

BAYER FLYING INSECT KILLER

Version 5 / GB
102000012978

1/14
Revision Date: 27.08.2018
Print Date: 28.08.2018

SECTION 1: IDENTIFICATION OF THE SUBSTANCE/MIXTURE AND OF THE COMPANY/UNDERTAKING

1.1 Product identifier

Trade name BAYER FLYING INSECT KILLER
Product code (UVP) 05685493

1.2 Relevant identified uses of the substance or mixture and uses advised against

Use Insecticide

1.3 Details of the supplier of the safety data sheet

Supplier Bayer Environmental Science
230 Cambridge Science Park
Milton Road
Cambridge
Cambridgeshire CB4 0WB
United Kingdom

Telephone 00800-1214 9451

Telefax +44(0)1223 426240

Responsible Department Email: ukinfo@bayercropscience.com

1.4 Emergency telephone no.

Emergency telephone no. 00800 1020 3333 (24 hr)

SECTION 2: HAZARDS IDENTIFICATION

2.1 Classification of the substance or mixture

Classification in accordance with Regulation (EC) No 1272/2008 on classification, labelling and packaging of substances and mixtures, as amended.

Aerosols: Category 1

H222 Extremely flammable aerosol.

Acute aquatic toxicity: Category 1

H400 Very toxic to aquatic life.

Chronic aquatic toxicity: Category 1

H410 Very toxic to aquatic life with long lasting effects.

2.2 Label elements

|| Labelling in accordance with Regulation (EC) No 1272/2008 on classification, labelling and packaging of substances and mixtures, as amended.

|| Hazard label for supply/use required.

Hazardous components which must be listed on the label:

**BAYER FLYING INSECT KILLER**Version 5 / GB
1020000129782/14
Revision Date: 27.08.2018
Print Date: 28.08.2018

- d-Tetramethrin
- 1R-trans-Phenothrin
- Propane
- Butane
- Isobutane

**Signal word:** Danger**Hazard statements**

H222	Extremely flammable aerosol.
H229	Pressurised container: May burst if heated.
H410	Very toxic to aquatic life with long lasting effects.
EUH066	Repeated exposure may cause skin dryness or cracking.
EUH401	To avoid risks to human health and the environment, comply with the instructions for use.

Precautionary statements

P210	Keep away from heat/sparks/open flames/hot surfaces. No smoking.
P211	Do not spray on an open flame or other ignition source.
P251	Do not pierce or burn, even after use.
P260	Do not breathe spray.
P410 + P412	Protect from sunlight. Do not expose to temperatures exceeding 50 °C/ 122 °F.
P501	Dispose of contents/container to a licensed hazardous-waste disposal contractor or collection site except for empty clean containers which can be disposed of as non-hazardous waste.

2.3 Other hazards

Cutaneous sensations may occur, such as burning or stinging on the face and mucosae. However, these sensations cause no lesions and are of a transitory nature (max. 24 hours).
Pressurised container, heating will cause pressure rise with a risk of bursting.

SECTION 3: COMPOSITION/INFORMATION ON INGREDIENTS**3.2 Mixtures****Chemical nature**

Aerosol dispenser (AE)
d-Tetramethrin < 0,5 %, 1R-trans-Phenothrin < 0,5 %

Hazardous components

Hazard statements according to Regulation (EC) No. 1272/2008

Name	CAS-No. / EC-No. / REACH Reg. No.	Classification	Conc. [%]
		REGULATION (EC) No 1272/2008

Further information

1R-trans-Phenothrin	26046-85-5	M-Factor: 100 (acute), 100 (chronic)
d-Tetramethrin	1166-46-7	M-Factor: 100 (acute), 100 (chronic)

For the full text of the H-Statements mentioned in this Section, see Section 16.

SECTION 4: FIRST AID MEASURES**4.1 Description of first aid measures**

General advice	Remove contaminated clothing immediately and dispose of safely. Move out of dangerous area. Place and transport victim in stable position (lying sideways). Remove contaminated clothing immediately and dispose of safely.
Inhalation	If abnormal over-exposure and inhalation of the aerosol occurs, the following advice is applicable: Move to fresh air. Keep patient warm and at rest. Call a physician or poison control center immediately.
Skin contact	Immediately wash with plenty of soap and water for at least 15 minutes. Warm water may increase the subjective severity of the irritation/paresthesia. This is not a sign of systemic poisoning. In case of skin irritation, application of oils or lotions containing vitamin E may be considered. If symptoms persist, call a physician.
Eye contact	Rinse immediately with plenty of water, also under the eyelids, for at least 15 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. Warm water may increase the subjective severity of the irritation/paresthesia. This is not a sign of systemic poisoning. Apply soothing eye drops, if needed anaesthetic eye drops. Get medical attention if irritation develops and persists.
Ingestion	Keep at rest. Rinse mouth. Do NOT induce vomiting. Call a physician or poison control center immediately.

