PEST, ENVIRONMENTAL & AGRICULTURAL SOLUTIONS

Trusted manufacturer & supplier of innovative & sustainable solutions.

— ABOUT US —

Barrettine Environmental Health is the trusted manufacturer and global supplier of innovative and sustainable pest control solutions. Based in Bristol, UK, Barrettine Environmental Health innovate and manufacture integrated pest management solutions to control insect, rodent and avian pests, supplying these throughout sectors such as Professional Pest Management, Waste Management, Agriculture and Vector Control.

As a division of the Barrettine Group, this affiliated network enhances our capabilities and access to a wealth of collective knowledge and experience in quality manufacturing processes.

PEST CONTROL CATALOGUE 2026/2027

Products marked up as "Professional" can only be used by professional users holding certification demonstrating compliance with UK rodenticide stewardship regime requirements. Read the label before use. Using these products in a manner that is inconsistent with the label may be an offence. Refer to the CRRU UK Code of Best Practice (or equivalent) for guidance. When this product is supplied to a user for the control of rodents, it shall only be supplied to a professional user holding certification demonstrating compliance with UK rodenticide stewardship regime requirements".

BROMADIOLONE & DIFENACOU M

A combined active demonstrating excellent efficacy against rats and mice. Block and pasta formulation contain FLUO-NP, UV tracking technology.

PROFESSIONAL

ROMAX® MUSKIL® BLOCK

Contains 0.0025 % Difenacou m & 0.0025 % Bromadiolone. For use against rats & mice, in and around buildings. A 25 g wax block manufactured from high-quality food-grade ingredients with a predrilled hole to facilitate easy securing in bait stations. Romax® Muskil® Fluo NP® is formulated with unique Fluorescent No Phobia technology which significantly improves the primary acceptance of the bait resulting in faster kill whilst also allowing for tracking. Permanent baiting approved. Safety - Contains denatonium benzoate

Approval No: GB-2013-0757

1 x 7 Kg

ORDER CODE: BMUSBB7K

ROMAX® MUSKIL® WAX BLOCK – Proven palatability.

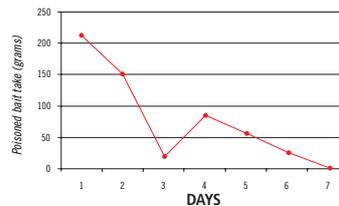

RATS

Poisoning phase: daily poisoned bait-take (grams)

MICE

Poisoning phase: daily poisoned bait-take (grams)

An extruded wax block produced with a central hole for anchoring into bait stations with edges to encourage gnawing. The block which has the unique Romax® Muskil® formulation, makes it highly attractive to both rats and mice while remaining durable in challenging conditions of high humidity and moisture.

PROFESSIONAL

ROMAX® MUSKIL® PASTA

Contains 0.0025 % Difenacou m & 0.0025 % Bromadiolone. For use against rats & mice, indoors and outdoors. A 15 g sachet containing pasta manufactured from high-quality food-grade ingredients that can be secured in bait stations. Romax® Muskil® Fluo NP® is formulated with unique Fluorescent No Phobia technology which significantly improves the primary acceptance of the bait resulting in faster kill whilst also allowing for tracking. Permanent baiting approved. Safety - Contains denatonium benzoate

Approval No: GB-2013-0756

1 x 4 Kg

ORDER CODE: BMUSPA4K

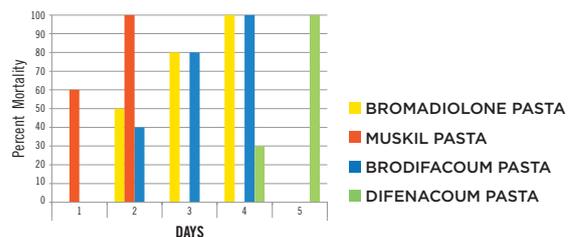

ROMAX® MUSKIL® PASTA – The fastest solution.

Laboratory tests show speed of kill compared with other actives.

RATS

MICE

Field tests and commercial usage in Europe has proven that Romax® Muskil® pasta is the fastest solution for controlling both rats and mice. The bait is packed in single dose filter bags which preserves the attracting characteristics effectively maintaining the palatability and performance in a wide range of environments.

BRODIFACOU M

PROFESSIONAL

ROMAX® VENOM LIPOGEL

The Romax® Venom Lipogel combines Brodifacoum within an increased water activity formulation offering rapid efficacy and the convenience and capacity of rapid baiting. The availability of Brodifacoum in this format gives rapid absorption into soft tissues. For use 'in and around buildings' for rats and mice.

Approval No: GB-2016-1041-0002

10 x 300 g

ORDER CODE: BVLIPBRD

PROFESSIONAL

ROMAX® VENOM BLOCK

Containing the most potent anticoagulant active ingredient, Romax® Venom is a ready-to-use 25 g wax block with 0.005 % (w/w) Brodifacoum for effective control of mice and rats. Rodents' death occurs after a few days (3 to 5) from a single feed without rousing suspicion towards the bait by the other members of the colony.

Approval No: GB-2015-0880-003

1 x 5 Kg

ORDER CODE: BVBBROD5

PROFESSIONAL

ROMAX® VENOM PASTA SACHET

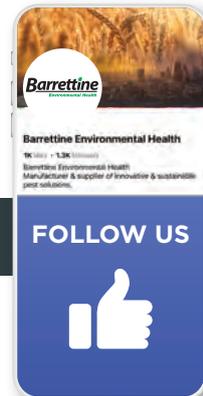

The Romax® Venom formulation of Brodifacoum made with Italian pasta is presented in sachets that can be attached or skewered within the bait box. Approved for use 'in and around buildings' for rats and mice.

Approval No: GB-2015-0881-005

1 x 3 Kg

BRODIFACOUM

PROFESSIONAL

ROMAX® VENOM WHEAT

The Romax® Venom active ingredient is infused within the core of the seed, giving a product and active, that when consumed is particularly potent to rodents. Approved for use 'in and around buildings' for rats and mice.

Approval No: GB-2015-0881-004

1 x 4 Kg	ORDER CODE: BVWBRD4K
1 x 10 Kg	ORDER CODE: BVWBRD10

ROMAX® VENOM WHEAT

ROMAX® VENOM WHEAT is a ready-to-use bait for the control of house mice and brown rats at all development stages containing a highly potent compound: brodifacoum, a single-feed, second-generation anticoagulant active ingredient. Thanks to its mode of action, rodents' death occurs without rousing suspicion towards the bait by the other members of the colony.

ROMAX® VENOM WHEAT is a rodenticide bait consisting of decorticated wheat, manufactured with SAT (Special Absorption Technology) technology, allowing the homogeneous distribution of the active ingredient both inside and on the surface of the grain. This bait is ideal for treatments when rodents' diet is mainly based on grains/corn seeds consumption, such as in rural and zoo-technical buildings, and particular civil and industrial areas (feed production, flour processing, mills, etc.). The product contains a well-balanced mix of food-origin components attractive for the rodents' species previously mentioned and incorporates a bittering agent (Denatonium Benzoate) to help prevent human consumption.

