet ULV/LV cold fogger is portable and has a spray gun that has a trigger for intermittent fogging and a locking device for continuous operation. The Fontan Starlet can either be operated in the ULV (Ultra Low Volume) or in the LV (Low Volume) spraying mode. Perfect for treating buildings, outdoor waste sites and is especially suited for disinfection purposes.

Each	ORDER CODE: BFOFOSTA	£1,946.55
------	----------------------	-----------

SWINGFOG SN50

This machine is versatile, powerful and with a chemical auto cut off device, offers a choice of application methods. These products are made from top quality materials that will ensure many years of service, and all parts that come in contact with chemicals are made from stainless steel.

Each	ORDER CODE: BFOSWSN5	£1,998.77
------	----------------------	-----------

ULV APPLICATOR

A simple robust Ultra low volume applicator for use to apply Grain-Tect ULV and K-Obiol formulations to grain. Kit includes pump, nozzle, air and liquid transfer tubing pressure regulator.

CHEMICAL SPILLAGE KITS

VAN SPILLAGE KIT

A quality spill kit with an economical clear out. Great for absorbing oil, fuel & mild chemical spills up to 20 litre Ideal to keep in the van, cab, garage, warehouse, site or depot.

Each

ORDER CODE: BBIP0120

£POA

CHEMICAL STORE SPILLAGE KIT

Covers up to 15 litre spillages of hazardous liquids. The kit contains ten large chemical absorbent pads, two chemical absorbent socks, one instruction sheet and two disposal carry bags & ties. Every chemical store should have one.

Each

ORDER CODE: BBIP0123

£POA

POLVO POWDER

Polvo comes as a super-absorbent powder for any spillages (from insecticides to paint to 'body fluids') - ideal for the van, stores or even as a sell-on. Polvo Powder is an inert mineral, and due to its extremely fine granular structure, it completely absorbs the spill within itself. The spill is prevented from spreading and is absorbed to a point that it can be cleaned up leaving a slip-free surface that is residue-free.

WEPALM HAND SANITISER DISPENSER & REFILL POUCH

Use our cost effective top up system & save money and time! WePalm hand sanitiser comes in easy to store, easy refill pouches. Made with a synergistic blend of detergents to provide a mild but thorough cleaning and sanitising action. With its skin friendly sanitising, cleaning and moisturising action, it allows constant use in catering/kitchen areas, hospitals, nursing homes and can be mounted inside a pest control vehicle for ease of action & access. Once dispensed, produces a pre-lathered foam. The spread-ability of the foam increases the cleaning and disinfecting performance, getting to areas such as in-between the fingers where bacteria hide. Used in conjunction with our pump action dispenser that does not rely on battery operation to provide further cost savings. Complies to BS EN 13727, 13624, & 14476. BPR compliant

LEPTOSPIROSIS**

GUANAWAY & GUANAWAY RTU

Disinfectant and cleaner for use with the cleaning up bird waste, kills fungi associated with bird droppings. Unlike other products, Guanaway is a powerful alkaline cleaner degreaser that neutralises the acidic by-product associated with bird droppings. This reduces the damage to the stonework and increases safety by removing the slippery, greasy waste. Also available as a handy RTU trigger spray version ideal for those small jobs when making up a full sprayer isn't justified. Ideal for disinfecting traffic lights, as it won't discolour plastic.

A GUIDE TO THE BARRETTINE RANGE OF PERSONAL PROTECTIVE EQUIPMENT COSHH AND PPE REGULATIONS

The COSHH Regulations 2002, as amended in 2003 and 2004 are a key part of health and safety at work. The regulations place a legal requirement on all employers and operators including self-employed people to undertake an assessment of the risks created by exposure to any substances hazardous to health. The risk assessment shall include consideration of the hazardous properties of the substance, manufacturers information contained in any material safety data sheet, the level and type of duration of exposure, working circumstances and other factors relating to exposure limits, control measures etc.

The COSHH amendment Regulation 2004 which came into force on 1st April 2005. It introduced a new framework of adequate control of exposure by specifying principles of good practice (Schedule 2A) and by replacing occupational exposure standards (OES's) and Maximum Exposure levels (MEL's) with workplace exposure limits (WEL's).

The Personal Protective Equipment Regulations 1992 require that where PPE is issued it must be suitable for the task for which it is required, and it must take into account the demands it places on the worker. It must be maintained in good condition and stored when not in use in a clean cabinet or container.

What does this mean to you?

The provisions make the duty holders focus on applying principles of good practice to controlling exposure rather than compliance with any OEL. (Schedule 2A)

This has the effect of bringing into the definition of adequate control all substances within the scope of the COSHH regulations, irrespective of whether they have an OEL, and all routes of exposure i.e. inhalation, absorption and ingestion and injection. It is now accepted that it is not possible to give a "Safe limit" as before because in practice a guarantee for health protection for all individuals, even if exposure is below a specified limit, is not scientifically secure.

The revised system of WEL's will be set by the advisory committee on toxic substances (ACTS). These are listed in a publication EH40-2005. There is a specific WEL values in Table 1 for all substances. The WEL value is a limit that must not be exceeded and there is a duty, similar to the previous regulations, to ensure adequate control and to reduce exposure as far as possible.

The amendments to COSHH should make it easier for enforcers and duty holders to determine whether exposures to substances are adequately controlled and proportionate to the risk.

As part of the Barrettine professional services, we have available qualified COSHH Consultants who are able, on a fee basis, to undertake COSHH Assessments and preparation of COSHH documentation for our customers, as well as being able to define the personal protective equipment required in the specific situations encountered by our customers. In addition we are happy for our staff to offer advice, at no charge, on the level of protection required in applying and using any of the PPE products which we offer as part of our Technical Sales Service to our customers.

Schedule 2A

Principles of good practice for the control of exposure to substances hazardous to health.

The eight principles of good practice for the control of exposure to substances hazardous to health are set out in Schedule 2A of The Control of Substances Hazardous to Health Regulations 2002 (as amended). Approved Code of Practice and guidance .

The principles are reproduced below:

- (A) Design and operate processes and activities to minimise emission, release and spread of substances hazardous to health;
- (B) Take into account all relevant routes of exposure - inhalation, skin absorption and ingestion - when developing control measures;
- (C) Control exposure by measures that are proportionate to health risk;
- (D) Choose the most effective and reliable control options which minimise the escape and spread of substances hazardous to health;
- (E) Where adequate control of exposure cannot be achieved by other means, provide, in combination with other control measures, suitable personal protective equipment;
- (F) Check and review regularly all elements of control measures for their continuing effectiveness;
- (G) Inform and train all employees on the hazards and risks from the substances with which they work and the use of control measures developed to minimise the risk;
- (H) Ensure that the introduction of control measures does not increase the overall risk to health and safety. If employers apply the principles correctly, exposure should be below any relevant WEL. Control by personal protective equipment should only be used when other measures are not reasonably practicable. The list of WEL's applies to concentrations of hazardous substances breathed in by the worker and are used to determine the adequacy of control measures. There are several publications, which give advice and guidance on what is required under the COSHH Regulations.

Regulation 7 COSHH 2002. Fit Testing of Facepieces

The performance of RPE with a tight-fitting facepiece (filtering facepieces, half and full full-face masks) depend on a good contact between the wearer's skin and the face seal of the mask. A good face seal can only be achieved if the wearer is clean-shaven in the region of the seal and the facepiece is the correct size and shape to fit the wearer's face. Employers should ensure that the selected facepiece (tight and loose fitting types) is of the right size and can correctly fit each wearer. For a tight-fitting facepiece (filtering facepieces usually known as disposable masks, half and full face masks) the initial selection should include fit testing to ensure the wearer has the correct device. Barrettine can advise customers about this requirement.

WHY CHOOSE BARRETTINE?

WHY CHOOSE BARRETTINE AS YOUR PREFERRED SUPPLIER?

QUALITY PRODUCTS

As well as working directly with the key major Biocide Manufacturers, Barrettine manufacture and source a fantastic wide range of products, many of which are award-winning, helping you and your business to stay ahead.

Discretion is key. We're not your competitor!

Unlike some other distributors we are careful how and where product prices are displayed.