BAYER FLYING INSECT KILLER

Version 5 / GB
102000012978

4/14
Revision Date: 27.08.2018
Print Date: 28.08.2018

Ingestion of the liquid of the aerosol is unlikely. However, if ingested, the following advice is applicable. Call a physician or poison control center immediately. Do not induce vomiting: contains petroleum distillates and/or aromatic solvents. Risk of product entering the lungs on vomiting after ingestion. Rinse mouth.

4.2 Most important symptoms and effects, both acute and delayed

Symptoms

Inhalation may provoke the following symptoms:

Local:, Skin and eye paraesthesia which may be severe, Usually transient with resolution within 24 hours, Skin, eye and mucous membrane irritation, Cough, Sneezing

Systemic:, discomfort in the chest, tachycardia, Hypotension, Nausea, Abdominal pain, Diarrhoea, Vomiting, Dizziness, Blurred vision, Headache, Anorexia, Somnolence, Coma, Convulsions, Tremors, Prostration, Airway hyperreaction, Pulmonary oedema, Palpitation, Muscular fasciculation, Apathy

Symptoms and hazards refer to effects observed after intake of significant amounts of the active ingredient(s).

Aspiration may cause pulmonary oedema and pneumonitis.

Symptoms and hazards refer to the solvent.

4.3 Indication of any immediate medical attention and special treatment needed

Risks

This product contains a pyrethroid. Pyrethroid poisoning should not be confused with carbamate or organophosphate poisoning. Contains hydrocarbon solvents. May pose an aspiration pneumonia hazard.

Treatment

In case of skin irritation, application of oils or lotions containing vitamin E may be considered.

Monitor: respiratory and cardiac functions. In case of ingestion gastric lavage should be considered in cases of significant ingestions only within the first 2 hours. However, the application of activated charcoal and sodium sulphate is always advisable. Keep respiratory tract clear. Oxygen or artificial respiration if needed. In case of convulsions, a benzodiazepine (e.g. diazepam) should be given according to standard regimens. If not effective, phenobarbital may be used. There is no specific antidote. Contraindication: atropine. Contraindication: derivatives of adrenaline. Recovery is spontaneous and without sequelae. In case of aspiration intubation and bronchial lavage should be considered. Monitor: kidney, liver and pancreas function.

SECTION 5: FIREFIGHTING MEASURES

5.1 Extinguishing media

Suitable

Use water spray, alcohol-resistant foam, dry chemical or carbon dioxide.

BAYER FLYING INSECT KILLER

Version 5 / GB
102000012978

5/14
Revision Date: 27.08.2018
Print Date: 28.08.2018

5.2 Special hazards arising from the substance or mixture	Dangerous gases are evolved in the event of a fire., Heating can lead to increased pressure with risk of explosion.
5.3 Advice for firefighters	
Special protective equipment for firefighters	In the event of fire and/or explosion do not breathe fumes. In the event of fire, wear self-contained breathing apparatus.
Further information	Remove product from areas of fire, or otherwise cool containers with water in order to avoid pressure being built up due to heat. Whenever possible, contain fire-fighting water by diking area with sand or earth.

SECTION 6: ACCIDENTAL RELEASE MEASURES

6.1 Personal precautions, protective equipment and emergency procedures

Precautions	Keep people away from and upwind of spill/leak. Consider the need for evacuation. Avoid contact with spilled product or contaminated surfaces. Ensure adequate ventilation. When dealing with a spillage do not eat, drink or smoke.
--------------------	--

6.2 Environmental precautions	Do not allow to get into surface water, drains and ground water. If spillage enters drains leading to sewage works inform local water company immediately. If spillage enters rivers or watercourses, inform the Environment Agency (emergency telephone number 0800 807060).
--------------------------------------	---

6.3 Methods and materials for containment and cleaning up

Methods for cleaning up	The nature of this product, when contained in commercial packs, makes spillage unlikely. However, if significant amounts are spilled nevertheless, the following advice is applicable. Soak up with inert absorbent material (e.g. sand, silica gel, acid binder, universal binder, sawdust). Keep in suitable, closed containers for disposal. Clean floors and contaminated objects with plenty of water.
--------------------------------	---