KEY BENEFITS:

- Ready-to-use rodenticide grain bait.
- Brodifacoum is a single feed, synthetic, second-generation anti-coagulant rodenticide.
- When compared to other anticoagulant rodenticides, brodifacoum has an excellent level of activity against the brown rat, and against mice.
- This is an aggressive single feed poison.
- potent poison to all mammal species and it is essential that all baits are only used indoors, and they must be well protected from non-target animals. The best way to achieve this is by placing the baits in an approved bait box.

RODENTICIDES - BRODIFACOUM

CHOLECALCIFEROL

Cholecalciferol has no known resistance making it a good choice if resistance is suspected.

RODENT control

PRODUCTS 

PROFESSIONAL

HARMONIX RODENT PASTE

Harmonix® Rodent Paste is a high-performance ready-to-use non-anticoagulant rodenticide bait containing Cholecalciferol 0.077 % w/w (0.075 % w/w pure) for the control of rats and mice for the protection of public health, stored products and materials.

Harmonix® Rodent Paste is an incredibly flexible product that provides the professional pest controller treatment options in a wide number of scenarios. Harmonix® Rodent Paste is not limited to 'in and around buildings', and the active ingredient Cholecalciferol has no known resistance making it a good choice if resistance is suspected.

Approval No: GB-2020-1266; IE/BPA 70695

1 x 5 Kg

COUMATETRALYL

Excellent efficacy against rats and demonstrates reduced risks of secondary poisoning.

RODENT control

PRODUCTS 

PROFESSIONAL

RACUMIN FOAM

IR

Contains 0.4 % (w/w) Coumatetralyl. Racumin® Foam is a new, non-bait rodenticide from Envu, offering an alternative method to control rat and mice infestations. This truly innovative foam formulation works with the rodent's natural grooming habits and is effective as a result. When faced with difficult to access areas, Racumin® Foam is for indoor use and can be applied in known rat runways, passages, entrance points / holes, covered tracks and wall cavities.

Approval No: GB-2014-0860

1 x 500 ml

ORDER CODE: BRACFO.5

BROMADIOLONE

Bromadiolone is a second generation anticoagulant offering a high degree of potency. Available in many formulations.

RODENT control

PRODUCTS 

PROFESSIONAL

ROMAX® B WHOLE WHEAT

Contains 0.005 % Bromadiolone for use against rats & mice. Romax® is formulated using high-quality food grade whole wheat, blended with feeding enhancers and adjuvants to improve palatability. The wheat is also treated to prevent germination which increases the quality of the product without affecting its palatability. Safety - Contains denatonium benzoate

Approval No: GB-2014-0826-0005

1 x 10 Kg

ORDER CODE: BRBROM10

DIFENACOU M

Difenacou m is a second generation active ingredient. A high degree of potency - available in a wide range of formulations.

PROFESSIONAL

ROMAX® D WHOLE WHEAT

Contains 0.005 % Difenacou m. For use against rats & mice, indoors and around buildings. Romax® is formulated using high-quality food- grade whole wheat, blended with feeding enhancers and adjuvants to improve palatability. The wheat is also treated to prevent germination which increases the product's quality without affecting its palatability. Safety - Contains denatonium benzoate

Approval No: GB-2011-0143-0002

1 x 10 Kg

ORDER CODE: BRDIFE10

PROFESSIONAL

ROMAX® D 50 g WHOLE WHEAT SACHETS

Contains 0.005 % Difenacou m. Whole wheat packed in 100 x 50 g sachets. The sachets do not need to be opened as the rodents will eat through the packaging material. Safety - Contains denatonium benzoate

Approval No: GB-2011-0143-0002/NI-2011-0143-0002

TRAPPING GUIDELINES FOR RODENTS

Whilst the use of traps is labour intensive, they have a part to play in rodent control, particularly for controlling very small infestations in circumstances where the use of rodenticides is unacceptable. They are unlikely to contribute significantly to large scale control programmes. The major reason for their limited applicability is the behaviour known as neophobia. If large scale control using traps is essential, then the trapping programme needs to be very intensive and very closely monitored.

The use of break-back traps for both rats and mice is probably the most widespread and successful trapping technique. Careful placement is required with break-back traps, the treadle end of the trap being placed across the rodent run against a vertical surface to minimise avoidance. Bait does not need to be used and may reduce the effectiveness of the trap.

All traps should be visited at least once every 24 hours to remove any dead rodents, reset the traps, and ensure that no rodents are being held alive.

SPRING TRAPS GENERAL USE

The law requires that spring traps must be set in manner which prevents the capture or harm of non-target animals such as birds, pets or protected species. Only spring traps which have been approved for the control of animals may be used, the approval of traps is overseen by each of the devolved governments, please refer to local legislation for further information. Traps must be set either in a tunnel (natural or artificial) or using an integral enclosed housing if included in the trap design. This tunnel must be large enough to allow the trap to swing closed, but the entrance should be reduced in size to exclude entry of any non-target species. Traps should be inspected daily and sprung weekly to prevent rust. Spring traps should not be used in areas where protected species may be present (i.e. red squirrels and polecats). All traps must be securely anchored.

MOLE, SQUIRREL TRAPS & PROOFING

MOLE TRAP HALF BARREL (DUFFUS STYLE)

A very popular trap for moles with good effectiveness in burrows.

Each

ORDER CODE: BTRMOLBA

TALPEX® MOLE TRAP

Arguably the best mole trap on the market. Similar to the scissor and pincer traps but more robust. Steve Caple producer of the "Trapping Techniques" video confirmed the following; "Since switching to the Talpex trap my catch rate compared to the more commonly used traps has increased by at least 50 %".

Each

ORDER CODE: BTRMOTAL

FENN TRAP MARK 4

For squirrel, rat or stoat. The trap is to be set in runs or burrows. A artificial surround or tunnel should be created around the trap to protect non-target species.

ROMAX® RODENT SEAL

Romax® Rodent Seal uses a top-quality industrial sealant in a mix of stainless steel fibres. The benefits of such 'wire wool' plus proofing materials have long been known, but they've been combined to offer a professional and time-saving solution to exclusion for the first time. In addition, the product has been commercially tested and is 'metal-detectable', making it a good choice for sealing around plant and machinery in the food industry, whether this be for rodents, insects or just housekeeping. Standard outer 25

1 x 310 ml

ORDER CODE: BRORODSE

ROMAX[®] RODENT SEAL

SEALING THE ENTRY POINTS
is an essential and cost-effective prevention solution.

Key Benefits:

- Contains metal fibre technology encapsulated within a silicone body to prevent erosion of the wire fibres.
- It doesn't have to be re-applied every year.
- Can be used indoors and outdoors, around buildings.
- Fire/heat and UV resistant.
- Maintains structure once applied.
- Cures on exposure to form an elastic silicone rubber.
- Prevents access to rodents: seals gaps, cracks and openings of many sizes.

ANT & COCKROACH BAIT

MoBe® ANT GEL BAIT

MoBe Ant gel is an effective method of controlling both native and invasive species of ants both indoors and around buildings. The gel bait is composed of highly desirable sugars designed to exploit the social behaviour of the insects and eradicate the nest.