Our products are only sold to qualified Pest control Companies/ Technicians or recognised distributors with appropriate facilities.

TECHNICAL SUPPORT, PRODUCT STEWARDSHIP, REGULATORY & LEGISLATIVE UPDATES.

Professional products are only sold onto qualified/competent personnel that can demonstrate they have the required training and qualifications.

QUALIFIED STAFF

Barrettine at the heart of our Industry, constantly update Customers with the ever-changing regulatory & legislative issues we must implement. A number of Barrettine staff represent the company and the Industry within a number of independent bodies and organisations such as the BPCA, NPTA & CRRU.

TRAINING

Barrettine is a Lantra approved Training provider have put together a number of excellent, independent and recognised training courses to help support your business, your staff & colleagues. Contact the Sales office for further information.

FREE INSECT ID

From an independent industry-leading entomologist, quick and easy and free to our Customers.

LICENSED WASTE TAKE BACK SCHEME

(Full document available on request)

Barrettine Environmental Health (Barrettine) understands its business activity and any potential impact this may have on the environment. We are proud to hold the Environmental Management ISO14001 certification and as a responsible business see that a products life from cradle to grave is an essential part of environmental protection and management.

As such we are pleased to provide a waste scheme for our customers helping them to demonstrate their duty of care with regards to waste disposal by offering a fully compliant waste scheme. Barrettine working directly with the Environment Agency have put together a comprehensive and approved waste take back scheme.

Barrettine is a registered Hazardous Waste Transfer Site. Our environmental permit number is EPR/CB3001UB. (Full document available on request).

BARRETTINE GROUP CORPORATE & SOCIAL RESPONSIBILITY

(Full policy document available on request)

We recognise that we must integrate our business values and operations to meet the expectations of our stakeholders. This includes our Customers, Employees, Investors, Suppliers, the Community and the Environment.

The Board of Directors supports this principle and the aim of our full policy is to translate this into guidelines, standards and actions that set a common approach for all employees within our Business.

PURPOSE & AIMS

The Barrettine Group Mission is:

- To enhance our expertise in our key Business activities; Chemical Formulations, Chemical Products, Chemical Handling, Biocides & Product Development.
- Give priority to Customer service and Flexibility
- Offer value for money, Sustainable Products & Services that meet the demands of our Customers and markets, whilst being acceptable to the Environment.
- Target and achieve the highest quality standards in all we do.
- Honesty & Integrity, Always Trustworthy

These core values continue to help us achieve our overall objective; A strong performing business respected by our Customers & Supply Partners, envied by our Competitors.

CODE OF BUSINESS ETHICS

We recognise that good CSR embraces all aspects of sustainable development and the way we affect people through our business operations. Therefore, our CSR applies to all of the operations of the Company and its subsidiaries and sets out the minimum standards expected from staff in their internal and external dealings with colleagues, customers, stakeholders and third parties.

Our full range of policies cover: Employees - Equality - Human Rights - Modern Slavery - Environment - Quality Control - Sustainability - Impact on society - Ethics & Ethical Trading.

ENVIRONMENT

ISO 14001 Standard.

(Full Environmental Policy available on request)

QUALITY MANAGEMENT SYSTEM

ISO 9001 Standard. (Full policy available on request)

SUSTAINABILITY - IMPACT ON SOCIETY - ETHICS AND ETHICAL TRADING

(Full policy document available on request).

- Our Sustainable policy will be maintained and it sets out the principles, policies and procedures on which sustainable business activity within Company will be based. The policy acts as a prompt to staff to consider sustainability as a factor in all key decisions;
- We take steps to understand how we can most effectively support the needs of the local and wider community and implement initiatives accordingly; A number of Charities are supported by both the Business as well as individual Employee fundraising events.

TOTAL SERVICE

- Barrettine strive to complete your order and deliver next day, we will always advise if there are any issues beforehand.
- A full competitive package. We will do our best to match, or beat any price on offer.

MORE THAN JUST A SUPPLIER.

A true partner to support your business, the right Chemistry!

PRODUCTS 

The following charts have been produced only as an aid in product selection. In all circumstances you should always read the product label. The information given is to the best of our knowledge and is given in good faith. We can not accept any responsibility for loss or damage arising from any error or omission. Certain information such as Personal Protective Equipment (PPE) requirements are only our recommendation and are provided as a guide and in no way should they replace any part of your COSHH assessment. Under certain conditions you may require additional PPE. You should always refer to the product MSDS before use.

ACCLAIM AEROSOL

ACTIVE %	SPECIES EFFECTIVE AGAINST	AREA OF USE	DILUTION/ DOSE RATES	APPLICATION TECHNIQUE	PPE REQUIRED	RESIDUAL OR KNOCKDOWN
s-Methoprene 0.09 % (w/w), Permethrin 0.94 % (w/w)	Fleas.	Pet bedding, Carpets, Rugs, Upholstered furniture (inc. cracks and crevices in the floor)	Ready-to-use Aerosol. One can covers 140 m ²	Remove all pets and people from the room; hold can upside down and away from your body using a sweeping motion apply a fine spray - Spray uniformly across surfaces from a distance of about half a metre.	For professional operators: wear suitable protective gloves and respiratory equipment in case of insufficient ventilation.	Short-term insecticide - Long-lasting IGR (up to 12 months).

ACTELIC 50EC

ACTIVE %	SPECIES EFFECTIVE AGAINST	AREA OF USE	DILUTION/ DOSE RATES	APPLICATION TECHNIQUE	PPE REQUIRED	RESIDUAL OR KNOCKDOWN
Pirimiphos-Methyl 49.02 % (w/w)	Saw-toothed grain beetle, Grain weevil, Common flour mite, Warehouse moth, Flour or Mill moth, Flour beetles, Rust-red grain beetle and Cosmopolitan food mite.	Application as a grain admixture must only be made using automated application equipment.	Admixture: stored wheat, barley and oats - 8 ml product /tonne grain. One per batch of grain. The maximum concentration must not exceed 8 ml product/0.75 litres water.	Complete admix or surface mix including conveyor application.	For general use: Full face mask or 1/2 mask with goggles/ face shield, nitrile gloves and chemical-resistant coveralls - When used in confined areas such as Ship-holds powered respirators or breathing apparatus.	Residual treatment to grain.

ALPHA SCT

ACTIVE %	SPECIES EFFECTIVE AGAINST	AREA OF USE	DILUTION/ DOSE RATES	APPLICATION TECHNIQUE	PPE REQUIRED	RESIDUAL OR KNOCKDOWN
Cypermethrin 10 % (w/w), Tetramethrin 0.9 % (w/w)	Flies, Moths, Beetles, Fleas, Ticks, Bed bugs, Cockroaches, Crickets, Silverfish, Booklice, Mites, Ants, Mosquitoes, Wasp and Centipedes.	For use in and around domestic properties, public and municipal areas, refuse tips, poultry houses, slaughterhouses and manure heaps.	Routine treatment - Dilute 25 ml in 5 L of water and apply at a rate of 50 ml per sq/m - Heavy infestations: Dilute 50 ml in 5 L of water and apply at a rate of 50 ml per sq/m.	A suitable hand or mechanical sprayer can apply as a coarse spray and apply at a rate of 50 ml per sq/m.	Coveralls, synthetic rubber/ PVC gloves, face shield - If spraying in confined places, full face mask or half mask with goggles and suitable filters.	Residual surface spray.

AQUAPY

ACTIVE %	SPECIES EFFECTIVE AGAINST	AREA OF USE	DILUTION/ DOSE RATES	APPLICATION TECHNIQUE	PPE REQUIRED	RESIDUAL OR KNOCKDOWN
Chrysanthemum Cinerariaefolium Extract 3.00 % (w/w) synergised with Piperonyl Butoxide	Flying Insects, e.g. Flies, Mosquitoes, Stored product moths and Tobacco beetles - Wasps-by treating in and around the nest - Crawling Insects: as an aid to the control of, e.g. Cockroaches, Bed bugs, Fleas, Saw-toothed grain beetles, Grain weevils, Flour beetles, Grain borers, Mealworm beetles, Leather beetles and Tobacco beetles.	Domestic private dwellings - Food Handling: Processing, Food manufacture, Kitchens, Slaughterhouses, Bakeries, Mills etc. - Storage: Food retailers, Warehouses, Raw material stores etc. - Preparation: Restaurants, Commercial kitchens.	Ready to use please refer to product label for application rate.	Can be used indoors and outdoors as a space spray, surface, mist / fog or ULV application.	Full face mask or half mask with goggles, chemical-resistant gloves and coveralls.	Residual effect depends on dilution rates used - Refer to label for full details.