Additional advice	Check also for any local site procedures.
--------------------------	---

6.4 Reference to other sections	Information regarding safe handling, see section 7. Information regarding personal protective equipment, see section 8. Information regarding waste disposal, see section 13.
--	---

SECTION 7: HANDLING AND STORAGE

7.1 Precautions for safe handling

Advice on safe handling	No specific precautions required when handling unopened packs/containers; follow relevant manual handling advice. Ensure adequate ventilation.
--------------------------------	--

Advice on protection against fire and explosion	The product is extremely flammable. Vapours may form explosive mixture with air. Fire or intense heat may cause violent rupture of packages. Keep away from heat and sources of ignition.
--	---

Hygiene measures	Avoid contact with skin, eyes and clothing. Keep working clothes
-------------------------	--

**BAYER FLYING INSECT KILLER**Version 5 / GB
1020000129786/14
Revision Date: 27.08.2018
Print Date: 28.08.2018

separately. Wash hands before breaks and immediately after handling the product. Wash hands immediately after work, if necessary take a shower. Remove soiled clothing immediately and clean thoroughly before using again. Garments that cannot be cleaned must be destroyed (burnt).

7.2 Conditions for safe storage, including any incompatibilities

Requirements for storage areas and containers BEWARE: Aerosol is pressurized. Keep away from direct sun exposure and temperatures over 50 °C. Do not open by force or throw into fire even after use. Do not spray on flames or red-hot objects. Store in original container and out of the reach of children, preferably in a locked storage area. Keep away from direct sunlight. Protect from freezing. Keep containers tightly closed in a dry, cool and well-ventilated place. Protect from frost.

Advice on common storage Keep away from food, drink and animal feedingstuffs.

7.3 Specific end use(s) Refer to the label and/or leaflet.

SECTION 8: EXPOSURE CONTROLS/PERSONAL PROTECTION**8.1 Control parameters**

Components	CAS-No.	Control parameters	Update	Basis
Butane	106-97-8	1,810 mg/m ³ /750 ppm (STEL)	12 2011	EH40 WEL
Butane	106-97-8	1,450 mg/m ³ /600 ppm (TWA)	12 2011	EH40 WEL

8.2 Exposure controls

Refer to COSHH assessment (Control of Substances Hazardous to Health (Amendment) Regulations 2004). Engineering controls should be used in preference to personal protective equipment wherever practicable. Refer also to COSHH Essentials.

Personal protective equipment

In normal use and handling conditions please refer to the label and/or leaflet. In all other cases the following recommendations would apply.

Respiratory protection

Personal protective equipment is not normally required when using the aerosol. However, if there is a risk of uncontrolled exposure to the contents, the following should be considered.

Wear respirator with an organic vapours and gas filter mask (protection factor 10) conforming to EN140 type A or equivalent.

Respiratory protection should only be used to control residual risk of short duration activities, when all reasonably practicable steps have been taken to reduce exposure at source e.g. containment and/or local extract ventilation. Always follow respirator manufacturer's instructions regarding wearing and maintenance.

Hand protection

Personal protective equipment is not normally required when using the aerosol. However, if there is a risk of uncontrolled exposure to the contents, the following should be considered.

Please observe the instructions regarding permeability and breakthrough time which are provided by the supplier of the gloves.

**BAYER FLYING INSECT KILLER**Version 5 / GB
1020000129787/14
Revision Date: 27.08.2018
Print Date: 28.08.2018

Also take into consideration the specific local conditions under which the product is used, such as the danger of cuts, abrasion, and the contact time.

Wash gloves when contaminated. Dispose of when contaminated inside, when perforated or when contamination on the outside cannot be removed. Wash hands frequently and always before eating, drinking, smoking or using the toilet.

Material	Nitrile rubber
Rate of permeability	> 480 min
Glove thickness	> 0.4 mm
Directive	Protective gloves complying with EN 374.

Eye protection

Personal protective equipment is not normally required when using the aerosol. However, if there is a risk of uncontrolled exposure to the contents, the following should be considered.
Wear goggles (conforming to EN166, Field of Use = 5 or equivalent).