MoBe Ant gel is effective against all life stages and colony members, most importantly the queen. The gel can be applied directly along foraging trails or in a feeding station to encourage uptake.

4 x 35 g

ORDER CODE: BMOBAG30

MoBe® COCKROACH GEL BAIT

MoBe Roach Gel is effective against all life stages of both German and Oriental Cockroaches and suitable to be applied directly to their harborage areas, minimizing risk of exposure to non-target species and humans.

Effective control is achieved through exploiting the natural habits of the cockroach, allowing the active to transfer between individuals inhabiting the same area - even if they do not directly ingest the bait.

4 x 35 g

ORDER CODE: BMOBRG30

BIOPREN BMS

Containing the insect growth regulator S-Methoprene (0.5 %). Biopren BMS acts by preventing reproduction and blocking growth of larvae in Pharaoh's ant colonies. This granular bait formulation is contained in a ready-to-use container with a food attractant, which can simply be cut open and stuck to a suitable surface.

12 x 2.5 g

MoBe[®] roach GEL BAIT

• Quick and precise delivery

• Knock-on effect for fast control

• More effective on adult cockroaches than Fipronil*

Highly Attractive Bait Matrix

MoBe Roach Gel is effective against all life stages of both German and Oriental Cockroaches and suitable to be applied directly to their harborage areas, minimizing risk of exposure to non-target species and humans.

Effective control is achieved through exploiting the natural habits of the cockroach, allowing the active to transfer between individuals inhabiting the same area – even if they do not directly ingest the bait.

**Imidacloprid shown to provide more effective control of adult cockroaches than fipronil in field studies (91.17% - Imidacloprid vs 59.33% - Fipronil)*

(Abdullah, N. and Majid, A., 2022)

INSECT TRAPS

MoBe® MOAT

MoBe® Moat has been designed and successfully used by professional pest controllers in conjunction with some of the industries leading food manufacturers.

The MoBe® Moat consists of 18 metres of siliconised paper with adhesive applied to one surface and has been manufactured as an aid to trapping insects around problem, high risk areas. The strip is wide enough to act as a barrier to help prevent insects from crossing over. The paper comes with pre-printed hazard warning lines so to warn others of the tape as well as usage instructions. The tape can be cut to the desired length giving a great number of potential applications. If trapping/monitoring insect pests, additional lures can be added along the tape's length.

Primarily the MoBe® Moat has been designed as a 'quarantine' barrier working in two ways:

- To stop potential movement by pests into previously infestation-free areas/products
- To cordon off known infested areas or products to prevent the spread of an infestation.

Some of the many potential applications:

- 1) To quarantine contaminated pallets of product and prevent cross-contamination to other stock, e.g. peanuts, rice, pet food.
- 2) To act as a barrier to known clean products, e.g. post fumigation commodities or finished product awaiting dispatch.
- 3) Using tape to glue the underside, MoBe® Moat can be stuck to the inside of silos to prevent migration of grain pests.
- 4) Act as a single large overnight trap in sensitive infested areas, e.g. around the perimeter of commercial kitchens against cockroaches.

Please be aware the start of the roll contains no glue.
Standard outer 15

Please note that whilst the glue has been designed and tested successfully against insects, as with other similar devices, we cannot guarantee that it will successfully retain all pests under all environments and conditions.
The MoBe® Moat is sold as a professional only product.

1 x 18 m

ORDER CODE: BMOBMOAT

MoBe® ROACH TRAP

The MoBe roach trap is an effective, low profile, monitoring trap that can be placed under shelving and into restricted spaces which can be used before, during, and after treatment of cockroach infestations to locate problem areas of harbourage, allowing pest controllers to focus their efforts in specific areas. The MoBe roach traps have a high capacity to detect low-level populations and can also be used in a wide variety of environments, including the food industry, as part of an integrated pest management programme. The traps are a safe and non-toxic way to identify cockroaches of all species.

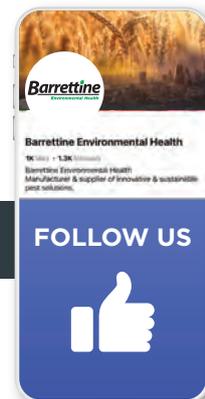

Benefits:

- Ready to use
- Glue board with integrated attractant lure
- Non-toxic monitoring
- Low profile for effective placement

MoBe[®] Moat

A Multi-purpose Adhesive Barrier

For temporary quarantine, pest monitoring and product protection.

Protects against
Crawling Insects

KEY FEATURES:

- /// Isolate suspected and infested products.
- /// Ideal for use as a temporary monitor trap & entry barrier.
- /// Chemical free protection for food storage, production & handling materials.
- /// Special non-dry glue technology - stays sticky for long periods.
- /// 18 metres on every roll - special siliconised paper.
- /// Easy to tape down for greater security.

Attach food or pheromone lures to attract target pests.

MoBe Moat can be cut to fit any situation.

INSECT PHEROMONES & LURES

GENERAL GRAIN BEETLE ATTRACTANT

The lure has been formulated to be particularly effective in attracting: *Sitophilus granarius* (grain weevil, wheat weevil, or granary weevil) a serious pest of oats wheat, barley, rye, corn and rice. *Sitophilus oryzae* (lesser grain weevil or rice weevil) pests of stored cereals such as barley, maize, rice and wheat, split peas and pasta. *Oryzaephilus surinamensis* (saw-toothed grain beetle) a pest of damaged cereal grains.

1 x 10

ORDER CODE: BGRBTATT

ENTRAP - GRAIN STORE INSECT MONITOR

For use in empty grain stores to monitor insect levels. Easy to assemble sticky trap with luring agent - lure contains no grain or nuts.

1 x 4 Traps & Lures

INSECT CONTROL - TOBACCO BEETLE & MOTH TRAPS

MoBe® COMBO TRAP Mk.2

The MoBe® Combo Trap Mk.2 monitoring system has been designed specifically for the Tobacco Industry and is based on the latest in pheromone technology. The MoBe® lure is a combined lure that contains the sex pheromone for both the tobacco beetle (*Lasioderma serricorne*) and tobacco moth (*Ephestia elutella*) thus reducing both product and labour costs.

Standard outer 10

1 x 20 Traps

ORDER CODE: BTRMOBET

SERRICO TRAPS

Folded carton board trap lined with contact adhesive. Attracts Tobacco Beetle through placement on the trap of a food attractant and the Female Sex Pheromone. Each pack contains 10 traps, Pheromone/Food Lures. (One year shelf life).

Standard outer 20

1 x 10

ORDER CODE: BTRSERIC

MoBe® Combo Mk. 2 Trap

EFFECTIVE FOR THE:

- Early detection of insect pests within the tobacco industry.
- Post treatment assessment of control measures.

APPROVED FOR USE IN:

- Tobacco storage facilities and warehouses.
- Tobacco supply chain and shipping containers.
- Tobacco manufacturing facilities.
- End user applications where tobacco products are stored.

TOBACCO PEST CONTROL

INSECT MONITORING

PROTECT YOUR INVESTMENT, YOUR PROFIT, YOUR REPUTATION!