AQUATAIN

ACTIVE %	SPECIES EFFECTIVE AGAINST	AREA OF USE	DILUTION/ DOSE RATES	APPLICATION TECHNIQUE	PPE REQUIRED	RESIDUAL OR KNOCKDOWN
A unique silicone based liquid for Mosquito, Larvae and Pupae control.	Can be used on all mosquito species; the film prevents pupae and larvae from attaching themselves at the surface while attempting to breathe, thereby causing them to drown.	For use on open water bodies and underground systems.	Ready-to-use.	Measuring cylinder or sprayer applied.	Safety glasses and impermeable gloves when handling.	Knockdown.

BAYER FLYING INSECT KILLER

ACTIVE %	SPECIES EFFECTIVE AGAINST	AREA OF USE	DILUTION/ DOSE RATES	APPLICATION TECHNIQUE	PPE REQUIRED	RESIDUAL OR KNOCKDOWN
d-Tetramethrin 0.15 % (w/w) and 1R-Trans Phenothrin 0.15 % (w/w) Also contains propellants: Propane, butane and isobutane.	A pre-pressurised handheld aerosol for use against Flying insects such as Flies, Mosquitoes and other small flying insects by application as a space and surface spray - Can also be used against crawling insects such as Ants, Bed bugs, Cockroaches and Fleas.	Indoors only.	Refer to label.	Ready-to-use aerosol.	Wear suitable protective clothing and suitable gloves.	Rapid control and quick knockdown.

BIOPREN 6 EC

ACTIVE %	SPECIES EFFECTIVE AGAINST	AREA OF USE	DILUTION/ DOSE RATES	APPLICATION TECHNIQUE	PPE REQUIRED	RESIDUAL OR KNOCKDOWN
s-Methoprene 6.74 % (w/w), Pyrethrin 4.81 % (w/w), Piperonyl Butoxide 10.17 % (w/w)	Bed bugs and Fleas, both as a flushing agent and knockdown insecticide.	For Indoor use against Blood sucking insects (Bed bugs & Fleas) and other crawling insects in surfaces, cracks, crevices, carpets, soft furnishings, mattresses, pet housing and pet bedding.	Bed bugs-dilute 1 ml of product to 100 ml of water - Fleas-dilute 1ml of product to 250 ml water.	A suitable hand or mechanical compression sprayer.	Full face mask or half mask with goggles, chemical-resistant gloves or coveralls.	Residual.

BIOPREN BMS

ACTIVE %	SPECIES EFFECTIVE AGAINST	AREA OF USE	DILUTION/ DOSE RATES	APPLICATION TECHNIQUE	PPE REQUIRED	RESIDUAL OR KNOCKDOWN
s-Methoprene 0.05 % (w/w)	Pharaoh ant	In and around the Home, Food industry areas, Bakeries, Butcher's shops, Hotels, Hospitals, Restaurants and similar establishments.	1-2 bait stations / 5 sq/m (depending on level of infestation).	Ready-to-use - just cut off top on the dotted line and stick each station along Ant runs or near nests.	Wear suitable protective clothing and gloves.	Knockdown.

CIMETROL RFU

ACTIVE %	SPECIES EFFECTIVE AGAINST	AREA OF USE	DILUTION/DOSE RATES	APPLICATION TECHNIQUE	PPE REQUIRED	RESIDUAL OR KNOCKDOWN
Cypermethrin 0.1% (w/w) , Pyriproxyfen 0.01% (w/w), Chrysanthemum Cinerariaefolium 0.05% (w/w)	Ants, Beetles, Mites, Cockroaches, Fleas, Flies, Mosquitoes, Wasps, Moths and Bed bugs.	For use indoors on non-porous surfaces, crack and crevices, hard and soft furnishings, including mattresses and carpets, in hospitals (excl. occupied wards), offices, industrial premises, museums, aircraft, ships and military installations. For Outdoor use on Ant and Wasp nests.	Space Treatment- 1 ml of product per m ² as a fine mist - Surface Spray- apply 20 ml of product per m ² slightly wetting the surface to be protected - Repeat treatment as and when required .	Ready-to-use aerosol.	Full face mask or half mask with goggles, chemical-resistant gloves or coveralls.	Knockdown.

CIMETROL SUPER EW

ACTIVE %	SPECIES EFFECTIVE AGAINST	AREA OF USE	DILUTION/DOSE RATES	APPLICATION TECHNIQUE	PPE REQUIRED	RESIDUAL OR KNOCKDOWN
Cypermethrin 25% (w/w), Tetramethrin 10% (w/w), Piperonyl Butoxide 20% & Pyriproxyfen 1% (w/w) of insect growth regulator	Bed bugs, Fleas, Cockroaches, Beetles (inc. larvae), Flies, Mosquitoes, Moths (inc. larvae) and Wasps.	For use inside all domestic, commercial, and industrial premises, including Kitchens, Hotels, Dormitories (inc. sleeping areas), Hospitals (excl. occupied wards), Military establishments, Food storage (inc. Processing areas).	Crawling Pests (Routine Treatments): 25 ml of product to 5 L of water - Crawling Pests (Heavy infestations): 50 ml of product to 5 L of water - Flying Insects (Routine Treatments): 25 ml of product to 5 L of water - 1 L of ready-to-use solution treats 20 m ² .	Compression Sprayer, apply as a coarse, low-pressure spray.	Full face mask or half mask with goggles, chemical-resistant gloves or coveralls.	Excellent residual and knockdown with flushing effect, plus long period of control due to IGR.

COOPEX MAXI SMOKE GENERATORS

ACTIVE %	SPECIES EFFECTIVE AGAINST	AREA OF USE	DILUTION/DOSE RATES	APPLICATION TECHNIQUE	PPE REQUIRED	RESIDUAL OR KNOCKDOWN
Permethrin 13.35% (w/w)	Flying Insects: For the control of flying insects, e.g. Houseflies, Cluster flies, Mosquitoes, Fruit flies, Wasps and Moths - Crawling insects: Aids the control of crawling insects, e.g. Fleas, Bed bugs, Ants, Cockroaches and Stored product insects, e.g. Saw-toothed grain beetles and adult Grain weevils.	Food handling, Storage and Manufacture - Domestic: e.g. Private housing - Public Hygiene Areas: Hospitals (excl. occupied wards), Industrial & municipal buildings - Small Animal Housing: Zoos, Pet shops, Kennels, Veterinary practices, Laboratory animal houses (excl. pens and cages).	Flying Insects - 1 generator per 1000 cubic meters against Fleas and Bed bugs - 1 generator per 250 cubic meters against other crawling insects - 1 generator per 62.5 cubic meters.	Ready-to-use Smoke Generator - refer to product label before igniting the smoke generator.	Full face mask or half mask with goggles, chemical-resistant gloves or coveralls.	Rapid flushing agent, knockdown and kill.

COOPEX MINI SMOKE GENERATORS

ACTIVE %	SPECIES EFFECTIVE AGAINST	AREA OF USE	DILUTION/DOSE RATES	APPLICATION TECHNIQUE	PPE REQUIRED	RESIDUAL OR KNOCKDOWN
Permethrin 13.5% (w/w)	Flying Insects: For the control of flying insects, e.g. Houseflies, Cluster flies, Mosquitoes, Fruit flies, Wasps and Moths - Crawling insects: Aids the control of crawling insects, e.g. Fleas, Bed bugs, Ants, Cockroaches and Stored product insects, e.g. Saw-toothed grain beetles and adult Grain weevils.	Food handling, Storage and Manufacture - Domestic: e.g. Private housing - Public Hygiene Areas: Hospitals (excl. occupied wards), Industrial & municipal buildings - Small Animal Housing: Zoos, Pet shops, Kennels, Veterinary practices, Laboratory animal houses (excl. pens and cages).	Flying Insects - 1 generator per 120 cubic meters against Fleas and Bed bugs - 1 generator per 30 cubic meters against other crawling insects - 1 generator per 7.5 cubic meters (such as Ants and Cockroaches).	Ready-to-use Smoke Generator - refer to product label before igniting the smoke generator.	Full face mask or half mask with goggles, chemical-resistant gloves or coveralls.	A knockdown treatment only - Only insects present at the time of treatment are affected.

