Caustic Soda

**PLEASE READ ALL INSTRUCTIONS BEFORE USE.
DO NOT MIX WITH OTHER CHEMICALS USE IN A WELL
VENTILATED AREA.**

Open with extreme caution. Wear appropriate personal protective equipment (PPE) such as chemical resistant gloves, overalls and eye/face protection to protect against splashes. If in doubt speak, to your PPE supplier and show them this label/product, or call us for further advice.

- Always dissolve Caustic Soda granules thoroughly before use.
- Always use COLD water (the mixing process generates heat).
- Use a plastic bucket and stir carefully with a wooden spoon or stick.
- Always add Caustic Soda to water not water to Caustic Soda.
- Rinse equipment and treated areas thoroughly after use.
- Never add neat undissolved Caustic Soda direct into drains etc.
- Do not use on galvanised, zinc, aluminium or acrylic surfaces.

DRAIN & PIPE BLOCKAGES Gradually add 250g of Caustic Soda to 3 litres of cold water and stir gently. The solution will heat up. Pour immediately into drain. Leave for 20 minutes, then flush with boiling water Repeat process if necessary. Regular treatment with half strength mix (250g Caustic Soda to 6 litres of water) will prevent further blockages.

CLEANING & SANITIZING (dustbins, kennels, stables, driveways etc) Add 1-2 tablespoons Caustic Soda per 5 litres of water. Scrub soiled area with solution, then wash down thoroughly with water. Removes oil and soot.

PAINT STRIPPING Add 250g Caustic Soda to 1 litre of cold water. Apply carefully with an old paint brush. When the paint begins to blister, scrape off and rinse thoroughly.