The MoBe® Combo Mk.2 tobacco monitoring trap is an essential component in the quality management of your tobacco product. Early assessment of any potential infestation of the two key insect pests of stored tobacco is vital.

CROP PROTECT® 25EC

CropProtect® 25EC is the latest addition to the Barretine family of grain hygiene products. This concentrated product is capable of treating one tonne of grain with just 10ml (diluted in one litre of water) and providing you with long-lasting protection for up to a year.

CropProtect® 25EC is designed to be applied to the interior of grain storage facilities to eliminate any pests remaining from previous issues or applied directly to the grain post-harvesting to ensure long-lasting defence against infestation.

MAPP: 20530

1 x 1 Litre

ORDER CODE: BCROPPRO

CROP PROTECT[®] 25EC

A VERSATILE GRAIN PROTECTANT

Prevents contamination from insects and retains the quality of stored grains.

MAPP 20530

- ✓ Pre-harvest treatment of the building fabric
- ✓ No with-holding period
- ✓ Admixture ✓ Pyrethroid formulation

CropProtect[®] 25EC is designed to be applied to the interior of grain storage facilities to eliminate any pests remaining from previous issues or applied directly to the grain post harvesting to ensure long-lasting defence against infestation. This concentrated product is capable of treating 50m² with just 20-30 ml (diluted in 5 litres of water) and providing you with long lasting protection. CropProtect[®] 25EC may also be applied directly to grain as an admixture.

Thanks to its synergised formulation of deltamethrin and piperonyl butoxide, CropProtect[®] 25EC can eliminate and deter common grain pests such as grain weevils, saw toothed grain beetles, flour beetles and grain borers. Additionally, flying pests such as warehouse and grain moths are effectively controlled.

NOURISH & PROTECT WOOD PRESERVER

A high quality low odour solvent based, deep penetrating preserver which is used for the protection against wood destroying fungi (wet rot) , wood discolouring fungi and wood boring insects. Provides a semi-transparent matt / satin finish allowing the natural wood texture to be visible. Also no subsequent topcoat product is required unless for aesthetic purposes. For outdoor use and also for use on windows/frames, external doors/frames (internal & external sections). Other pack sizes and colours available. Contact the sales office for details.

Colour: Dark Brown

2 x 5 Litre	ORDER CODE: BWOLB005
1 x 25 Litre	ORDER CODE: BWODB025

NOURISH & PROTECT WOOD PROTECTIVE TREATMENT

An ideal wood treatment for outdoor timber structures such as Sheds, Fences, Trellis, Pergola and timber Gazebo's. A low build film product that absorbs into the wood with successive coats building onto the surface to give excellent water repellency and beading. Oil / Solvent based for deeper penetration of substrate. Contains water repellent resins and film biocide preserver to prevent surface growth of mould / algae and together this helps reduce decay, swelling, twisting of wood. Pigments have good UV fade resistance. Friendly to beneficial insects when dry. Other pack sizes and colours available.

Colour: Dark Brown

2 x 5 Litre	ORDER CODE: BPTDB005
1 x 25 Litre	ORDER CODE: BPTDB025

PREMIER CLEAR PRIMER UNIVERSAL PRESERVER

Clear Universal Wood Preservative (CUWP) is a solvent-borne ready to use product. It contains active ingredients effective against wood destroying and wood discolouring fungi and against wood-boring insects. CUWP penetrates wood quickly and thereby gets deep into inner layers. It is moisture regulating and provides an adhesive surface suitable for glues, fillers, and solvent or water-based finishing treatments such as paints, varnishes and stains.

2 x 5 Litre	ORDER CODE: BUPCL005

BIRD control

PRODUCTS 

PEST CONTROL CATALOGUE 2026/2027

BIRD REPELLENTS & GUANO CLEANING

ORNAWAY® BIRD REPELLENT

Ornaway® Bird Gel is a novel, highly effective yet discrete bird deterrent for use on buildings and other structures.

The convenience of Ornaway in pre-filled dishes allows a significant time-saving aspect to the bird installation. The formulation utilises high electromagnetic reflectance spectrums that birds avoid. To be used within an integrated approach to manage birds that could include housekeeping/ cleaning, trapping, spikes and netting. Once properly installed, the product remains effective for at least two years, even in harsh climates.

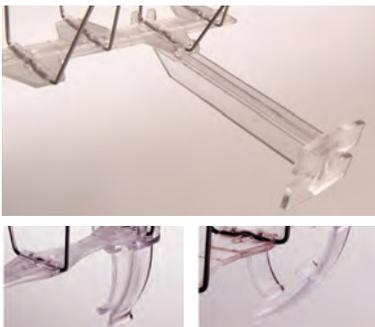

The gel is intended to be applied in the UV stabilised, low-profile dishes that are supplied with the product. Once installed, the dishes are usually invisible from ground level, so do not detract from buildings' visual appearance.

Ornaway® Bird Gel is also offered in pre-filled dishes as pictured below. The 300 g Caulking Tube includes 15 dishes for filling.

ORDER CODE	DESCRIPTION	PACK SIZE
BBIORGE	Caulking Tube	1 x 300 g
BORNDISH	Pre-filled Dishes	1 x 15

ORNAWAY® CLIPS

Ornaway® bird dish magnets offer the user ultimate versatility in the installation of Ornaway® bird gel. The heavy-duty magnets allow the dishes to be securely attached to metallic structures and will remain in place, even in windy conditions.

ORDER CODE	DESCRIPTION	PACK SIZE
BAVI162	Clips for Gutters	1 x 10
BAVI163	Clips for Lipped Gutters	1 x 10
BAVI171	Clips for Windows	1 x 10

GUANAWAY®

Disinfectant concentrate (1:24). Contains Didecyltrimethylammonium Chloride for use while cleaning and removing bird waste. Alkaline formula allows acidic residues to be effectively neutralised, preventing corrosion of the building fabric. Broad spectrum elimination of bacteria, viruses and fungi (including *E. coli*, *Covid-19* and *Aspergillus*). Suitable for use in sprayers and trigger bottles.

1 x 5 Litre	ORDER CODE: BDISB005

BIRD SPIKE CLIPS & SEALANT

CLIPS FOR GUTTERS

Clips for Gutters fit securely onto the base of P14, P20, P32 and G20 Bird Spikes. The clips for Gutters allows the spike strips to be clipped onto the side of a wide variety of gutters, allowing free flow of water underneath. Two clips are required per strip. Clips for Lipped Gutters fit securely onto the base of P14, P20, P32 and G20 Bird Spikes. They allow the spike strips to be clipped onto the side of a variety of lipped gutters, including many international style gutters, allowing free flow of water underneath. Two clips are required per strip.

ORDER CODE	DESCRIPTION	PACK SIZE
BAVI162	Clips for Gutters	10
BAVI163	Clips for Lipped Gutters	10

CLIPS FOR WINDOWS & SOLAR PANELS

Clips for Windows fit securely onto the base of P20, P32 and G20 Bird Spikes. They allow the spike strips to be easily secured onto window frames using White adhesive or screws. These clips are extremely useful as they allow the spikes to protect the window sill without hindering the operation of the window. Two clips are required per strip.