CYTROL FORTE 10 g SACHETS & 250 g JAR

ACTIVE %	SPECIES EFFECTIVE AGAINST	AREA OF USE	DILUTION/ DOSE RATES	APPLICATION TECHNIQUE	PPE REQUIRED	RESIDUAL OR KNOCKDOWN
Cypermethrin 40 % (w/w)	For use against Cockroaches, Fleas, Ants, Bed bugs, Silverfish, Woodlice, Earwigs, Millipedes, Centipedes, Houseflies, Clusterflies, Mosquitoes and Wasps.	In and Around Domestic and Industrial establishments, Hospitals (excl. occupied wards), Military areas, Restaurants and Eateries (not for use on Food preparation areas), Stores, Storage areas, Slaughterhouses, Refuse tips, Dustbins & around Manure heaps.	Crawling Insects (Routine Treatment): 10 g in 5 L of water (Heavy infestation): 20 g in 5 L of water Flying Insects 10 g in 5 L of water	Apply as a coarse, low-pressure spray.	Full face mask or half mask with goggles, chemical-resistant gloves or coveralls.	Good residual effect.

DEADLINE PYDUST

ACTIVE %	SPECIES EFFECTIVE AGAINST	AREA OF USE	DILUTION/ DOSE RATES	APPLICATION TECHNIQUE	PPE REQUIRED	RESIDUAL OR KNOCKDOWN
Pyrethrins & Pyrethroids & Chrysanthemum Cinerariaefolium, ext 0.11 % (w/w), Piperonyl Butoxide 0.495 % (w/w)	Flies, Mosquitoes, Cockroaches, Wasps, Silverfish, Fleas, Beetles, Woodlice, Carpet beetles, Moths and Spiders.	Public Hygiene and Domestic situations.	Refer to product label.	Bulb Duster or Dust Gun.	Full face mask with goggles and chemical-resistant gloves and coveralls.	Good Residual and knockdown effects.

DECIS

ACTIVE %	SPECIES EFFECTIVE AGAINST	AREA OF USE	DILUTION/ DOSE RATES	APPLICATION TECHNIQUE	PPE REQUIRED	RESIDUAL OR KNOCKDOWN
Deltamethrin 1.5 % (w/w)	Aphids, Caterpillars and other agricultural/ horticultural pests.	See label for details	See label for details	Apply using knapsack or compression sprayer.	Full face mask or half mask with goggles and chemical-resistant gloves and coveralls.	Residual.

DETHLAC INSECT LACQUER AEROSOL

ACTIVE %	SPECIES EFFECTIVE AGAINST	AREA OF USE	DILUTION/ DOSE RATES	APPLICATION TECHNIQUE	PPE REQUIRED	RESIDUAL OR KNOCKDOWN
Deltamethrin 0.02 % (w/w), Pyrethrins 0.08 % (w/w)	Ants, Cockroaches, Woodlice and other crawling insects.	For use Indoors and Out - Apply to any firm non-absorbent surface - See label for full details and precautions.	Ready-to-use aerosol.	Apply direct from aerosol in bands.	Full face mask or 1/2 mask with goggles, chemical-resistant gloves and coveralls.	Very residual as it dries to a hard clear film - Even after surfaces have been washed down, it is still effective.

INSECTRAC CL

ACTIVE %	SPECIES EFFECTIVE AGAINST	AREA OF USE	DILUTION/ DOSE RATES	APPLICATION TECHNIQUE	PPE REQUIRED	RESIDUAL OR KNOCKDOWN
13-Octadecadienal acetate 0.35 %	For the control of Clothes moths.	Protection of valuable fabrics from artifacts in Museums and Heritage homes to Clothing retailers and Home-owners.	Compressed inert powder containing synthetic Moth sex pheromones - Each tablet should be applied in a 5 m 'grid' pattern no higher than 2 m from the floor.	Used in conjunction with the dispenser.	Chemical-resistant gloves and coveralls.	A high-performance residual insecticide.

INSECTRAC SP

ACTIVE %	SPECIES EFFECTIVE AGAINST	AREA OF USE	DILUTION/ DOSE RATES	APPLICATION TECHNIQUE	PPE REQUIRED	RESIDUAL OR KNOCKDOWN
Tetradecadien-1-yl-Acetate 1 % (w/w)	For the control of Stored product moths.	Food factories, Mills, Industrial kitchens, Processing and Storage areas.	Compressed inert powder containing synthetic Moth sex pheromones - Each tablet should be applied in a 5 m 'grid' pattern.	Used in conjunction with the dispenser.	Chemical-resistant gloves and coveralls.	A high-performance residual insecticide.

FICAM D

ACTIVE %	SPECIES EFFECTIVE AGAINST	AREA OF USE	DILUTION/ DOSE RATES	APPLICATION TECHNIQUE	PPE REQUIRED	RESIDUAL OR KNOCKDOWN
Bendiocarb 1.25 % (w/w)	Ants, Wasps and Hornets (inc. Asian hornet).	Indoors use only, product may be applied to inside from the exterior.	Ready-to-use dust = 20-60 g depending on the size of the nest.	Apply by hand shaker, puffer, bellows or similar dust applicator.	Full face mask or 1/2 mask with goggles, chemical-resistant gloves and coveralls.	Fast knockdown as well as long residual activity.

FLYMAX G3

ACTIVE %	SPECIES EFFECTIVE AGAINST	AREA OF USE	DILUTION/ DOSE RATES	APPLICATION TECHNIQUE	PPE REQUIRED	RESIDUAL OR KNOCKDOWN
Aqueous Cellulose Polymer	Flies, Fleas, Mosquitoes and Bed bugs.	Indoor and outdoor use.	Ready-to-use formulation = 1 L covers 50 m ² .	Fine to Medium spray, at low pressure.	Full face mask or 1/2 mask with goggles, chemical-resistant gloves and coveralls.	Knockdown.

FORTEFOG JUMBO

ACTIVE %	SPECIES EFFECTIVE AGAINST	AREA OF USE	DILUTION/ DOSE RATES	APPLICATION TECHNIQUE	PPE REQUIRED	RESIDUAL OR KNOCKDOWN
Permethrin 13.25 % (w/w)	Houseflies, Clusterflies, Fruitflies, Mosquitoes, Wasps, Moths, Fleas, Bed bugs, Ants, Cockroaches and Stored product insects (inc. Saw-toothed grain beetle and adult Grain weevil).	For use in domestic situations, Public hygiene areas inc. hospitals (not occupied wards), industrial & municipal buildings & food handling/ storage premises. Also zoos, pet shops, kennels, veterinary practice & laboratory animal houses (ex. animal pens and cages). Not for use on grain or in empty grain stores.	Ready-to-use. Flying insects 1 generator = 4000 m ³ Crawling insects / fleas 1 generator = 1000 m ³ Ants / cockroaches 1 generator = 250 m ³	Refer to product label for before igniting the smoke generator.	Full face mask or 1/2 mask with goggles, chemical-resistant gloves and coveralls.	A knockdown treatment only, only insects present at the time of treatment will be affected.

FORMIDOR

ACTIVE %	SPECIES EFFECTIVE AGAINST	AREA OF USE	DILUTION/ DOSE RATES	APPLICATION TECHNIQUE	PPE REQUIRED	RESIDUAL OR KNOCKDOWN
Fipronil 0.0526 % (w/w)	Garden and Argentine ants.	In and around Domestic and Commercial buildings.	In and around domestic and commercial premises-up to 3 bait points (drops) every metre on the Ant trails.	Apply using a suitable bait gun or gel applicator.	Goggles, chemical-resistant gloves and coveralls.	Knockdown and residual effects.