Skin and body protection

Personal protective equipment is not normally required when using the aerosol. However, if there is a risk of uncontrolled exposure to the contents, the following should be considered.
Wear standard coveralls and Category 3 Type 6 suit.
If there is a risk of significant exposure, consider a higher protective type suit.
Wear two layers of clothing wherever possible. Polyester/cotton or cotton overalls should be worn under chemical protection suit and should be professionally laundered frequently.

SECTION 9: PHYSICAL AND CHEMICAL PROPERTIES**9.1 Information on basic physical and chemical properties**

Form	aerosol
Flash point	-60 °C The value mentioned relates to the aerosol propellant.
Ignition temperature	288 °C The value mentioned relates to the aerosol propellant.
Upper explosion limit	8.4 %(V) The value mentioned relates to the aerosol propellant.
Lower explosion limit	1.8 %(V) The value mentioned relates to the aerosol propellant.
Relative vapour density	2.9 The value mentioned relates to the aerosol propellant.
Density	ca. 0.81 g/cm ³ at 20 °C
Partition coefficient: n-octanol/water	1R-trans-phenothrin: log Pow: 6.8 Tetramethrin: log Pow: 4.58

9.2 Other information

The product is extremely flammable.

BAYER FLYING INSECT KILLER

Version 5 / GB
102000012978

8/14
Revision Date: 27.08.2018
Print Date: 28.08.2018

SECTION 10: STABILITY AND REACTIVITY

10.1 Reactivity

Thermal decomposition Stable under normal conditions.

10.2 Chemical stability Stable under recommended storage conditions.

10.3 Possibility of hazardous reactions No hazardous reactions when stored and handled according to prescribed instructions.

10.4 Conditions to avoid Extremes of temperature and direct sunlight.

10.5 Incompatible materials Store only in the original container.

10.6 Hazardous decomposition products No decomposition products expected under normal conditions of use.

SECTION 11: TOXICOLOGICAL INFORMATION

11.1 Information on toxicological effects

Acute oral toxicity ATE (Mix) > 5,000 mg/kg
Calculation method

Acute inhalation toxicity ATE (Mix) > 5 mg/l
Exposure time: 4 h
Calculation method

Acute dermal toxicity ATE (Mix) > 5,000 mg/kg
Calculation method

Skin corrosion/irritation No skin irritation (Rabbit)
The information is derived from the properties of the individual components.

Serious eye damage/eye irritation No eye irritation (Rabbit)
The information is derived from the properties of the individual components.

Respiratory or skin sensitisation Non-sensitizing. (Guinea pig)
The information is derived from the properties of the individual components.

Assessment STOT Specific target organ toxicity – single exposure

1R-trans-phenothrin: Based on available data, the classification criteria are not met.
Tetramethrin: Based on available data, the classification criteria are not met.

Assessment STOT Specific target organ toxicity – repeated exposure

1R-trans-phenothrin: Based on available data, the classification criteria are not met.
Tetramethrin did not cause specific target organ toxicity in experimental animal studies.

Assessment mutagenicity

1R-trans-phenothrin is not considered mutagenic.
Tetramethrin was not mutagenic or genotoxic in a battery of in vitro and in vivo tests.

**BAYER FLYING INSECT KILLER**Version 5 / GB
1020000129789/14
Revision Date: 27.08.2018
Print Date: 28.08.2018**Assessment carcinogenicity**

1R-trans-phenothrin is not considered carcinogenic.
Tetramethrin caused at high dose levels an increased incidence of tumours in mice in the following organ(s): Testes. The mechanism that triggers tumours in rodents and the type of tumours observed are not relevant to humans.

Assessment toxicity to reproduction

1R-trans-phenothrin did not cause reproductive toxicity in laboratory animals.
Tetramethrin did not cause reproductive toxicity in a two-generation study in rats.

Assessment developmental toxicity

1R-trans-phenothrin: Based on available data, the classification criteria are not met.
Tetramethrin did not cause developmental toxicity in rats and rabbits.

Aspiration hazard

Based on available data, the classification criteria are not met.

Further information

Cutaneous sensations may occur, such as burning or stinging on the face and mucosae. However, these sensations cause no lesions and are of a transitory nature (max. 24 hours).