Clips for Solar Panels fit both solar panels and roof ridges it is easily glued or screwed in to place. These clip securely into place and are compatible with P14 and P20, P32 & G20. Made from a UV stable polycarbonate material which is compatible with 90°, 105° and 125° roof tiles and compatible with both 45° and 37.5° solar panels.

ORDER CODE	DESCRIPTION	PACK SIZE
BAVI171	Clips for Windows	10

AVISIL

For use with a caulking gun, this is a professional product that cannot be found in DIY shops. Avisil is vastly superior to ordinary clear DIY silicone due to it's ease of application, it stays permanently elastic after curing, Avisil has a high temperature resistance and UV resistance. A clear, high quality, neutral-curing silicone adhesive, Avisil is recommended for use where the surface is dry. It offers excellent adhesion on most building materials. One tube (310 ml) of Avisil can install up to 15 m of bird spikes.

PEST CONTROL CATALOGUE 2026/2027

If you are unsure which insecticides can be applied through the various applicators, then please see our A-Z charts within the Technical Section to the rear of the catalogue.

FOGMASTER TRI-JET FOGGING MACHINE

The Commander Tri-Jet Fogger is suitable for chemical fogging (using pesticides, sanitisers etc.) and can also be used for humidifying.

With adjustable particle size and discharge rate, the Tri-Jet can mist up to 9 metres in any direction indoors or outdoors. Also ideal for deodorising smoke contaminated buildings, and the fine fog can be used to penetrate porous materials. Pest control, odour control, and disinfection or sanitising are just a few of the many uses for this product.

Aluminium housing, fuel and oil resistant vinyl tubing, and brass control valves and fittings round out this sturdy apparatus.

The Tri-Jet is CE approved and can be used with water and oil-based liquids.

GLORIA TYP 89

Gloria special pressure sprayer Typ 89 has got a capacity of one litre and a maximum operating pressure of 3 bar. Its highlight is the adjustable nozzle with swivelling head that enables spraying into corners that are difficult to access.

1 Litre

ORDER CODE: BSPGLPL1

GLORIA 405T

Gloria 405 T Profiline has got a pressure tank made of steel with a high-quality internal plastic coating and a capacity of 5 litres that stands out due to its high durability. Contact between aggressive media and steel tank is avoided thanks to the coating, and cleaning is considerably easier. The high-performance sprayer works with an operating pressure of 6 bar and impresses with its equipment and a wide range of use.

COSHH & PPE REGULATIONS

A GUIDE TO THE BARRETTINE RANGE OF PERSONAL PROTECTIVE EQUIPMENT COSHH AND PPE REGULATIONS

Control of Substances Hazardous to Health Regulations (COSHH) 2002, as amended are a key part of health and safety at work. The regulations place a legal requirement on all employers and operators including self-employed people to undertake an assessment of the risks created by exposure to any substances hazardous to health. The risk assessment shall include consideration of the hazardous properties of the substance, manufacturers information contained in any material safety data sheet, the level and type of duration of exposure, working circumstances and other factors relating to exposure limits, control measures etc.

Amendments introduced in 2005 established a framework for adequate control of exposure through the application of principles of good practice (Schedule 2A). These amendments also replaced Occupational Exposure Standards (OESs) and Maximum Exposure Limits (MELs) with Workplace Exposure Limits (WELs). WELs apply only to inhalation exposure and are legal maximum concentrations that must not be exceeded. However, compliance with a WEL alone does not necessarily represent adequate control, particularly for carcinogens, mutagens, and asthmagens, where exposure must be reduced to as low as reasonably practicable (ALARP).

The Personal Protective Equipment Regulations 1992, as amended in 2022, require employers to provide suitable PPE where risks cannot be adequately controlled by other means. PPE must be; appropriate for the work and wearer, maintained and replaced as necessary, accompanied by suitable instruction and training and appropriately stored when not in use.

What does this mean to you?

The provisions make the duty holders focus on applying principles of good practice to controlling exposure rather than compliance with any OEL. (Schedule 2A)

This has the effect of bringing into the definition of adequate control all substances within the scope of the COSHH regulations, irrespective of whether they have an OEL, and all routes of exposure i.e. inhalation, absorption and ingestion and injection. It is now accepted that it is not possible to give a "Safe limit" as before because in practice a guarantee for health protection for all individuals, even if exposure is below a specified limit, is not scientifically secure.

The revised system of WEL's will be set by HSE-led expert committees. These are listed in a publication EH40/2005: Workplace Exposure Limits, which is updated periodically. Duty holders must always refer to the latest edition of EH40, as limits are revised in line with emerging scientific evidence. There are specific WEL values in Table 1 for all substances.

The amendments to COSHH should make it easier for enforcers and duty holders to determine whether exposures to substances are adequately controlled and proportionate to the risk.

As part of the Barrettine professional services, we have available qualified COSHH Consultants who are able, on a fee basis, to undertake COSHH Assessments and preparation of COSHH documentation for our customers, as well as being able to define the personal protective equipment required in the specific situations encountered by our customers. In addition we are happy for our staff to offer advice, at no charge, on the level of protection required in applying and using any of the products which we offer as part of our Technical Sales Service to our customers.

Schedule 2A

Principles of good practice for the control of exposure to substances hazardous to health.

The eight principles of good practice for the control of exposure to substances hazardous to health are set out in Schedule 2A of The Control of Substances Hazardous to Health Regulations 2002 (as amended). Approved Code of Practice and guidance .

The principles are reproduced below:

- (A) Design and operate processes and activities to minimise emission, release and spread of substances hazardous to health;
- (B) Take into account all relevant routes of exposure - inhalation, skin absorption and ingestion - when developing control measures;
- (C) Control exposure by measures that are proportionate to health risk;
- (D) Choose the most effective and reliable control options which minimise the escape and spread of substances hazardous to health;
- (E) Where adequate control of exposure cannot be achieved by other means, provide, in combination with other control measures, suitable personal protective equipment;
- (F) Check and review regularly all elements of control measures for their continuing effectiveness;
- (G) Inform and train all employees on the hazards and risks from the substances with which they work and the use of control measures developed to minimise the risk;
- (H) Ensure that the introduction of control measures does not increase the overall risk to health and safety. If employers apply the principles correctly, exposure should be below any relevant WEL. Control by personal protective equipment should only be used when other measures are not reasonably practicable. The list of WEL's applies to concentrations of hazardous substances breathed in by the worker and are used to determine the adequacy of control measures. There are several publications, which give advice and guidance on what is required under the COSHH Regulations.

Regulation 7 COSHH 2002. Fit Testing of Facepieces

The performance of RPE with a tight-fitting facepiece (filtering facepieces, half and full full-face masks) depend on a good contact between the wearer's skin and the face seal of the mask. A good face seal can only be achieved if the wearer is clean-shaven in the region of the seal and the facepiece is the correct size and shape to fit the wearer's face. Employers should ensure that the selected facepiece (tight and loose fitting types) is of the right size and can correctly fit each wearer. For a tight-fitting facepiece (filtering facepieces usually known as disposable masks, half and full face masks) the initial selection should include a face-fit test to ensure the wearer has the correct device. Barrettine can advise customers about this requirement.