GALLUP BIO AMENITY

ACTIVE %	SPECIES EFFECTIVE AGAINST	AREA OF USE	DILUTION/ DOSE RATES	APPLICATION TECHNIQUE	PPE REQUIRED	RESIDUAL OR KNOCKDOWN
Glyphosphate 30.7 % (w/w)	Broad leaf and Grass weeds.	Refer to product label.	Refer to product label.	Knapsac or Compression sprayer.	Goggles and chemical-resistant gloves and coveralls.	Residual.

GALLUP HOME & GARDEN

ACTIVE %	SPECIES EFFECTIVE AGAINST	AREA OF USE	DILUTION/ DOSE RATES	APPLICATION TECHNIQUE	PPE REQUIRED	RESIDUAL OR KNOCKDOWN
Glyphosate in a soluble concentrate (360 g/l)	Deep rooted Perennial weeds.	Home and Garden	24 ml to 1 L of water.	Knapsac or Compression sprayer.	Goggles and chemical-resistant gloves and coveralls.	Residual.

GALLUP XL

ACTIVE %	SPECIES EFFECTIVE AGAINST	AREA OF USE	DILUTION/DOSE RATES	APPLICATION TECHNIQUE	PPE REQUIRED	RESIDUAL OR KNOCKDOWN
Glyphosate in a soluble concentrate (360 g/l)	Deep rooted Perennial weeds.	Refer to product label.	Refer to product label.	Knapsac or Compression sprayer.	Goggles and chemical-resistant gloves and coveralls.	Residual.

GRAZON PRO

ACTIVE %	SPECIES EFFECTIVE AGAINST	AREA OF USE	DILUTION/DOSE RATES	APPLICATION TECHNIQUE	PPE REQUIRED	RESIDUAL OR KNOCKDOWN
Triclopyr (240 g/l) and Clopyralid (60 g/l)	Nettles, Docks thistles, Brambles, Broom and Gorse.	Established Grasslands.	6 ml per litre.	Knapsac or Compression sprayer.	Full face mask or 1/2 mask with goggles, chemical-resistant gloves and coveralls.	Knockdown.

GOLIATH GEL

ACTIVE %	SPECIES EFFECTIVE AGAINST	AREA OF USE	DILUTION/DOSE RATES	APPLICATION TECHNIQUE	PPE REQUIRED	RESIDUAL OR KNOCKDOWN
Fipronil 0.053 % (w/w)	German Cockroaches, Brown-banded cockroaches, Oriental cockroaches and American cockroaches	Refer to label.	Dependant on species please refer to product label.	Apply using a suitable bait gun / gel applicator.	The product is not classified on the basis of its toxicity but we would advise that you wear suitable disposable gloves and coveralls in the interest of good hygiene.	Effective long term control is maintained several weeks after initial treatment.

GRAIN-TECT ULV

ACTIVE %	SPECIES EFFECTIVE AGAINST	AREA OF USE	DILUTION/DOSE RATES	APPLICATION TECHNIQUE	PPE REQUIRED	RESIDUAL OR KNOCKDOWN
Deltamethrin (6 g/l) and Piperonyl Butoxide (54 g/l)	Crawling Insects: Grain weevils, Flour beetles, Grain borers, Saw-toothed grain beetles, Bean weevils - Flying Insects: Rice moths, Indian meal moths, Grain moths.	Applied directly to the grain.	Applied through most existing ULV applicators capable of dosing at 42 ml per tonne.	Applied with dosing atomiser pump calibrated to the flow of the grain.	When coming into contact with liquid chemicals: Full face mask or half mask with goggles, chemical-resistant gloves and coveralls.	Knockdown and residual (12-months protection).

HARMONIX POULTRY RED MITE

ACTIVE %	SPECIES EFFECTIVE AGAINST	AREA OF USE	DILUTION/ DOSE RATES	APPLICATION TECHNIQUE	PPE REQUIRED	RESIDUAL OR KNOCKDOWN
Aqueous Cellulose Polymer (contains Isopropanol)	Poultry red mite.	For use In and Around Avian housing - Apply directly to the Mites and the dusty areas and apply to run-off.	Dilute 1 L of product to 7.5 L of clean water - Apply about 8.5 litres per 200 sq/m.	A suitable mechanical, electrical or motorized sprayer capable of producing a coarse spray quality.	Wear face protection and gloves.	Knockdown, no residual activity.

INSECTABAN

ACTIVE %	SPECIES EFFECTIVE AGAINST	AREA OF USE	DILUTION/ DOSE RATES	APPLICATION TECHNIQUE	PPE REQUIRED	RESIDUAL OR KNOCKDOWN
Permethrin 0.23 % (w/w)	Fleas, Flies, Wasps, Moths, Bed bugs, Beetles and Booklice.	For use in Domestic and Commercial premises, Hospitals, Hotels, Food factories and other Industrial premises.	Ready-to-use product- For Fly control-spray 1 L of product per 100 sq/m, to control Flying insects and larvae, fog 1 L of product per 300 cubic metres.	Use a suitable hand or mechanical sprayer capable of a coarse spray or fogging machine - Use paintbrush or roller for localised treatments or where spray drift must be avoided.	Full face mask or 1/2 mask with goggles, chemical-resistant gloves and coveralls.	Some knockdown effects with excellent residual properties.

K-OBIOL EC25

ACTIVE %	SPECIES EFFECTIVE AGAINST	AREA OF USE	DILUTION/ DOSE RATES	APPLICATION TECHNIQUE	PPE REQUIRED	RESIDUAL OR KNOCKDOWN
Deltamethrin 2.5 % (w/w), Piperonyl Butoxide 22.5 % (w/w) and solvent Naptha	Stored product pest (inc. crawling insects such as Grain weevil, Flour beetle, Grain borer, Saw-toothed grain beetle and Bean weevil - Flying Insects such as Warehouse moth, Rice moth, Indian meal moth and Grain moth.	For use on Stored grain and pulses, Crop handling equipment and Storage structures.	Direct admixture: With grain-1 L to 100 tonnes of grain/ pulses - Crop handling equipment and storage structure-60 ml per 100 m ² - Maximum number of treatments: Crop handling equipment and storage structure-one per annum - Complete admixture for grains, pulses-one per batch.	A suitable hand or mechanical compression sprayer.	Full face mask or 1/2 mask with goggles, chemical-resistant gloves and coveralls.	Residual.

K-OTHRINE PARTIX

ACTIVE %	SPECIES EFFECTIVE AGAINST	AREA OF USE	DILUTION/ DOSE RATES	APPLICATION TECHNIQUE	PPE REQUIRED	RESIDUAL OR KNOCKDOWN
Deltamethrin 2.49 % (w/w)	To control crawling insects (inc. Cockroaches and Bed bugs), Houseflies at rest and Spiders also for the outdoor control of Wasps in free-hanging nests.	Indoors - in public places (e.g. schools, hospitals), Domestic, Commercial and Industrial premises to control Crawling insects (inc. Bed bugs, Cockroaches), Houseflies at rest & Spiders. K-Othrine Partix can be used outdoors to control wasps in free hanging nests.	Species dependant - refer to product label.	A suitable hand or mechanical sprayer capable of a coarse spray.	Full face mask or 1/2 mask with goggles, chemical-resistant gloves and coveralls.	Knockdown and residual.

LIGNUM INSECTICIDE PRO 162.5

ACTIVE %	SPECIES EFFECTIVE AGAINST	AREA OF USE	DILUTION/DOSE RATES	APPLICATION TECHNIQUE	PPE REQUIRED	RESIDUAL OR KNOCKDOWN
Permethrin (62.5 g/L) and Alcohols (C9-11) ethoxylated.	Woodworm and Wood boring insects (inc. House longhorn beetle, Common furniture beetle and Termites).	Spray directly to affected timber.	1 L of product with 24 L of water. Curative - apply at a rate of 300 ml/m ² (1 L per 3.3 m ²) Preventative - Apply at a rate of 200 ml/m ² (1 L per 5 m ²)	Apply by brush or low-pressure spray.	Full face mask or 1/2 mask with goggles, chemical-resistant gloves and coveralls.	Knockdown and residual.

