PROTECT FROM FROST.

DIRECTIONS FOR USE: IMPORTANT: This information is approved as part of the product label. All instructions within this section must be read carefully in order to obtain safe and successful use of this product.

REZIST LIQUID is an animal repellent that works via the learned aversion response.

MIXING:

Thoroughly agitate the container well before opening.
Half fill the spray tank and commence agitation before addition of the required quantity of Liquid REZIST.
Add the remaining quantity of water and continue agitation until spraying is completed.
Do not leave in the sprayer without agitation.
Wash out all equipment thoroughly after use.

COMPATIBILITY:

Do not apply REZIST LIQUID with any other products.

SPRAY QUALITY:

Apply as a FINE to MEDIUM spray as defined by BCPC system.

TO DETER OR DISCOURAGE DOG FOULING ON MANAGED AMENITY TURF AND GRASSLAND.

RATE OF USE

Foliar application:
25 l/ha in 225 Litres water volume

Knapsack application:

1 Litre of concentrate in 8 Litres of water per 400m²

TIMING

Ideally treatment should be applied before fouling occurs. Where established fouling patterns are encountered initial efficacy may be reduced. It is recommended that all excrement be removed before treatment.

TO DETER OR DISCOURAGE MOLE INFESTATION ON MANAGED AMENITY TURF AND GRASSLAND.

RATE OF USE

Soil application:
25 l/ha in 450 Litres water volume

Knapsack application

1 Litre of concentrate in 16 Litres of water per 400m²

TIMING

Treatment should be applied as a planned programme when moles are active. To obtain effective control consult Barretteine before use or go to www.rezist.co.uk.

Note

Treatment for mole deterrence may also have repellent affects on other animals such as birds, rabbits and hares.

TO DETER OR DISCOURAGE THE PRESENCE OF GEESE, RABBITS, FOXES ON MANAGED AMENITY TURF AND GRASSLAND.

RATE OF USE

Foliar application:
25 l/ha in 225 Litres water volume

Knapsack application:

1 Litre of concentrate in 8 Litres of water per 400m²

TIMING

Ideally treatment should be applied before infestation occurs. Where established infestation patterns are encountered initial efficacy may be reduced. For extended control repeat applications will be necessary. This product should be used as part of a planned control programme rather than on its own.

Caution

REZIST LIQUID is highly soluble and residues will be removed by rain or cleaning. For extended control repeat applications will be necessary. This product should be used as part of a planned plant protection control programme rather than on its own.