WHY CHOOSE BARRETTINE AS YOUR PREFERRED SUPPLIER?

QUALITY PRODUCTS

Barrettine Environmental Health is a division of the Barrettine Group, which manufactures and develops a diverse range of chemical products – from exterior wood treatments and interior decorating products to bulk solvents and industrial blends. Many of our products have received awards in their field and enjoy the support of major national distributors.

TECHNICAL SUPPORT, PRODUCT STEWARDSHIP, REGULATORY & LEGISLATIVE UPDATES.

Professional products are only sold onto qualified/competent personnel that can demonstrate they have the required training and qualifications.

QUALIFIED STAFF

Barrettine at the heart of our industry, constantly update Customers with the ever-changing regulatory & legislative issues we must implement. A number of Barrettine staff represent the company and the industry within a number of independent bodies and organisations such as the NPTA & CRRU.

BARRETTINE GROUP CORPORATE & SOCIAL RESPONSIBILITY

(Full policy document available on request)

We recognise that we must integrate our business values and operations to meet the expectations of our stakeholders. This includes our Customers, Employees, Investors, Suppliers, the Community and the Environment.

The Board of Directors supports this principle and the aim of our full policy is to translate this into guidelines, standards and actions that set a common approach for all employees within our Business.

PURPOSE & AIMS

The Barrettine Group Mission is:

- To enhance our expertise in our key Business activities; Chemical Formulations, Chemical Products, Chemical Handling, Biocides & Product Development.
- Give priority to Customer service and Flexibility
- Offer value for money, Sustainable Products & Services that meet the demands of our Customers and markets, whilst being acceptable to the Environment.
- Target and achieve the highest quality standards in all we do.
- Honesty & Integrity, Always Trustworthy

These core values continue to help us achieve our overall objective; A strong performing business respected by our Customers & Supply Partners, envied by our Competitors.

CODE OF BUSINESS ETHICS

We recognise that good CSR embraces all aspects of sustainable development and the way we affect people through our business operations. Therefore, our CSR applies to all of the operations of the Company and its subsidiaries and sets out the minimum standards expected from staff in their internal and external dealings with colleagues, customers, stakeholders and third parties.

Our full range of policies cover: Employees - Equality - Human Rights - Modern Slavery - Environment - Quality Control - Sustainability - Impact on society - Ethics & Ethical Trading.

ENVIRONMENT

ISO 14001 Standard.

(Full Environmental Policy available on request)

QUALITY MANAGEMENT SYSTEM

ISO 9001 Standard. (Full policy available on request)

SUSTAINABILITY - IMPACT ON SOCIETY - ETHICS AND ETHICAL TRADING

(Full policy document available on request).

- Our Sustainable policy will be maintained and it sets out the principles, policies and procedures on which sustainable business activity within Company will be based. The policy acts as a prompt to staff to consider sustainability as a factor in all key decisions;
- We take steps to understand how we can most effectively support the needs of the local and wider community and implement initiatives accordingly; A number of Charities are supported by both the Business as well as individual Employee fundraising events.

TOTAL SERVICE

- Barrettine strive to complete your order and deliver next day, we will always advise if there are any issues beforehand.
- A full competitive package. We will do our best to match, or beat any price on offer.

MORE THAN JUST A SUPPLIER.

A true partner to support your business, the right Chemistry!

A-Z RODENT control

PRODUCTS 

The following charts have been produced only as an aid in product selection and to summarise some key points. Before using any of the rodenticides listed, a thorough site inspection and plan should be carried out. In all circumstances you should always read the product label. The information given in the table is to the best of our knowledge and is given in good faith at the time of print. We cannot accept any responsibility for loss or damage arising from any error or omission. You should always refer to the product SDS and label before use. PRODUCTS

The following charts have been produced only as an aid in product selection. In all circumstances you should always read the product label. The information given is to the best of our knowledge and is given in good faith. We can not accept any responsibility for loss or damage arising from any error or omission. Certain information such as Personal Protective Equipment (PPE) requirements are only our recommendation and are provided as a guide and in no way should they replace any part of your COSHH assessment. Under certain conditions you may require additional PPE. You should always refer to the product MSDS before use.

ALPHA SCT

ACTIVE %	SPECIES EFFECTIVE AGAINST	AREA OF USE	DILUTION/ DOSE RATES	APPLICATION TECHNIQUE	PPE REQUIRED	RESIDUAL OR KNOCKDOWN
Cypermethrin 10 % (w/w), Tetramethrin 0.9 % (w/w)	Flies, Moths, Beetles, Fleas, Ticks, Bed bugs, Cockroaches, Crickets, Silverfish, Booklice, Mites, Ants, Mosquitoes, Wasp and Centipedes.	For use in and around domestic properties, public and municipal areas, refuse tips, poultry houses, slaughterhouses and manure heaps.	Routine treatment - Dilute 25 ml in 5 L of water and apply at a rate of 50 ml per sq/m - Heavy infestations: Dilute 50 ml in 5 L of water and apply at a rate of 50 ml per sq/m.	A suitable hand or mechanical sprayer can apply as a coarse spray and apply at a rate of 50 ml per sq/m.	Coveralls, synthetic rubber/ PVC gloves, face shield - If spraying in confined places, full face mask or half mask with goggles and suitable filters.	Residual surface spray.

BIOPREN 6 EC

ACTIVE %	SPECIES EFFECTIVE AGAINST	AREA OF USE	DILUTION/ DOSE RATES	APPLICATION TECHNIQUE	PPE REQUIRED	RESIDUAL OR KNOCKDOWN
s-Methoprene 6.74 % (w/w), Pyrethrin 4.81 % (w/w), Piperonyl Butoxide 10.17 % (w/w)	Bed bugs and Fleas, both as a flushing agent and knockdown insecticide.	For Indoor use against Blood sucking insects (Bed bugs & Fleas) and other crawling insects in surfaces, cracks, crevices, carpets, soft furnishings, mattresses, pet housing and pet bedding.	Bed bugs-dilute 1 ml of product to 100 ml of water - Fleas-dilute 1ml of product to 250 ml water.	A suitable hand or mechanical compression sprayer.	Full face mask or half mask with goggles, chemical-resistant gloves or coveralls.	Residual.

BIOPREN BMS

ACTIVE %	SPECIES EFFECTIVE AGAINST	AREA OF USE	DILUTION/ DOSE RATES	APPLICATION TECHNIQUE	PPE REQUIRED	RESIDUAL OR KNOCKDOWN
s-Methoprene 0.05 % (w/w)	Pharaoh ant	In and around the Home, Food industry areas, Bakeries, Butcher's shops, Hotels, Hospitals, Restaurants and similar establishments.	1-2 bait stations / 5 sq/m (depending on level of infestation).	Ready-to-use - just cut off top on the dotted line and stick each station along Ant runs or near nests.	Wear suitable protective clothing and gloves.	Knockdown.