LIGNUM PRO D156

ACTIVE %	SPECIES EFFECTIVE AGAINST	AREA OF USE	DILUTION/DOSE RATES	APPLICATION TECHNIQUE	PPE REQUIRED	RESIDUAL OR KNOCKDOWN
Propiconazole 93.75 g/L, IPBC 31.25 g/L and alcohols (C9-11) ethoxylated. Permethrin 31.25 g/l	Woodworm and Wood rotting fungi (inc. White and Brown rot, Blue stain, House longhorn beetle, Common furniture beetle and termites).	Apply directly to the affected timber.	Refer to product label.	Apply with any suitable hand or mechanical sprayer capable of producing a coarse spray.	Full face mask or 1/2 mask with goggles, chemical-resistant gloves and coveralls.	Knockdown and residual.

MAXFORCE PLATIN

ACTIVE %	SPECIES EFFECTIVE AGAINST	AREA OF USE	DILUTION/DOSE RATES	APPLICATION TECHNIQUE	PPE REQUIRED	RESIDUAL OR KNOCKDOWN
Clothianidin 1 %	Cockroaches and Silverfish.	Indoors Domestic, Food handling/storage, Public buildings, Small animal houses.	Species dependant - refer to product label.	Apply using a bait gun.	Wear gloves to avoid contact.	Knockdown and residual.

MAXFORCE PUSHBOX

ACTIVE %	SPECIES EFFECTIVE AGAINST	AREA OF USE	DILUTION/DOSE RATES	APPLICATION TECHNIQUE	PPE REQUIRED	RESIDUAL OR KNOCKDOWN
Imidacloprid 0.03 %	Black garden ant, Argentine ant, Pharaoh ant (Indoor Only) Ghost ant (Indoor Only).	Indoors: Industrial/commercial premises, Households/private areas, Kitchens, Living rooms and cellars, Public areas (e.g. hospitals and nursing homes) - Outdoors: Terraces, Pavements, Patios, Entrances to sheds/garages and Public areas (e.g. Hospitals and Nursing homes).	1 bait station per Ants nest - Maximum 2 bait stations per location or Ant trail.	Ready-to-use Bait Station - Bait stations should not be replaced more than every 12 weeks.	Wear gloves to avoid contact.	Knockdown and residual.

MAXFORCE QUANTUM

ACTIVE %	SPECIES EFFECTIVE AGAINST	AREA OF USE	DILUTION/DOSE RATES	APPLICATION TECHNIQUE	PPE REQUIRED	RESIDUAL OR KNOCKDOWN
Imidacloprid 0.03 %	Garden ant, Argentine ant, Pharaoh ant and Ghost ant.	Indoor: Industrial/commercial premises, Households/private areas, Kitchens, Living rooms and Cellars, Public areas (Hospitals and Nursing homes) Outdoors: Terraces, Pavements, Patios, Entrances to sheds/garages and Public areas (Hospitals and Nursing homes. Not for use on soils, lawns or flower beds.	Small drops of bait about 1 cm diameter (200 mg) each - 1 spot of 200 mg per sq/m treat area or 1 spot 200 mg per linear meter of Ant trail.	Apply using a suitable bait gun or gel applicator.	Googles, chemical-resistant gloves and coveralls.	Knockdown and residual.

MITEMAX READY-TO-USE

ACTIVE %	SPECIES EFFECTIVE AGAINST	AREA OF USE	DILUTION/DOSE RATES	APPLICATION TECHNIQUE	PPE REQUIRED	RESIDUAL OR KNOCKDOWN
Aqueous Cellulose polymer (contains Isopropanol)	Poultry red mite.	Apply to the structure and surfaces of Poultry shed inc. dusty areas where Mites are harbouring.	Ready-to-use. Apply to run off	Supplied in ready-to-use trigger pack.	Wear face protection and gloves.	Immobilisation and knockdown.

NEPOREX

ACTIVE %	SPECIES EFFECTIVE AGAINST	AREA OF USE	DILUTION/DOSE RATES	APPLICATION TECHNIQUE	PPE REQUIRED	RESIDUAL OR KNOCKDOWN
Cyromazine 50 % (w/w)	Housefly larvae.	Pig, Poultry and Calf units, Manure heaps, Landfill sites and Waste management.	1 g of product to 5 L of water	Refer to product label.	Full face mask or 1/2 mask with goggles, chemical-resistant gloves and coveralls.	Residual.

OA2KI CONCENTRATE & OA2KI READY-TO-USE

ACTIVE %	SPECIES EFFECTIVE AGAINST	AREA OF USE	DILUTION/DOSE RATES	APPLICATION TECHNIQUE	PPE REQUIRED	RESIDUAL OR KNOCKDOWN
Aqueous cellulose polymer	Ants, Bed bugs, Fleas, Flies and small insects.	Refer to product label.	Concentrate only: 1 part concentrate to 7.5 parts water - 500 ml of Concentrate makes 4.25 litres of ready-to-use product.	As a surface spray-use a knapsack / compression sprayer-apply as a medium spray - As a space spray-apply through a suitable ULV or fogging equipment that can dispense water-based products.	Wear face protection and gloves.	Knockdown.

OA2KI POWDER

ACTIVE %	SPECIES EFFECTIVE AGAINST	AREA OF USE	DILUTION/DOSE RATES	APPLICATION TECHNIQUE	PPE REQUIRED	RESIDUAL OR KNOCKDOWN
Diatomaceous Earth	Effective in desiccating areas where applied.	Domestic, Commercial, Public and Institutional premises, inc. Kitchens and Food preparation/manufacturing areas.	For public health pest-apply as required to cracks and crevices 10-30 g per m ² .	Apply using a suitable mechanical or electric dust applicator or via a puffer pack.	1/2 mask with goggles, chemical-resistant gloves and coveralls.	Extremely residual. If product is applied to dry, clean and undisturbed environments.

OA2KI AEROSOL - SD

ACTIVE %	SPECIES EFFECTIVE AGAINST	AREA OF USE	DILUTION/DOSE RATES	APPLICATION TECHNIQUE	PPE REQUIRED	RESIDUAL OR KNOCKDOWN
Silicon Dioxide	Bed bugs.	Domestic and Commercial - cracks and crevices.	Ready-to-use. Apply liberally.	Apply directly from aerosol hold 30 cm away from surface - One can covers 9 m ² .	1/2 mask with goggles, chemical-resistant gloves and coveralls.	Residual.

OA2KI AEROSOL - OP

ACTIVE %	SPECIES EFFECTIVE AGAINST	AREA OF USE	DILUTION/DOSE RATES	APPLICATION TECHNIQUE	PPE REQUIRED	RESIDUAL OR KNOCKDOWN
Synthetic Organic Polymer	Ants, Bed bugs, Fleas, Flies and small insects.	Domestic and Commercial - cracks and crevices.	Ready-to-use. Apply liberally.	Apply directly from aerosol hold 30 cm away from surface - One can covers 9 m ² .	1/2 mask with goggles, chemical-resistant gloves and coveralls.	Residual.

PERMOST UNIFLY

ACTIVE %	SPECIES EFFECTIVE AGAINST	AREA OF USE	DILUTION/DOSE RATES	APPLICATION TECHNIQUE	PPE REQUIRED	RESIDUAL OR KNOCKDOWN
Permethrin 0.31 % (w/w) Tetramethrin 0.124 % (w/w)	Flies, Mosquitoes, Wasps, Ants, Cockroaches, Earwigs, Fleas, Bristletails, Beetles, Mites, Ticks and Fleas.	Hospitals (excl. occupied wards), Military barracks, Milk rooms, Avian housing and Refuse tips.	1 L of product sufficient to treat 1,000 m ² .	Hand Sprayer or Fogger.	1/2 mask with goggles, chemical-resistant gloves and coveralls.	Knockdown.