SECTION 12: ECOLOGICAL INFORMATION**12.1 Toxicity**

	Toxicity to fish	LC50 (Fish) 0.010 mg/l
		Exposure time: 96 h The value mentioned relates to the active ingredient D-tetramethrin.
		LC50 (Fish) 0.0027 mg/l
		Exposure time: 96 h The value mentioned relates to the active ingredient 1R-Trans-Phenothrin.
	Toxicity to aquatic invertebrates	EC50 (Daphnia magna (Water flea)) 0.11 mg/l
		Exposure time: 48 h The value mentioned relates to the active ingredient tetramethrin.
		EC50 (Daphnia magna (Water flea)) 0.0043 mg/l
		Exposure time: 48 h The value mentioned relates to the active ingredient 1R-Trans-Phenothrin.
	Toxicity to aquatic plants	IC50 (Algae) 0.011 mg/l
		Biomass; Exposure time: 96 h The value mentioned relates to the active ingredient 1R-Trans-Phenothrin.
		NOEC > 0.0001 - < 0.001 mg/l
		The value mentioned relates to the active ingredient 1R-Trans-Phenothrin.

12.2 Persistence and degradability

Biodegradability 1R-trans-phenothrin:

**BAYER FLYING INSECT KILLER**Version 5 / GB
10200001297810/14
Revision Date: 27.08.2018
Print Date: 28.08.2018

	Not rapidly biodegradable
	Tetramethrin:
	Not rapidly biodegradable
Koc	1R-trans-phenothrin: Koc: 141000 Tetramethrin: Koc: 1249 - 2939
12.3 Bioaccumulative potential	
Bioaccumulation	1R-trans-phenothrin: Bioconcentration factor (BCF) 730 Does not bioaccumulate. Tetramethrin: Potential bioaccumulation
12.4 Mobility in soil	
Mobility in soil	1R-trans-phenothrin: Immobile in soil Tetramethrin: Slightly mobile in soils
12.5 Results of PBT and vPvB assessment	
PBT and vPvB assessment	1R-trans-phenothrin: This substance is not considered to be persistent, bioaccumulative and toxic (PBT). This substance is not considered to be very persistent and very bioaccumulative (vPvB). Tetramethrin: This substance is not considered to be persistent, bioaccumulative and toxic (PBT). This substance is not considered to be very persistent and very bioaccumulative (vPvB).
12.6 Other adverse effects	
Additional ecological information	No other effects to be mentioned.

SECTION 13: DISPOSAL CONSIDERATIONS**13.1 Waste treatment methods**

Product	In accordance with current regulations and, if necessary, after consultation with the site operator and/or with the responsible authority, the product may be taken to a waste disposal site or incineration plant. Advice may be obtained from the local waste regulation authority (part of the Environment Agency in the UK).
Contaminated packaging	Ensure aerosol container is empty before disposal. Dispose of empty container in the dustbin. Dispose of empty and cleaned packaging safely.
Waste key for the unused product	16 05 04* gases in pressure containers (including halons) containing hazardous substances 06 13 01* Inorganic plant protection products, wood-preserving agents and other biocides

SECTION 14: TRANSPORT INFORMATION**ADR/RID/ADN**

This information is based on our present state of knowledge. It should not therefore be construed as guaranteeing specific properties of the products described or their suitability for a particular application.

The information contained within this Safety Data Sheet is in accordance with the guidelines established by Regulation (EU) 1907/2006 and Regulation (EU) 2015/830 amending Regulation (EU) No 1907/2006 and any subsequent amendments. This data sheet complements the user's instructions, but does not replace them. The information it contains is based on the knowledge available about the product concerned at the time it was compiled. Users are further reminded of the possible risks of using a product for purposes other than those for which it was intended. The required information complies with current EEC legislation. Addressees are requested to observe any additional national requirements.

Reason for Revision:

The following sections have been revised: Section 9: Physical and Chemical Properties. Section 11: Toxicological Information. Section 11: Toxicological information on STOT (Specific Target Organ Toxicity) and CMR (Carcinogenic, Mutagenic and toxic to Reproduction).

Safety Data Sheet according to Regulation (EU) No. 2015/830. The following sections have been revised: Section 2: Hazards Identification. Section 7: Handling and Storage. Section 8: Exposure Controls / Personal Protection.

Changes since the last version are highlighted in the margin. This version replaces all previous versions.

The above information is intended to give general health and safety guidance on the storage and transport of the product.

It is not intended to apply to the use of the product for which purposes the product label and any appropriate technical usage literature available should be consulted and any relevant licenses, consents or approvals complied with.

The requirements or recommendations of any relevant site or working procedure, system or policy in force or arising from any risk assessment involving the substance or product should take precedence over any of the guidance contained in this safety data sheet where there is a difference in the information given.

SAFETY DATA SHEET according to Regulation (EC) No. 1907/2006