CIMETROL SUPER EW

ACTIVE %	SPECIES EFFECTIVE AGAINST	AREA OF USE	DILUTION/ DOSE RATES	APPLICATION TECHNIQUE	PPE REQUIRED	RESIDUAL OR KNOCKDOWN
Cypermethrin 25 % (w/w), Tetramethrin 10 % (w/w), Piperonyl Butoxide 20 % & Pyriproxyfen 1 % (w/w) of insect growth regulator	Bed bugs, Fleas, Cockroaches, Beetles (inc. larvae), Flies, Mosquitoes, Moths (inc. larvae) and Wasps.	For use inside all domestic, commercial, and industrial premises, including Kitchens, Hotels, Dormitories (inc. sleeping areas), Hospitals (excl. occupied wards), Military establishments, Food storage (inc. Processing areas).	Crawling Pests (Routine Treatments): 25 ml of product to 5 L of water - Crawling Pests (Heavy infestations): 50 ml of product to 5 L of water - Flying Insects (Routine Treatments): 25 ml of product to 5 L of water - 1 L of ready-to-use solution treats 20 m ² .	Compression Sprayer, apply as a coarse, low-pressure spray.	Full face mask or half mask with goggles, chemical-resistant gloves or coveralls.	Excellent residual and knockdown with flushing effect, plus long period of control due to IGR.

ORDER CODE: BPIDBOOK

MoBe® ANT GEL BAIT

ACTIVE %	SPECIES EFFECTIVE AGAINST	AREA OF USE	DILUTION/DOSE RATES	APPLICATION TECHNIQUE	PPE REQUIRED	RESIDUAL OR KNOCKDOWN
Imidacloprid 0.01%	Tropical Ants, Argentine Ants, Black Ants	Indoors and Outdoors	Indoors: 0.2-0.4g/m ² Outdoors: 0.2g/m ²	Apply using suitable bait gun/ applicator	Chemical resistant gloves	Knockdown and residual.

MoBe® ANT STATION

ACTIVE %	SPECIES EFFECTIVE AGAINST	AREA OF USE	DILUTION/DOSE RATES	APPLICATION TECHNIQUE	PPE REQUIRED	RESIDUAL OR KNOCKDOWN
Imidacloprid 0.01%	Tropical Ants, Argentine Ants, Black Ants	Indoors and Outdoors	One station /4 m ² along foraging trails	Station is supplied ready to use	Chemical resistant gloves	Knockdown and residual.

MoBe® ROACH GEL BAIT

ACTIVE %	SPECIES EFFECTIVE AGAINST	AREA OF USE	DILUTION/DOSE RATES	APPLICATION TECHNIQUE	PPE REQUIRED	RESIDUAL OR KNOCKDOWN
Imidacloprid 2.15%	German Cockroach and Oriental Cockroach	Indoors only	German Cockroach: 0.1 - 0.2g/m ² Oriental Cockroach: 0.2 - 0.3g/m ²	Apply using suitable bait gun/ applicator	Chemical resistant gloves	Knockdown and residual.

OA2KI CONCENTRATE & OA2KI READY-TO-USE

ACTIVE %	SPECIES EFFECTIVE AGAINST	AREA OF USE	DILUTION/DOSE RATES	APPLICATION TECHNIQUE	PPE REQUIRED	RESIDUAL OR KNOCKDOWN
Aqueous cellulose polymer	Ants, Bed bugs, Fleas, Flies and small insects.	Refer to product label.	Concentrate only: 1 part concentrate to 7.5 parts water - 500 ml of Concentrate makes 4.25 litres of ready-to-use product.	As a surface spray-use a knapsack / compression sprayer-apply as a medium spray - As a space spray-apply through a suitable ULV or fogging equipment that can dispense water - based products.	Wear face protection and gloves.	Knockdown.

OA2KI POWDER

ACTIVE %	SPECIES EFFECTIVE AGAINST	AREA OF USE	DILUTION/ DOSE RATES	APPLICATION TECHNIQUE	PPE REQUIRED	RESIDUAL OR KNOCKDOWN
Diatomaceous Earth	Effective in desiccating areas where applied.	Domestic, Commercial, Public and Institutional premises, inc. Kitchens and Food preparation/ manufacturing areas.	For public health pest-apply as required to cracks and crevices 10-30 g per m ² .	Apply using a suitable mechanical or electric dust applicator or via a puffer pack.	1/2 mask with goggles, chemical-resistant gloves and coveralls.	Extremely residual. If product is applied to dry, clean and undisturbed environments.

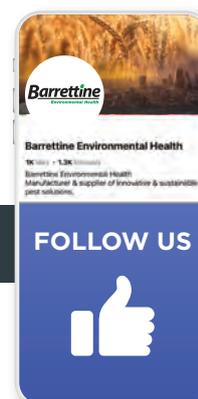

PROTECTOR ONE SHOT

ACTIVE %	SPECIES EFFECTIVE AGAINST	AREA OF USE	DILUTION/ DOSE RATES	APPLICATION TECHNIQUE	PPE REQUIRED	RESIDUAL OR KNOCKDOWN
Pyrethrin 0.2 % (w/w)	For the control of flying insects such as Flies, Mosquitoes, Ants, Cockroaches, Wasps, Earwigs, Silverfish (inc. other bristletails), Fleas, Beetles, Bed bugs, Moths, Booklice, Mites (inc. Dust mites).	Use in domestic & commercial situations, inc. kitchens, hospitals (not occupied wards), hotels, restaurants, public & municipal buildings & onboard ships, for use outdoors on patios, paths amenity areas, transit stations, refuse tips & wasp nests. In & around farm buildings.	Ready-to-use aerosol.	Ready-to-use aerosol.	Full face or 1/2 mask with goggles, chemical-resistant gloves and coveralls.	Knockdown.

VULCAN P5

ACTIVE %	SPECIES EFFECTIVE AGAINST	AREA OF USE	DILUTION/ DOSE RATES	APPLICATION TECHNIQUE	PPE REQUIRED	RESIDUAL OR KNOCKDOWN
Permethrin 0.05 % (w/w)	Fleas, Lice, Mites, Ticks, Cockroaches, Earwigs, Beetles (inc. larvae), Moths (inc. larvae), Bed bugs, Ants, Woodlice, Silverfish and Wasps.	In and Around buildings.	10-25 g per m ² .	Dusting applicator.	Full face mask or 1/2 mask with goggles, chemical-resistant gloves and coveralls.	Residual and knockdown.

WATER VOLE PROTECTION

KNOW YOUR VOLE

Water voles are easily confused with rats. Rats are treated as pests but water voles are a legally protected species. How can pest control affect water voles? Controlling pests such as rats may lead to accidental destruction of water vole colonies. Damage occurs when water voles are mistaken for rats, or when control methods are used carelessly. Rats sometimes prey on young water voles so careful rat control can benefit water vole colonies.

WHAT THE LAW SAYS

Is it an offence to intentionally or recklessly damage, destroy or obstruct access to any structure or place that a water vole uses for shelter or protection. It is also an offence to disturb a water vole while it is using such a place. (Wildlife and Countryside Act 1981, Schedule 5, Section 9). Blocking water vole burrows is illegal. Placing traps or bait boxes into or in the way of water vole burrows could lead to prosecution. Offences carry a maximum penalty of £5000. The court may also take any vehicle or other equipment used to commit the offence.