PREVENT SPRAY						
ACTIVE %	SPECIES EFFECTIVE AGAINST	AREA OF USE	DILUTION/ DOSE RATES	APPLICATION TECHNIQUE	PPE REQUIRED	RESIDUAL OR KNOCKDOWN
Pyrethrins 1 % (w/w) synergised by Piperonyl Butoxide.	Repels and kills, Mosquitoes, Fleas, Sandflies, Gnats and Midges.	Can be used pretty much anywhere but do not spray directly on to food.	Use as necessary- press once to release a 50 mg of spray.	Ready-to-use aerosol.	Do not spray near eyes, the product can be applied directly to skin to act as a repellent.	Knockdown, protection last for 6 hours.

PROTECTOR ONE SHOT						
ACTIVE %	SPECIES EFFECTIVE AGAINST	AREA OF USE	DILUTION/ DOSE RATES	APPLICATION TECHNIQUE	PPE REQUIRED	RESIDUAL OR KNOCKDOWN
Pyrethrins 0.2 % (w/w)	For the control of flying insects such as Flies, Mosquitoes, Ants, Cockroaches, Wasps, Earwigs, Silverfish (inc. other bristletails), Fleas, Beetles, Bed bugs, Moths, Booklice, Mites (inc. Dust mites).	Use in domestic & commercial situations, inc. kitchens, hospitals (not occupied wards), hotels, restaurants, public & municipal buildings & onboard ships, for use outdoors on patios, paths amenity areas, transit stations, refuse tips & wasp nests. In & around farm buildings.	Ready-to-use aerosol.	Ready-to-use aerosol.	Full face or 1/2 mask with goggles. chemical-resistant gloves and coveralls.	Knockdown.

PROTECTOR NATURAL						
ACTIVE %	SPECIES EFFECTIVE AGAINST	AREA OF USE	DILUTION/ DOSE RATES	APPLICATION TECHNIQUE	PPE REQUIRED	RESIDUAL OR KNOCKDOWN
Pyrethrins 0.2 % (w/w)	Flies, Mosquitos, Ants, Cockroaches, Wasps, Earwigs, Silverfish (inc. other bristletails), Fleas, Beetles, Bed bugs, Moths, Booklice, Mites (inc. Dust mites) - For use against Poultry red mite and Litter beetles.	Use in domestic & commercial situations, inc. kitchens, hospitals (not occupied wards), hotels, restaurants, public & municipal buildings & onboard ships, for use outdoors on patios, paths amenity areas, transit stations, refuse tips & wasp nests. In & around farm buildings.	Space spray: 5-10 second burst will treat an average sized room 30 sq/m - refer to product label for directions on use.	Ready-to-use aerosol.	Avoid breathing in the aerosol, wear suitable gloves.	Knockdown

PYBUTHRIN 33						
ACTIVE %	SPECIES EFFECTIVE AGAINST	AREA OF USE	DILUTION/ DOSE RATES	APPLICATION TECHNIQUE	PPE REQUIRED	RESIDUAL OR KNOCKDOWN
Chrysanthemum Cinerariaefolium Extract 0.37 % (w/w), Piperonyl Butoxide and Distillates (petroleum), hydrotreated light.	For the control of: Flying Insects, e.g. Flies, Wasps (inc. Wasps nests), and Stored product moths and Mosquitoes - Crawling Insects, e.g. Cockroaches and Stored product insects.	Refer to product label.	Space spray: Indoors: 1 litre of product per 3000 m ³ . Outdoors: Up to 25 litres per ha / 1 litre per 2000 m ² . Surface (contact) spray: 5 litres of product per 100 m ²	Apply with any suitable hand, mechanically or electrically operated sprayer capable of producing a fine mist or fog.	Full face or 1/2 mask with goggles, chemical-resistant gloves and coveralls.	Rapid knockdown and kill. No residual activity.

RESIDEX P

ACTIVE %	SPECIES EFFECTIVE AGAINST	AREA OF USE	DILUTION/DOSE RATES	APPLICATION TECHNIQUE	PPE REQUIRED	RESIDUAL OR KNOCKDOWN
Permethrin 0.5 % (w/w)	Ants, Wasps, Fleas and Lice inc. crack and crevice treatments where insects settle.	Apply dust In and Around insect hiding places paying particular attention to cracks and crevices.	Apply 10-25 g per sq/m.	Apply by hand shaker, puffer, bellows or similar dust applicator.	Full face mask or 1/2 mask with goggles, chemical-resistant gloves and coveralls.	Residual.

SIRIUS

ACTIVE %	SPECIES EFFECTIVE AGAINST	AREA OF USE	DILUTION/DOSE RATES	APPLICATION TECHNIQUE	PPE REQUIRED	RESIDUAL OR KNOCKDOWN
Tetraethylortho-silicate	Crop protection product - check label for direction on use for more information.	Field crops, Fruit crops, Ornamental/ Sports & Turf inc. in Ferigation lines.	Refer to product label.	Suitable for crop and turf sprayers, apply to drench.	Full face mask or 1/2 mask with goggles, chemical-resistant gloves and coveralls.	Knockdown.

VULCAN P5

ACTIVE %	SPECIES EFFECTIVE AGAINST	AREA OF USE	DILUTION/DOSE RATES	APPLICATION TECHNIQUE	PPE REQUIRED	RESIDUAL OR KNOCKDOWN
Permethrin 0.05 % (w/w)	Fleas, Lice, Mites, Ticks, Cockroaches, Earwigs, Beetles (inc. larvae), Moths (inc. larvae), Bed bugs, Ants, Woodlice, Silverfish and Wasps.	In and Around buildings.	10-25 g per m ² .	Dusting applicator.	Full face mask or 1/2 mask with goggles, chemical-resistant gloves and coveralls.	Residual and knockdown.

WASP NEST DESTROYER FOAM

ACTIVE %	SPECIES EFFECTIVE AGAINST	AREA OF USE	DILUTION/DOSE RATES	APPLICATION TECHNIQUE	PPE REQUIRED	RESIDUAL OR KNOCKDOWN
Tetramethrin 0.3 % (w/w) and d-Phenothrin 0.097 % (w/w)	Wasps	Apply Direct to Wasp nest-do not apply product to Wasp nests in ground.	An 8-second burst will cover a nest with a diameter of 50 cm - A 12-second burst will cover a nest with a diameter of 80 cm - To be effective the nest must be completely covered in foam.	Stand at least 2 m away from nest, holding can upright as possible, spray foam towards the nest - refer to product label for more direction on use.	Minimise operator exposure - Eye protection and gloves.	Knockdown.

XLARV						
ACTIVE %	SPECIES EFFECTIVE AGAINST	AREA OF USE	DILUTION/DOSE RATES	APPLICATION TECHNIQUE	PPE REQUIRED	RESIDUAL OR KNOCKDOWN
A unique silicone based liquid for Mosquito, Larvae and Pupae control.	Can be used on all mosquito species: the film prevents pupae and larvae from attaching themselves at the surface while attempting to breathe, thereby causing them to drown.	For use on Open water bodies and Underground systems.	Refer to product label.	Refer to product label.	Refer to product label.	Refer to product label.

WATER VOLE PROTECTION

KNOW YOUR VOLE

Water voles are easily confused with rats. Rats are treated as pests but water voles are a legally protected species. How can pest control affect water voles? Controlling pests such as rats may lead to accidental destruction of water vole colonies. Damage occurs when water voles are mistaken for rats, or when control methods are used carelessly. Rats sometimes prey on young water voles so careful rat control can benefit water vole colonies.

WHAT THE LAW SAYS

Is it an offence to intentionally or recklessly damage, destroy or obstruct access to any structure or place that a water vole uses for shelter or protection. It is also an offence to disturb a water vole while it is using such a place. (Wildlife and Countryside Act 1981, Schedule 5, Section 9[4]). Blocking water vole burrows is illegal. Placing traps or bait boxes into or in the way of water vole burrows could lead to prosecution. Offences carry a maximum penalty of £5000. The court may also take any vehicle or other equipment used to commit the offence.

THREATS TO WATER VOLES

Water voles have suffered the most dramatic decline of any British mammal in the last century. There is now only one vole for every 20 that were alive in 1900. The main causes for this decline have been loss and damage to habitat, and predation by American mink. Any activity that poses the slightest threat to water voles must therefore be undertaken with extreme care.

