**POLYMER
LIQUID**

**FAST KNOCKDOWN
FOR CRAWLING & FLYING INSECTS**

ANTS

FLEAS

BED BUGS

FLIES

PESTICIDE FREE

Product description:

Oa2ki® is a novel cellulose polymer formulation combined within a water-based delivery system that immobilises insects on contact. Oa2ki® gives rapid knockdown, having the added benefit of being insecticide free with no residual activity. Oa2ki® is highly effective against ants, bed bugs, fleas, flies and small insects by physical means only - without the use of poisons.

Directions for use:

Spray the product directly onto the insect pest to obtain complete coverage. Oa2ki® can be used both indoors and outdoors.

Effective knockdown for fleas, ants, cockroaches, flies, bed bugs, mosquitoes and small flying and crawling insects around the home. Spray the product directly on the flying or crawling insect to completely cover it. Once the insect is immobilized, spray a second time to eliminate it. Oa2ki® is effective on both adult insects and larvae.

Oa2ki® can be sprayed directly onto pet bedding. For bed bugs and small insects Oa2ki® can be applied directly to the insects and to cracks and crevices where insects may hide. Avoid spraying near highly polished wax surfaces. Do not spray directly onto animals, plants or foodstuff. Product may mark or darken absorbent surfaces. These marks should disappear within a few days but if in doubt, spray a small test area first. Oa2ki® is a non-biocidal product due to its physical mode of action and is exempt from EU Reg. 528/2012

Shake contents well before use.