THREATS TO WATER VOLES

Water voles have suffered the most dramatic decline of any British mammal in the last century. There is now only one vole for every 20 that were alive in 1900. The main causes for this decline have been loss and damage to habitat, and predation by American mink. Any activity that poses the slightest threat to water voles must therefore be undertaken with extreme care.

THREATS TO WATER VOLES

If you are controlling pests near water, check for signs of water voles before starting. Your local Wildlife Trust may be able to provide information on water vole presence at the site. Both water voles and rats burrow into the banks of most types of waterway. Water voles are usually restricted to within several meters of the water's edge. Use the chart below to check for signs of water voles. If you find water voles and rats follow the advice in the leaflet. If in doubt, contact your local Wildlife Trust.

WATER VOLE (*Arvicola terrestris*)

SIZE & SHAPE	Water voles have rounded bodies and grow to 320 g, smaller than an adult male rat.
COLOUR	Water voles are generally mid-brown in colour with silky fur. Dark brown or black individuals may occur, especially in uplands.
SNOUT, EARS AND TAIL	Water voles have short blunt snouts. Their ears are almost hidden by fur. Their furry tail is two thirds of their body length.
BURROWS	4-8 cm diameter burrows usually found at the water's edge or upto 3 cm away in the bank. Short nibbled vegetation are found around holes of the higher burrows.
PATHS	Usually one main track along water's edge, with some paths pushing up into vegetation higher up the bank. Paths are normally concealed in grass and stay near the water.
DROPPINGS	Between spring and autumn droppings are left in piles of 5-100 usually within 30 cm of water. In winter droppings are dispersed. Droppings are 5-10 mm long and rounded at both ends. They have a putty-like texture, with very fine plant material visible. Green, brown, purplish or black in colour. No strong odour.
FEEDING REMAINS	The diet of water voles is mainly vegetarian. Water voles leave small piles of chopped vegetation (approx. 10cm long and cut at 45 degree angle with grooved teeth-marks at ends) at feeding sites on banks.
ACTIVITY	Can be active during the day but more likely to be seen at dawn and dusk.
FOOTPRINTS	Not a reliable guide.

BROWN RAT (*Rattus norvegicus*)

SIZE & SHAPE	Rats are bigger than water voles. Adult males weigh up to 500 g.
COLOUR	Grey or brown with a paler underside.
SNOUT, EARS AND TAIL	8-10 cm diameter burrows may occur well away from the water's edge often with a heap of soil in a 'fan' shape outside the entrance.
BURROWS	A network of well trampled paths connecting all burrows.
PATHS	Paths may lead across open land away from the water.
DROPPINGS	One or several left on paths or at the water's edge. Droppings are 12-15 mm long, flat at one end and pointed at the other. Slimy or very soft texture, occasionally granular. Light brown to black in colour. Unpleasant odour of urine or ammonia.
FEEDING REMAINS	Rats are opportunist feeders and will eat a variety of foods. Remains of meals such as broken snail shells are sometimes found on the riverbank.
ACTIVITY	Largely nocturnal.
FOOTPRINTS	Not a reliable guide.

TERMS & CONDITIONS

TERMS & CONDITIONS

1. All products are offered for sale subject to our standard conditions of sale. Full terms and conditions are available on request.
2. All prices quoted are exclusive of VAT and are subject to alteration without notice.
3. We would especially draw your attention to the following standard conditions:
Net Cash Monthly to Approved Accounts. Carriage is paid on orders of £250 or more for standard next day delivery, unless otherwise specified.
Minimum Order Value is £250 excluding VAT. Carriage is charged at cost to deliveries off the mainland such as offshore islands.
4. Notification of non-delivery must be made in writing within seven days from the date of despatch of the goods or else claims cannot be entertained.
5. Barrettine cannot take responsibility for any associated costs arising from delivery issues (such as late or failed delivery), or delivery of wrong items and neither Barrettine, nor our courier company take any responsibility if the clients request we leave goods unsigned.
6. Returns Policy - Should you return the Goods in accordance with our Terms & Conditions stated above, we reserve the right to charge a "restocking fee" which will be an amount equivalent to 15% of the price payable by you in respect of the returned Goods.

Should you wish to return anything bought from us, we will be happy to refund or exchange a product provided it is in a fully resaleable condition however you will be responsible for the postage and any associated cost and risk of the return of the goods to us.

If you wish to return your order we must receive notification within 14 calendar days from receipt of your goods. If we find that the product has not been returned to us in a fully resaleable condition, we reserve the right to refuse a refund on the item.

SPECIAL CONDITIONS OF SALE

Poisons

These products are subject to the Poisons Act 1972 and associated regulations. They can only be supplied to authorised professional or business users, where applicable, and in accordance with statutory requirements. Where required, supply must be against a signed official order or other legally mandated verification, stating the intended purpose of use. Please note: These items cannot normally be supplied on a next-day delivery service.

Pesticides

All pesticides listed are approved by ministers under the Control of Pesticides Regulations 1986 and the Control of Pesticides Regulations (Northern Ireland) 1987, where applicable. The Control of Pesticides Regulations have, in many cases, been superseded by more recent legislation including UK Plant Protection Product legislation and the Great Britain Biocidal Products Regulation (GB BPR), as appropriate.

The Health and Safety Executive (HSE) is the competent authority in Great Britain for the regulation of non-agricultural pesticides under the Control of Pesticides Regulation (COPR), which is retained and amended UK law derived from Regulation (EU) No 528/2012.

Products previously regulated under the Control of Pesticides Regulations are gradually transitioning to regulation under the GB Biocidal Products Regulation, with the COPR becoming of limited and residual application.

In addition to these requirements, Article 95 of the GB Biocidal Products Regulation establishes a list of approved active substance suppliers and product suppliers. A biocidal product may only be made available on the market if either the active substance supplier or the product supplier is included on the GB Article 95 List for the relevant product type.

Efficacy: Biocidal and non-biocidal products have varying rates of efficacy in the field and product labels should always be referred to in order to maximise efficacy.

DELIVERY OPTIONS

PLACE YOUR ORDER **BY 3:00 PM**
TO TAKE ADVANTAGE OF OUR NEXT-DAY DELIVERY SERVICE

EXPLORE OUR EXPEDITED DELIVERY OPTIONS

Enjoy the convenience of next-day delivery, before 9:30 am, noon and even Saturdays, available upon request. For more details, kindly contact our office.

RAPID ORDER PROCESSING

Place a confirmed order by telephone before 3:00 pm Monday - Thursday and 2pm Friday, and your consignment will be dispatched on the same working day. Delivery timescales may vary based on courier performance and chosen delivery options.

SERVICE COVERAGE

These services apply to the UK mainland (excluding Scotland) and are subject to product availability at the time of order. Feel free to collect your goods directly from our warehouse between 8:30 am and 4:00 pm every working day.

COST CONSIDERATIONS

All orders over minimum value are carriage paid to mainland UK unless otherwise specified.

PAYMENT CONVENIENCE

Prefer paying via card? Order and pay online through our website, or simply call us with your Mastercard or Visa number, and your goods will be on their way.