THREATS TO WATER VOLES

If you are controlling pests near water, check for signs of water voles before starting. Your local Wildlife Trust may be able to provide information on water vole presence at the site. Both water voles and rats burrow into the banks of most types of waterway. Water voles are usually restricted to within several meters of the water's edge. Use the chart below to check for signs of water voles. If you find water voles and rats follow the advice in the leaflet. If in doubt, contact your local Wildlife Trust.

WATER VOLE (*Arvicola terrestris*)

SIZE & SHAPE	Water voles have rounded bodies and grow to 320 g, smaller than an adult male rat.
COLOUR	Water voles are generally mid-brown in colour with silky fur. Dark brown or black individuals may occur, especially in uplands.
SNOUT, EARS AND TAIL	Water voles have short blunt snouts. Their ears are almost hidden by fur. Their furry tail is two thirds of their body length.
BURROWS	Water voles have short blunt snouts. Their ears are almost hidden by fur. Their furry tail is two thirds of their body length.
PATHS	Usually one main track along water's edge, with some paths pushing up into vegetation higher up the bank. Paths are normally concealed in grass and stay near the water.
DROPPINGS	Between spring and autumn droppings are left in piles of 5-100 usually within 30 cm of water. In winter droppings are dispersed. Droppings are 5-10 mm long and rounded at both ends. They have a putty-like texture, with very fine plant material visible. Green, brown, purplish or black in colour. No strong odour.
FEEDING REMAINS	The diet of water voles is mainly vegetarian. Water voles leave small piles of chopped vegetation (approx. 10cm long and cut at 45 degree angle with grooved teeth-marks at ends) at feeding sites on banks.
ACTIVITY	Can be active during the day but more likely to be seen at dawn and dusk.
FOOTPRINTS	Not a reliable guide.

BROWN RAT (*Rattus norvegicus*)

SIZE & SHAPE	Rats are bigger than water voles. Adult males weigh up to 500 g.
COLOUR	Grey or brown with a paler underside.
SNOUT, EARS AND TAIL	8-10 cm diameter burrows may occur well away from the water's edge often with a heap of soil in a 'fan' shape outside the entrance.
BURROWS	A network of well trampled paths connecting all burrows. Paths may lead across open land away from the water.
PATHS	A network of well trampled paths connecting all burrows. Paths may lead across open land away from the water.
DROPPINGS	One or several left on paths or at the water's edge. Droppings are 12-15 mm long, flat at one end and pointed at the other. Slimy or very soft texture, occasionally granular. Light brown to black in colour. Unpleasant odour of urine or ammonia.
FEEDING REMAINS	Rats are opportunist feeders and will eat a variety of foods. Remains of meals such as broken snail shells are sometimes found on the riverbank.
ACTIVITY	Largely nocturnal.
FOOTPRINTS	Not a reliable guide.

A-Z RODENT control

PRODUCTS 

The following charts have been produced only as an aid in product selection and to summarise some key points. Before using any of the rodenticides listed, a thorough site inspection and plan should be carried out. In all circumstances you should always read the product label. The information given in the table is to the best of our knowledge and is given in good faith at the time of print. We cannot accept any responsibility for loss or damage arising from any error or omission. You should always refer to the product SDS and label before use. Refer to the CRRU code for the Best Practice Guidelines.

TERMS & CONDITIONS

TERMS & CONDITIONS

1. All products are offered for sale subject to our standard conditions of sale. Full terms and conditions are available on request.
2. All prices quoted are exclusive of VAT and are subject to alteration without notice.
3. We would especially draw your attention to the following standard conditions:
Nett Cash Monthly to Approved Accounts. Carriage is paid on orders of £245 or more for standard next day delivery, unless otherwise specified.
For orders of a lesser value a small surcharge of £8.25 per invoice will be raised to meet cost of processing small orders. Carriage is charged at cost to deliveries off the mainland such as offshore islands.
4. Notification of non-delivery must be made in writing within seven days from the date of despatch of the goods or else claims cannot be entertained.
5. Barretine cannot take responsibility for any associated costs arising from delivery issues (such as late or failed delivery), or delivery of wrong items and neither Barretine, nor our courier company take any responsibility if the clients request we leave goods unsigned.
6. Returns Policy - Should you return the Goods in accordance with our Terms & Conditions stated above, we reserve the right to charge a "restocking fee" which will be an amount equivalent to 15% of the price payable by you in respect of the returned Goods.

Should you wish to return anything bought from us, we will be happy to refund or exchange a product provided it is in a fully resaleable condition however you will be responsible for the postage and any associated cost and risk of the return of the goods to us.

If you wish to return your order we must receive notification within 14 calendar days from receipt of your goods. If we find that the product has not been returned to us in a fully resaleable condition, we reserve the right to refuse a refund on the item.

SPECIAL CONDITIONS OF SALE

Poisons

These products are subject to the Poisons Rules and can only be supplied to authorised purchasers against a signed official order stating the purpose of which it is to be used.
Please note: These items cannot normally be supplied on a next day delivery.

Pesticides

All pesticides listed are approved by ministers under the Control of Pesticides Regulations 1986 and the Control of Pesticides Regulations (Northern Ireland) 1987. Control of Pesticides - superseded by the European Biocides Directive where appropriate.

The Health and Safety Executive (HSE) in the United Kingdom is responsible for administering the Control of Pesticides Regulations (COPR) regulatory scheme in relation to non-agricultural pesticides and is also responsible for regulating biocides in the UK. The Control of Pesticides Regulations 1986 (COPR) (as amended 1997) with products controlled under COPR are gradually moving over to be regulated under the Biocidal Product Register (BPR), with COPR eventually becoming redundant. In addition to the COPR and the BPR, Article 95 of EU BPR (as amended) introduces an approved active substance supplier list. Article 95 of EU BPR applies to all products that are approved under the Control of Pesticides Regulations (COPR). Article 95 (2) of EU BPR (as amended) states "As of 1 September 2015, a biocidal product consisting of, containing or generating a relevant substance, included in the list referred to in paragraph 1, shall not be made available on the market unless either the substance supplier or the product supplier is included in the list referred to in paragraph 1 for the product-type(s) to which the product belongs."

Efficacy: Biocidal and non-biocidal products have varying rates of efficacy in the field and product labels should always be referred to in order to maximise efficacy.

LET'S FIND THE SOLUTION TOGETHER.

OUR SERVICE*

Our Export department understands the requirements of our overseas customers and we offer a complete export service for our diverse range of products to global destinations. Dependant on the goods and the destination, our export department manages the Free Sales Certification as well as Certificates of Origin, hazardous packing and dangerous goods notices. The goods can be couriered direct, via freight forwarders or as consolidated freight.

EXPORT PROCESS

Telephone +44 (0) 117 967 2222 Email beh@barrettine.co.uk

*Some of our export products such as poisons, rodenticides and herbicides are subject to regional regulated approval and customers may wish to purchase on an Ex Works basis. For global shipping, we can arrange couriers to handle goods with the convenience of track and trace capability.

SUPPLIER OF TRUSTED
PEST CONTROL
SOLUTIONS

SAME DAY DISPATCH
EXPEDITED DELIVERY OPTIONS AVAILABLE

Next day before 9.30am and noon as well as Saturday deliveries available upon request. Free SMS email notification and tracking on offer. Please telephone the office for details.

The above services apply to the UK mainland (excluding Scotland) and are subject to goods being confirmed in stock at time of order.

Goods are also available to collect direct from the warehouse between 8.30am to 4pm every working day.

SAME DAY DISPATCH
EXPEDITED DELIVERY OPTIONS AVAILABLE

Place a confirmed order by telephone before 3.30pm and the consignment will be dispatched the same working day. Delivery time scales may vary depending upon courier performance and delivery options chosen at time of order.

NO CHARGE is made for standard delivery service for orders over £245.00 (excluding VAT) £8.25 charge for orders less than £245.00 (excluding VAT).

Prefer to pay by credit card? Order and pay online via our website or telephone your order/quote your mastercard visa number and your goods are on their way.

Unit 4 Caxton Business Park, Crown Way, Warmley, Bristol BS30 8XJ.
