

ORGANIC DESICCANT POWDER

(Diatomaceous earth)

PRODUCED FROM

FOSSILISED DIATOMS

Oa2ki POWDER (Diatomaceous Earth)

Oa2ki powder is produced from fossilised diatoms.
The powder is able to desiccate any area where it is applied.

Application instructions

Oa2ki can be applied directly as dust or as a slurry to the areas where desiccated application is required.

Apply as required directly on the area, up to 10-30 g/m² of hard surface. Application can be repeated after 15 days.

When applied as a slurry, the recommended dilution rate is 1 part Oa2ki to 2.5 litres of water. This solution can be painted and left to dry. Stir on a regular basis during application.

When applying Oa2Ki it is recommended to use appropriate personal protective equipment (gloves, coveralls and mask FFP2 EN149 or DIN 58 646- HM fitted with a P2 filter DIN EN 143 and only re-enter the area when dust has settled.

**DO NOT BREATHE POWDER.
KEEP OUT OF THE REACH OF CHILDREN.
DUST PARTICLES IN EYES CAN BE WASHED
OUT WITH CLEAN WATER.**
